## Policy

After-hour codes are used when a Provider performs services in the office outside of normal business hours. MVP has determined normal business hours to mean 8 am–6 pm EST, Monday through Friday. In accordance with Centers for Medicare and Medicaid Services (CMS) billing guidelines, MVP reimburses the following after-hours codes as inclusive with the Evaluation and Management (E&M) code that is billed. These CPT codes are not payable if they are the only CPT procedure(s) listed on the claim.

## Reimbursement Guidelines

| Code  | Description                                                                                                                                                                                           | Reimbursement Guidelines                                                                                                                                                                                                                               |
|-------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 99050 | Service(s) provided in the office at times other than regularly scheduled office hours, or days when the office is normally closed (e.g., holidays, Saturday or Sunday), in addition to basic service | This code must be billed with an E&M to be reimbursable. This code will not be reimbursable when submitted with preventive visit codes.                                                                                                                |
| 99051 | Service(s) provided in the office during regularly scheduled evening, weekend, or holiday office hours, in addition to basic service                                                                  | This code must be billed with an E&M code and is considered inclusive to the E&M. MVP does not reimburse separately for this code for Commercial and Medicare products. For Medicaid/HARP products, MVP will reimburse this code at the Medicaid rate. |
| 99053 | Service(s) provided between 10 pm–8 am at 24-hour facility, in addition to basic service                                                                                                              | This code must be billed with an E&M code and is considered inclusive to the E&M. MVP does not reimburse separately for this code.                                                                                                                     |
| 99056 | Service(s) typically provided in the office, provided out of the office at request of patient, in addition to basic service                                                                           | This code must be billed with an E&M code and is considered inclusive to the E&M. MVP does not reimburse separately for this code.                                                                                                                     |
| 99058 | Service(s) provided on an emergency basis in the office, which disrupts other scheduled office services, in addition to basic service                                                                 | This code must be billed with an E&M code and is considered inclusive to the E&M. MVP does not reimburse separately for this code.                                                                                                                     |
| 99060 | Service(s) provided on an emergency basis, out of the office, which disrupts other scheduled office services, in addition to basic service                                                            | This code must be billed with an E&M code and is considered inclusive to the E&M. MVP does not reimburse separately for this code.                                                                                                                     |

## Notification/Prior Authorization Requests

MVP Payment Policies are not a guarantee of payment. Providers must also review MVP's Utilization Management Guides to determine if prior authorization is required and can refer to the searchable PDF versions of Medical, Pharmacy and other Provider and Payment policies for guidelines. The current policies can be found [here](#).

# Applied Behavior Analysis Services

Last Reviewed Date: May 1, 2025

## APPLIED BEHAVIOR ANALYSIS SERVICES

Policy  
Notification/Prior Authorization Requests  
Referrals  
Reimbursement Guidelines  
Billing/Coding Guidelines  
Non-Reimbursable ABA Services  
References  
History

### Policy

Applied Behavior Analysis (ABA) Services are therapy services for Members with a diagnosis of Autism Spectrum Disorder (ASD) as defined in the Diagnostic and Statistical Manual of Mental Disorders, Fifth Edition (DSM-5). This policy applies to the Managed Medicaid, HARP, Essential Health Plans, Child Health Plus, and Commercial lines of business, and provides coding and billing guidelines to assist ABA Providers to ensure codes billed meet regulatory and industry standard requirements (see variations applicable to Managed Medicaid and Vermont products below).

### Notification/Prior Authorization Requests

Prior Authorization is required for ABA Assessments and Services, and medical necessity criteria must be met. Referrals for ABA Assessments and/or Services must be made by a NY or VT licensed physician, psychologist, psychiatric nurse practitioner, pediatric nurse practitioner, or physician assistant.

MVP Payment Policies are not a guarantee of payment. Providers must also review MVP's Utilization Management Guides to determine if prior authorization is required and can refer to the searchable PDF versions of Medical, Pharmacy and other Provider and Payment policies for guidelines. The current policies can be found [here](#).

### Referrals

Referrals for ABA Services are valid for a period of two (2) years from the date of referral and should include:

- Age of the patient
- ASD or Rett Syndrome diagnosis
- Date of initial diagnosis
- Co-morbid diagnosis (if applicable)
- Symptom severity level/level of support (if referral is from an ASD-diagnosing provider)
- DSM-5 Diagnostic Checklist for ASD diagnosis
- Referring statement that the Member requires ABA Services as medical necessity

## Reimbursement Guidelines

### General

ABA Services are reimbursed when a comprehensive evaluation has been completed and services are prescribed by a Participating and MVP credentialed health care professional and appropriately performed by a Licensed Behavior Analyst (LBA), a Certified Behavior Analyst Assistant (CBAA) under the supervision of an LBA, a Registered Behavior Technician (RBT), or other unlicensed professionals acting under the supervision and direction of an LBA under Article 167 of NYS Education Law<sup>1</sup> or under the supervision and direction of a nationally Board-Certified Behavior Analyst (BCBA).

