

## Required Authorizations for Radiology Services

MVP Health Care® (MVP) currently requires authorizations for select radiology services through eviCore. When an authorization is required, it applies to all Technical, Global and/or Facility claims submitted for the service. If services requiring an authorization are provided without prior approval, all claims associated with those services will be denied administratively.

**Effective 6/1/2019**, MVP will not reimburse radiology claims that require prior authorization that are submitted with a Modifier 26 for the professional reading without a valid authorization.

Prior authorization for a member can be confirmed by visiting **evicore.com**. Complete instructions on how to check member authorization status can be found in the *Provider Resource Manual* (PRM). To access the PRM, visit **mvphealthcare.com**, select *Providers* then *Sign In* to your account. Go to *Resources*, and then select *Provider Resource Manual*. The complete *Radiology Payment Policy* can be found in Section 15.
