

## **New for 2020: Free Meal Delivery After Inpatient Hospitalization**

Starting on January 1, 2020, MVP Health Care® (MVP) will be offering Medicare Advantage members free meal delivery through Mom's Meals, a leading national provider of tailored and healthy home-delivered meals—to assist with nutritional support during recovery from an inpatient hospitalization stay. MVP Medicare members will receive 14 high-quality refrigerated meals delivered directly to their home. Members can choose from breakfast, lunch and dinner menu options, which can be tailored to suit dietary and condition-specific needs.

An MVP representative will contact the qualified member with details when they are discharged, with information about the program.

Please encourage your eligible MVP members to take advantage of this benefit available to them during this high-risk time of transition from hospital to home.