ABA Providers delivering services to eligible Government Program Members (Managed Medicaid, CHP, and HARP) must be enrolled in Medicaid FFS and maintain a valid MMIS number.

Authorized ABA Services rendered to Government Program Members (Managed Medicaid, CHP and HARP) will be reimbursed in accordance with the MVP Medicaid Community Fee Schedule provision indicated within the Provider's participation agreement. The MVP Medicaid Community Fee Schedule is the NYS Medicaid Fee Schedule in effect at the time the service was rendered.

### Documentation Standards

As a general guideline, MVP expects Providers to follow "Record Keeping Requirements" applicable to NYS providers enrolled in the Medicaid Program<sup>2</sup> and for other state providers, as may be generally accepted by clinical practice and industry standards, when preparing clinical documentation, including but not limited to treatment plans, treatment goals, and session notes.

Prior to the initiation of ABA Services, a comprehensive evaluation of the Member and their physical and behavioral health conditions is required before a full treatment plan is formulated.

ABA Services should be individualized to the specific therapy needs of the Member. Individual services may be provided one-to-one by an appropriate provider in various settings, including but not limited to the Member's home or another community setting; group adaptive behavior treatment(s) may be provided in certain group settings.

A treatment plan should be formulated and maintained by an LBA, who ought to periodically review for clinical appropriateness. Treatment goals and targeted services should be objective and measurable when identified through the assessment process. Only goals documented in the treatment plan as approved during the prior authorization process are reimbursable, unless an LBA updates the treatment plan to reflect mastery and or substitution of goals based on data and relevant changes in psychosocial, family, educational, or medical history.

### How to Bill

ABA Services are billed using the LBA as the servicing/rendering provider. Supervising LBAs must be an MVP Participating Provider.

\*NY Limited Permit Holders and Graduate Permit Holders: LBAs can bill for services and/or activities provided by non-enrolled LBA Limited Permit Holders and Graduate Permit Holders, as defined by NYSED, under their supervision using the supervising LBA's NPI number for the "Billing," "Supervising" and/or "Rendering" Provider.

ABA Services provided by RBTs or other unlicensed professionals acting under the supervision and direction of the LBA are only covered for CPT codes 97152, 97153, and 97154.

Please refer to your provider fee schedule for specific reimbursement guidelines.

---

<sup>1</sup> Under Article 167 of NYS Education Law, other unlicensed professionals include behavior technicians who must be appropriately supervised by and under the direction of an LBA. Services provided by CBAA's, RBTs, and such other unlicensed professionals shall only be reimbursed when reported under a supervising LBA(s).

<sup>2</sup> "Information to all Providers - General Policy" guidelines include "Record Keeping Requirements" that apply to NYS Medicaid Providers and are helpful as a rule to providers contracted for other health benefit products.

## Billing/Coding Guidelines

The following CPT codes are covered for ABA Services providers:

| CPT Code | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                |
|----------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 97151    | Behavior identification assessment, administered by a physician or other qualified health care professional, each 15 minutes of the physician's or other qualified health care professional's time face-to-face with patient and/or guardian(s)/caregiver(s) administering assessments and discussing findings and recommendations, and non-face-to-face analyzing past data, scoring/interpreting the assessment, and preparing the report/treatment plan |
| 97152    | Behavior identification-supporting assessment, administered by one technician under the direction of a physician or other qualified health care professional, face-to-face with the patient, each 15 minutes                                                                                                                                                                                                                                               |
| 97153    | Adaptive behavior treatment by protocol, administered by technician under the direction of a physician or other qualified health care professional, face-to-face with one patient, each 15 minutes                                                                                                                                                                                                                                                         |
| 97154    | Group adaptive behavior treatment by protocol, administered by technician under the direction of a physician or other qualified health care professional, face-to-face with two or more patients, each 15 minutes                                                                                                                                                                                                                                          |
| 97155    | Adaptive behavior treatment with protocol modification, administered by physician or other qualified health care professional, which may include simultaneous direction of technician, face-to-face with one patient, each 15 minutes                                                                                                                                                                                                                      |
| 97156    | Family adaptive behavior treatment guidance, administered by physician or other qualified health care professional (with or without the patient present), face-to-face with guardian(s)/caregiver(s), each 15 minutes                                                                                                                                                                                                                                      |
| 97157    | Multiple-family group adaptive behavior treatment guidance, administered by physician or other qualified health care professional (without the patient present), face-to-face with multiple sets of guardians/caregivers, each 15 minutes                                                                                                                                                                                                                  |
| 97158    | Group adaptive behavior treatment with protocol modification, administered by physician or other qualified health care professional, face-to-face with multiple patients, each 15 minutes                                                                                                                                                                                                                                                                  |
| 0362T    | Behavior identification supporting assessment                                                                                                                                                                                                                                                                                                                                                                                                              |
| 0373T    | Adaptive behavior treatment with protocol modification, each 15 minutes                                                                                                                                                                                                                                                                                                                                                                                    |

Other common diagnosis codes<sup>3</sup> for ABA Services include the following:

### ICD-10 Code Description

| CPT Code | Description                                   |
|----------|-----------------------------------------------|
| F84.0    | Autistic disorder                             |
| F84.2    | Rett's syndrome                               |
| F84.3    | Other childhood disintegrative disorder       |
| F84.5    | Asperger's syndrome                           |
| F84.8    | Other pervasive developmental disorders       |
| F84.9    | Pervasive developmental disorder, unspecified |

---

<sup>3</sup> Common diagnosis codes referenced in this policy are for informational purposes only and is not an exhaustive list. These codes may be updated to reflect any applicable revisions to the ICD-10 Clinical Modification or CPT code sets adopted by CMS and/or medical necessity criteria.

