

Let's Talk Prevention

Your No-Cost Prescription Drugs for Preventive Care

Your health plan from MVP Health Care® (MVP) offers certain preventive service benefits at no cost to you. This means you don't have to pay a co-pay¹ or co-insurance, even if you haven't met your deductible. These no-cost benefits are part of the Affordable Care Act (ACA) and include:

- Medicine and supplements to prevent certain health conditions for adults, women, and children
- Medicine and products for quitting smoking or chewing tobacco (tobacco cessation)
- Medicine used prior to screenings for certain health conditions in adults
- Vaccines and immunizations to prevent certain illnesses in infants, children, and adults
- Contraceptives

MVP Works With CVS Caremark to Provide These Benefits

The lists on the following pages² explain:

- Which medications or vaccines (administered by a pharmacist) are covered
- Who they are covered for, such as children age five and under, or adults age 65 or older
- What health condition or illness they help prevent

¹Co-pay, co-payment, or co-insurance is the out-of-pocket amount a plan member is required to pay for a prescription in accordance with a plan, which may be a deductible, a percentage of the prescription price, a fixed amount, or other charge, with the balance, if any, paid by a plan.

²Recommendations, ages, and populations may vary. Products listed may be updated periodically. List does not guarantee coverage. Vaccines, immunizations, and intrauterine devices may be covered through your medical or pharmacy benefit. Consult your plan for a complete coverage and list details.

No-Cost Prescription Drugs for Preventive Care

Tips for Using the Lists

- Take this list with you each time you or your family has a check-up or yearly exam
- Your doctor must write a prescription for these medications to be covered by your plan, even if they are listed as over-the-counter
- The dosage form is how the product is supplied. For example, tablet, capsule, liquid, syrup, or chewable tablet
- “Generic” or “brand name” is listed if only that product type is covered
- Treatment recommendations may vary. Please call your doctor or pharmacist if you have questions about your health or medicine²
- Other rules and limits may apply. Contact the MVP Customer Care Center at the number on the back of your MVP Member ID card if you have questions about your coverage²

Over-the-Counter Medications

Aspirin for pregnant individuals 12–59 years of age who are at risk for preeclampsia.

- Aspirin 81 mg (various dosage forms)