## Non-Reimbursable ABA Services

In compliance with the prohibitions set forth in 14 N.Y.C.R.R § 635.13.4 and applicable CMS Coding and Billing guidelines, MVP does not reimburse for ABA Services provided via audio-only, fax-only, or e-mail-only transmissions for individuals with developmental disabilities.

ABA Services are not considered primary care services and will not be reimbursed in School-Based Health Centers.

ABA Services will not be covered as a substitute for an Early Intervention Program for developmental delays that do not meet the DSM-5 criteria for ASD and/or Rett Syndrome.

Effective July 1, 2025, ABA Services will not be covered in a school setting. . Claims submitted with a place of service of school (POS 3) will be administratively denied for payment. ABA Services that are provided pursuant to an Individualized Educational Plan (IEP) or the Preschool/School Supportive Health Services Program (SSHSP) under the New York State Education Law are not Covered Services.

**Temporary Telehealth Waiver:** In accordance with CMS' temporary waiver, MVP shall reimburse ABA Services provided via video-enabled telehealth services through March 31, 2025, or until such later date of the expiration of the CMS waiver. After any such expiration or change, MVP may deny ABA Services delivered via telehealth in accordance with applicable state laws or regulations.

## Medicaid Variations:

MVP Medicaid Managed Care Plan members have coverage for Applied Behavior Analysis (ABA) therapy, regardless of age, when they have a diagnosis of autism spectrum disorder and/or Rett Syndrome as defined by the American Psychiatric Association in its Diagnostic and Statistical Manual of Mental Disorders, 5<sup>th</sup> Edition (DSM-5); and when medically necessary.

**The following procedures are excluded from Medicaid Managed Care (MMC) plan coverage:**

- Behavior identification supporting assessment (CPT 0362T)
- Adaptive behavior treatment with protocol modification (0373T)

## State of Vermont Variation:

The diagnosis and treatment of early childhood developmental disorders is covered in accordance with Vermont state mandate for early childhood developmental disorders, including applied behavior analysis supervised by a nationally board-certified behavior analyst, for children, beginning at birth and continuing until the child reaches age 21.

# Arthroscopic, Endoscopic, and other Non-Gastro Intestinal Scope Procedures

Last Reviewed Date: May 1, 2025

## ARTHROSCOPIC, ENDOSCOPIC, AND - GASTROINTESTINAL SCOPE PROCEDURES

Policy

Notification/Prior Authorization Requests

Billing/Coding Guidelines

History

### Policy

When multiple Arthroscopic, Endoscopic, and Gastrointestinal Scope Procedures within the same code family are performed on the same date of service, the procedure with the highest RVU will be reimbursed according to the Provider fee schedule. The reimbursement of additional procedures will follow the Medicare reimbursement methodology by reducing payment for secondary procedures within the same CPT code family. This reimbursement rule follows Medicare methodology and applies to all product lines. This reimbursement rule does not apply to procedures in different code families; however, other reimbursement rules such as multiple procedure reimbursement reduction may apply.

### Notification/Prior Authorization Requests

MVP Payment Policies are not a guarantee of payment. Providers must also review MVP's Utilization Management Guides to determine if prior authorization is required and can refer to the searchable PDF versions of Medical, Pharmacy and other Provider and Payment policies for guidelines. The current policies can be found [here](#).

### Billing/Coding Guidelines

The endoscopy code families are defined in Medicare's RBRVS fee schedule. This reimbursement rule applies to code families including:

- Biliary Endoscopy
- Anoscopy
- Colonoscopy
- Sigmoidoscopy
- Small Bowel Endoscopy ERCP
- Esophagogastroduodenoscopy
- Esophagoscopy
- Shoulder Arthroscopy
- Elbow Arthroscopy
- Wrist Arthroscopy
- Knee Arthroscopy
- Hip Arthroscopy
- Laryngoscopy w/operating microscope

- Bronchoscope/wash
- Esophagoscopy flexible brush
- Diagnostic laparoscopy
- Cystoscopy
- Cystourethroscopy & or Pyeloscopy
- Hysteroscopy diagnostic separate procedure
- Nasal Endoscopy

## MVP Health Care Payment Policy

---

# Article 28 Split Billing

**Effective Date: October 1, 2025**

### ARTICLE 28 SPLIT BILLING

Policy

Definitions

Notification/Prior Authorization Requests

Billing/Coding Guidelines

History

---

## Policy

MVP will reimburse split billing arrangements in accordance with this policy and so long as the billing entity is structured and operates in compliance with the requirements of Article 28 of New York Public Health Law or its equivalent in other states.

MVP Commercial/ASO and Exchange products are not eligible for split billing arrangements.

This policy is limited to Article 28 Providers who participate with MVP Medicare and/or Government Programs (MMC, CHP, HARP).

## Definitions

### Split Billing Reimbursement

A billing arrangement whereby there are two separate charges— one for professional and one for technical reimbursement. Professional reimbursements are for the physician/physician practice and technical reimbursements are for the facility.

### Professional Reimbursement

Billable services provided by physician or physician practice, such as provider consultation and physician interpretation of an x-ray, lab, CT Scan, or MRI. Payment is made to the rendering physician or physician practice.

### Technical Reimbursement

Billable services provided in a facility setting including but not limited to a laboratory test, x-rays, evaluation and management services, procedures, and any other non-professional (Providers) services. Reimbursement is made to the facility/hospital.

### Global Reimbursement

A reimbursement methodology under which one bill is generated to represent both the professional and technical services. The service is billed and reimbursed at a global rate that includes one global payment for the professional and technical components. Typically, all reimbursements go to the physician practice, unless the physicians are employed by the facility/hospital.

### “Split billing” or “Facility-Based” or “Hospital-Based”

The facility/hospital incurs costs associated with employing the physicians (e.g. rental expense, operating cost) and in turn receives technical component reimbursement for services conducted by the physicians in the facility/hospital setting.

The physicians are paid at the professional fee rate consistent with facility/hospital based RVU's.

The technical component and the professional component associated with each service are billed separately.

### **“Global” or “Non-Facility” or “Private Practice”**

A service is billed and reimbursed at a global rate that includes one global payment for both the professional and technical components. The combined payment is designed to compensate physicians operating in a private practice and covers overhead and technical expenses associated with operating the practice.

One bill is generated which combines the professional and technical components. No additional payments will be made to facilities under this payment methodology.

### **Notification/Prior Authorization Requests**

MVP Payment Policies are not a guarantee of payment. Providers must also review MVP’s Utilization Management Guides to determine if prior authorization is required and can refer to the searchable PDF versions of Medical, Pharmacy and other Provider and Payment policies for guidelines. The current policies can be found [here](#).

### **Billing/Coding Guidelines**

#### **General Guidelines**

Provider claims would be generated with a facility place of service instead of a non-facility place of service, such as office. For example, a physician claim would be submitted with a place of service 22 for outpatient location instead of place of service 11 for office.

Procedure codes on the MVP In-Office Only list are not reimbursed under a split billing arrangement regardless of product unless an authorization is obtained. If an authorization is obtained, reimbursement may be allowed for Medicare and Medicaid products.

## MVP Health Care Payment Policy

---

# Audiology Services

Last Reviewed Date : February 1, 2025

## AUDIOLOGY SERVICES

Policy

Definitions

Notification/Prior Authorization Requests

Billing/Coding Guidelines

References

History

---

## Policy

Audiology is the prevention, identification, and evaluation of hearing disorders; the selection and evaluation of hearing aids; and the rehabilitation of individuals with hearing impairment. Audiological services, including function tests, are performed to provide medical diagnosis and treatment of the auditory system.

## Definitions

Audiological diagnostic testing refers to tests of the audiological and vestibular systems, including hearing, balance, auditory processing, tinnitus, and diagnostic programming of certain prosthetic devices, performed by qualified audiologists.

## Notification/Prior Authorization Requests

MVP Payment Policies are not a guarantee of payment. Providers must also review MVP's Utilization Management Guides to determine if prior authorization is required and can refer to the searchable PDF versions of Medical, Pharmacy and other Provider and Payment policies for guidelines. The current policies can be found [here](#).

## Billing/Coding Guidelines

MVP reimburses in accordance with CMS guidelines.

Audiologists may not bill using Evaluation and Management (E&M) CPT codes 99201 – 99499.

Audiologists may not bill removal of impacted cerumen (separate procedure, one or both ears) under CPT codes 69209 and 69210. Cerumen removal is included in the relative value for each diagnostic test. If a Provider is needed to remove impacted cerumen on the same day as a diagnostic test, the Provider bills code G0268.

The reimbursement for hearing aids includes the initial evaluation and all follow-up tests and adjustments, which may be required to properly fit the hearing aids.

Audiometric test codes assume that both ears are tested. If only one ear is tested, modifier 52 should be billed to indicate less than the normal procedure.

## Examples for Ordering Audiological Testing

Examples of appropriate reasons for ordering audiological diagnostic tests include, but are not limited to:

- Evaluation of suspected change in hearing, tinnitus, or balance
- Evaluation of the cause of disorders of hearing, tinnitus, or balance
- Determination of the effect of medication, surgery, or other treatment
- Re-evaluation to follow-up changes in hearing, tinnitus, or balance that may be caused by established diagnoses that place the patient at probable risk for a change in status including, but not limited to otosclerosis, atelectatic tympanic membrane, tympanosclerosis, cholesteatoma, resolving middle ear infection, Menière's disease, sudden idiopathic sensorineural hearing loss, autoimmune inner ear disease, acoustic neuroma, demyelinating diseases, ototoxicity secondary to medications, or genetic vascular and viral conditions
- Failure of a screening test
- Diagnostic analysis of cochlear or brainstem implant and programming
- Audiology diagnostic tests before and periodically after implantation of auditory prosthetic devices

Audiologists can furnish certain diagnostic audiology tests without a physician or non-physician practitioner (NPP) order using the AB modifier:

- Covered once per patient per 12-month period
- Limited to non-acute hearing conditions
- Excludes services related to:
  - Disequilibrium
    - Hearing aids
    - Exams for prescribing, fitting, or changing hearing aids

## Designation of Time

The CPT procedures for audiology do not include time designations except for the five codes listed below. If the CPT descriptor has no time designation; the procedure is billed as a session without regard to time.

When calculating time attributed to the audiology evaluation codes activities such as counseling, establishment of interventional goals, or evaluating potential for remediation not included as diagnostic tests, the time spent on these activities should not be included in billing for:

- 92620 (evaluation of central auditory function, with report; initial 60 minutes)
- 92621 (evaluation of central auditory function, with report; each additional 15 minutes)
- 92626 (evaluation of auditory rehabilitation status; first hour)
- 92627 (evaluation of auditory rehabilitation status; each additional 15 minutes)
- 92640 (diagnostic analysis with programming of auditory brainstem implant, per hour).
- 92622 - Diagnostic analysis, programming, and verification of an auditory osseointegrated sound processor, any type; first 60 minutes
- 92623 - Diagnostic analysis, programming, and verification of an auditory osseointegrated sound processor, any type; each additional 15 minutes (List separately in addition to code for primary procedure)

Note: A timed code is billed only if testing is at least 51 percent of the time designated in the code's descriptor.

## 15 Minute Codes

For CPT codes designated as 15 minutes, multiple coding represents minimum face-to-face treatment, as follows:

|                                     |                                     |
|-------------------------------------|-------------------------------------|
| 1 unit: 8 minutes to < 23 minutes   | 4 units: 53 minutes to < 68 minutes |
| 2 units: 23 minutes to < 38 minutes | 5 units: 68 minutes to < 83 minutes |
| 3 units: 38 minutes to < 53 minutes | 6 units: 83 minutes to < 98 minutes |

## MVP Health Care Payment Policy

---

# Behavioral Health Non-Licensed Provider (Vermont-Only)

Last Reviewed Date – May 1, 2025

### BEHAVIORAL HEALTH NON-LICENSED PROVIDER (VERMONT ONLY)

Policy  
Definitions  
Notifications/Prior Authorization  
Billing/Coding Guidelines  
Reimbursement Guidelines  
References  
History

---

## Policy

In Vermont, reimbursement for services provided by a Qualified Non-Licensed Psychotherapist can be billed and reimbursed when under the direct supervision of a Qualified Licensed Psychotherapist.

## Definitions

**Qualified Licensed Practitioner:** A Provider who is licensed and credentialed by MVP and is acting within the scope of his/her practice.

**Qualified Non-Licensed Practitioner:** A Provider that is actively working towards licensure as specified by his or her profession.

**Supervised Billing:** A Qualified Licensed Practitioner can bill for covered clinical services within his or her scope of practice provided by a Qualified Non-Licensed Practitioner when the Qualified Non-Licensed Practitioner is under the direct supervision of the Qualified Licensed Practitioner.

## Notifications/Prior Authorization Requests

MVP Payment Policies are not a guarantee of payment. Providers must also review MVP's Utilization Management Guides to determine if prior authorization is required and can refer to the searchable PDF versions of Medical, Pharmacy and other Provider and Payment policies for guidelines. The current policies can be found [here](#).

## Billing/Coding Guidelines

Eligible supervised billing claims for Qualified Non-Licensed Practitioners registered on the roster of Non-Licensed & Non-Certified Psychotherapists per VT state statute should be billed to MVP as follows:

- In Box 24j of the CMS 1500 form, list the NPI and taxonomy code of the supervising licensed clinician appropriate to the degree of the unlicensed provider
- In Box 31 of the CMS 1500 form, list the name and degree/title of the supervising provider
  - The supervising clinician must be a licensed practitioner with the same degree level (i.e., Masters or Doctorate) as the unlicensed clinician

One of the following modifiers must be appended to the billed CPT code(s):

| Modifier | Modifier              | Modifier                                                                                                                                               |
|----------|-----------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------|
| HO       | Master's degree level | This is required when the claim is for supervised billing when the eligible unlicensed practitioner rendering the service is a Master's degree level.  |
| HP       | Doctorate level       | This is required when the claim is for supervised billing when the eligible unlicensed practitioner rendering the service is a Doctorate degree level. |

## Reimbursement Guidelines

### Non-Reimbursable Services

- Services performed by a non-licensed provider who cannot practice independently and is not actively working toward licensure.
- MVP Medicare Members are not eligible to receive services performed by a non-licensed provider even under the supervision of a licensed provider.

# Consistency of Denials

Last Reviewed Date: February 1, 2025

## CONSISTENCY OF DENIALS

Policy

Notifications/Prior Authorization Requests

History

---

## Policy

MVP requires authorizations for select services as identified in MVP's Utilization Management Guides. When an authorization is required, this authorization applies to all Technical, Professional, Global, and/or Facility claims submitted for the service. If service(s) requiring an authorization are provided without prior approval, then all Technical, Professional, Global, and/or Facility claims associated with those services will be denied administratively.

- MVP will apply this administrative denial to Outpatient Surgical Services
- MVP will apply this administrative denial to the Radiology code set as defined in the MVP Radiology Payment Policy

## Notification/Prior Authorization Requests

MVP Payment Policies are not a guarantee of payment. Providers must also review MVP's Utilization Management Guides to determine if prior authorization is required and can refer to the searchable PDF versions of Medical, Pharmacy and other Provider and Payment policies for guidelines. The current policies can be found [here](#).

# Contrast Materials

Effective Date: October 1, 2025

## CONTRAST MATERIALS

Policy  
Definitions  
Notification/Prior Authorization Requests  
Billing/Coding Guidelines  
History

## Policy

The cost of ionic contrast is included in the fee paid for Computed Tomography (commonly referred to as "CT scan") and other contrast enhanced exams. No additional charges for contrast materials will be reimbursed. MVP will deny claims for contrast materials for Commercial, Exchange, and Medicaid products.

## Notification/Prior Authorization Requests

MVP Payment Policies are not a guarantee of payment. Providers must also review MVP's Utilization Management Guides to determine if prior authorization is required and can refer to the searchable PDF versions of Medical, Pharmacy and other Provider and Payment policies for guidelines. The current policies can be found [here](#).

## Billing/Coding Guidelines

Providers will not be reimbursed separately for contrast material for the codes listed below. This applies to all Participating Providers (physicians, hospitals, and other facilities) for all MVP Commercial, Exchange, and Medicaid products:

### HCPCS Code: Gadolinium

**A9579** Injection, gadolinium-based magnetic resonance contrast agent, not otherwise specified (NOS), per ml

### HCPCS Code: Non-Ionic, Low Osmolar Contrast

**Q9951** Low osmolar contrast material, 400 or greater mg/ml iodine concentration, per ml

**Q9965** Low osmolar contrast material, 100-199 mg/ml iodine concentration, per ml

**Q9966** Low osmolar contrast material, 200-299 mg/ml iodine concentration, per ml

**Q9967** Low osmolar contrast material, 300-399 mg/ml iodine concentration, per ml

### HCPCS Code: Non-Ionic, Low Osmolar Contrast

**Q9958** High osmolar contrast material, up to 149 mg/ml iodine concentration, per ml

**Q9959** High osmolar contrast material, 150-199 mg/ml iodine concentration, per ml

|              |                                                                                   |
|--------------|-----------------------------------------------------------------------------------|
| <b>Q9960</b> | High osmolar contrast material, 200-249 mg/ml iodine concentration, per ml        |
| <b>Q9961</b> | High osmolar contrast material, 250-299 mg/ml iodine concentration, per ml        |
| <b>Q9962</b> | High osmolar contrast material, 300-349 mg/ml iodine concentration, per ml        |
| <b>Q9963</b> | High osmolar contrast material, 350-399 mg/ml iodine concentration, per ml        |
| <b>Q9964</b> | High osmolar contrast material, 400 or greater mg/ml iodine concentration, per ml |

# Default Pricing

Last Reviewed Date: February 1, 2025

## DEFAULT PRICING

Policy  
Notifications/Prior Authorization Requests  
Reimbursement Guidelines  
History

---

## Policy

When a reimbursement rate has not been assigned by MVP, by the parties' executed contract, by Centers for Medicare and Medicaid Services (CMS), or by NYS Medicaid, one will be established based upon a gap pricing method that is an acceptable industry standard. If there is not an accepted industry standard, MVP will reimburse according to default pricing based upon a percentage of billed charges ("Default Pricing"). If a code does not have an assigned rate, the default rate will be applied.

## Notification/Prior Authorization Requests

MVP Payment Policies are not a guarantee of payment. Providers must also review MVP's Utilization Management Guides to determine if prior authorization is required and can refer to the searchable PDF versions of Medical, Pharmacy and other Provider and Payment policies for guidelines. The current policies can be found [here](#).

## Reimbursement Guidelines

Under Default Pricing, MVP will pay up to 30% of billed charges unless otherwise provided for in the parties executed contract or assigned by CMS or NYS Medicaid.

# Diabetic Management and Nutritional Counseling

## DIABETIC MANAGEMENT AND NUTRITIONAL COUNSELING

Policy  
Definitions  
Notification/Prior Authorization Requests  
Billing/Coding Guidelines  
Reimbursement Guidelines  
References  
Summary  
History

---

## Policy

### Diabetic Management

Diabetic Management encompasses education and management as medically necessary for the diagnosis and treatment of diabetes, including Type I or Type II, gestational, and/or insulin or non-insulin dependent diabetes.

Diabetic self-management education is considered medically necessary when the Member has a diagnosis of diabetes and management services have been prescribed by a physician or qualified non-physician practitioner. These services must be provided by a licensed health care professional (e.g., registered dietician, registered nurse, or other health professional) who is a certified diabetes educator (CDE).

### Nutritional Counseling

Nutritional Counseling is reimbursable when medically necessary for chronic diseases in which dietary adjustment has a therapeutic role. Nutritional counseling must be prescribed by a physician or qualified non-physician practitioner and furnished by a Provider (e.g., licensed nutritionist, registered dietician, or other qualified licensed health professionals such as nurses who are trained in nutrition) recognized under the plan.

## Definitions

### Diabetic Management

Diabetes self-management education (DSME) is the process through which persons with or at risk for diabetes develop and use the knowledge and skill required to reach their self-defined diabetes goals (American Association of Diabetes Educators [AADE], 2008.) The national standards for DSME state that DSME is an interactive, collaborative, ongoing process that involves the person with diabetes and the educator (Funnell, et. Al., 2011). An individual with diabetes needs the knowledge and skills to make informed choices, to facilitate self-directed behavior changes, and, ultimately, to reduce the risk of complications. Documentation should include:

- Assessment of the individual's specific education needs
- The individual's specific diabetes self-management goals
- Education and behavioral intervention directed toward helping the individual achieve identified self-management goals
- Evaluation of the individual's attainment of identified self-management goals

## Nutritional Counseling

Medical nutrition therapy provided by a registered dietitian involves the assessment of the person's overall nutritional status, followed by the assignment of individualized diet, counseling, and/or specialized nutrition therapies to treat a chronic illness or condition.

## Notification/Prior Authorization Requests

MVP Payment Policies are not a guarantee of payment. Providers must also review MVP's Utilization Management Guides to determine if prior authorization is required and can refer to the searchable PDF versions of Medical, Pharmacy and other Provider and Payment policies for guidelines. The current policies can be found [here](#).

## Billing/Coding Guidelines

### General Guidelines

Services rendered by a nutritionist, dietician, or certified diabetes educator must be billed under their individual Provider number.

### Diabetic Management

For Diabetic Management the following CPT/HCPCS codes are considered reimbursable:

|       |                                                                                                  |
|-------|--------------------------------------------------------------------------------------------------|
| G0108 | Diabetes outpatient self-management training services, individual, per 30 minutes                |
| G0109 | Diabetes outpatient self-management training services, group session (2 or more), per 30 minutes |

Diabetic Management for codes G0108 and G0109 is limited to the following diagnoses for Medicare MSA plans only. All other Plans will reimburse ICD-10 in range E08-E09:

|           |                                                                                                                                                                |
|-----------|----------------------------------------------------------------------------------------------------------------------------------------------------------------|
| ICD-10 CM | CMS reserves the right to add or remove codes associated with its NCDs to implement those NCDs in the most efficient manner within the confines of the policy. |
| E08.00    | Diabetes mellitus due to underlying condition with hyperosmolarity without nonketotic hyperglycemic-hyperosmolar coma (NKHHC)                                  |
| E08.21    | Diabetes mellitus due to underlying condition with diabetic nephropathy                                                                                        |
| E08.22    | Diabetes mellitus due to underlying condition with diabetic chronic kidney disease                                                                             |
| E08.29    | Diabetes mellitus due to underlying condition with other diabetic kidney complication                                                                          |
| E08.311   | Diabetes mellitus due to underlying condition with unspecified diabetic retinopathy with macular edema                                                         |
| E08.319   | Diabetes mellitus due to underlying condition with unspecified diabetic retinopathy without macular edema                                                      |
| E08.3211  | Diabetes mellitus due to underlying condition with mild nonproliferative diabetic retinopathy with macular edema, right eye                                    |
| E08.3212  | Diabetes mellitus due to underlying condition with mild nonproliferative diabetic retinopathy with macular edema, left eye                                     |
| E08.3213  | Diabetes mellitus due to underlying condition with mild nonproliferative diabetic retinopathy with macular edema, bilateral                                    |
| E08.3291  | Diabetes mellitus due to underlying condition with mild nonproliferative diabetic retinopathy without macular edema, right eye                                 |
| E08.3292  | Diabetes mellitus due to underlying condition with mild nonproliferative diabetic retinopathy without macular edema, left eye                                  |
| E08.3293  | Diabetes mellitus due to underlying condition with mild nonproliferative diabetic retinopathy without macular edema, bilateral                                 |
| E08.3311  | Diabetes mellitus due to underlying condition with moderate nonproliferative diabetic retinopathy with macular                                                 |

|          |                                                                                                                                                                                  |
|----------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|          | edema, right eye                                                                                                                                                                 |
| E08.3312 | Diabetes mellitus due to underlying condition with moderate nonproliferative diabetic retinopathy with macular edema, left eye                                                   |
| E08.3313 | Diabetes mellitus due to underlying condition with moderate nonproliferative diabetic retinopathy with macular edema, bilateral                                                  |
| E08.3391 | Diabetes mellitus due to underlying condition with moderate nonproliferative diabetic retinopathy without macular edema, right eye                                               |

| E13.3551 | Other specified Diabetes mellitus with stable proliferative diabetic retinopathy, right eye                                                                          |
| E13.3552 | Other specified Diabetes mellitus with stable proliferative diabetic retinopathy, left eye                                                                           |
| E13.3553 | Other specified Diabetes mellitus with stable proliferative diabetic retinopathy, bilateral                                                                          |
| E13.3591 | Other specified Diabetes mellitus with proliferative diabetic retinopathy without macular edema, right eye                                                           |
| E13.3592 | Other specified Diabetes mellitus with proliferative diabetic retinopathy without macular edema, left eye                                                            |
| E13.3593 | Other specified Diabetes mellitus with proliferative diabetic retinopathy without macular edema, bilateral                                                           |
| E13.36   | Other specified Diabetes mellitus with diabetic cataract                                                                                                             |
| E13.37X1 | Other specified Diabetes mellitus with diabetic macular edema, resolved following treatment, right eye                                                               |
| E13.37X2 | Other specified Diabetes mellitus with diabetic macular edema, resolved following treatment, left eye                                                                |
| E13.37X3 | Other specified Diabetes mellitus with diabetic macular edema, resolved following treatment, bilateral                                                               |
| E13.39   | Other specified Diabetes mellitus with other diabetic ophthalmic complication                                                                                        |
| E13.40   | Other specified Diabetes mellitus with diabetic neuropathy, unspecified                                                                                              |
| E13.41   | Other specified Diabetes mellitus with diabetic mononeuropathy                                                                                                       |
| E13.42   | Other specified Diabetes mellitus with diabetic polyneuropathy                                                                                                       |
| E13.43   | Other specified Diabetes mellitus with diabetic autonomic (poly)neuropathy                                                                                           |
| E13.44   | Other specified Diabetes mellitus with diabetic amyotrophy                                                                                                           |
| E13.49   | Other specified Diabetes mellitus with other diabetic neurological complication                                                                                      |
| E13.51   | Other specified Diabetes mellitus with diabetic peripheral angiopathy without gangrene                                                                               |
| E13.52   | Other specified Diabetes mellitus with diabetic peripheral angiopathy with gangrene                                                                                  |
| E13.59   | Other specified Diabetes mellitus with other circulatory complications                                                                                               |
| E13.610  | Other specified Diabetes mellitus with diabetic neuropathic arthropathy                                                                                              |
| E13.618  | Other specified Diabetes mellitus with other diabetic arthropathy                                                                                                    |
| E13.620  | Other specified Diabetes mellitus with diabetic dermatitis                                                                                                           |
| E13.621  | Other specified Diabetes mellitus with foot ulcer                                                                                                                    |
| E13.622  | Other specified Diabetes mellitus with other skin ulcer                                                                                                              |
| E13.628  | Other specified Diabetes mellitus with other skin complications                                                                                                      |
| E13.630  | Other specified Diabetes mellitus with periodontal disease                                                                                                           |
| E13.638  | Other specified Diabetes mellitus with other oral complications                                                                                                      |
| E13.649  | Other specified Diabetes mellitus with hypoglycemia without coma                                                                                                     |
| E13.65   | Other specified Diabetes mellitus with hyperglycemia                                                                                                                 |
| E13.69   | Other specified Diabetes mellitus with other specified complication                                                                                                  |
| E13.8    | Other specified Diabetes mellitus with unspecified complications                                                                                                     |
| E13.9    | Other specified Diabetes mellitus without complications                                                                                                              |
| O24.011  | Pre-existing type 1 Diabetes mellitus, in pregnancy, first trimester                                                                                                 |
| O24.012  | Pre-existing type 1 Diabetes mellitus, in pregnancy, second trimester                                                                                                |
| O24.013  | Pre-existing type 1 Diabetes mellitus, in pregnancy, third trimester                                                                                                 |
| O24.03   | Pre-existing type 1 Diabetes mellitus, in the puerperium                                                                                                             |
| O24.111  | Pre-existing type 2 Diabetes mellitus, in pregnancy, first trimester                                                                                                 |
| O24.112  | Pre-existing type 2 Diabetes mellitus, in pregnancy, second trimester                                                                                                |
| O24.113  | Pre-existing type 2 Diabetes mellitus, in pregnancy, third trimester                                                                                                 |
| O24.13   | Pre-existing type 2 Diabetes mellitus, in the puerperium                                                                                                             |
| O24.410  | Gestational Diabetes mellitus in pregnancy, diet controlled                                                                                                          |
| O24.414  | Gestational Diabetes mellitus in pregnancy, insulin controlled                                                                                                       |
| O24.415  | Gestational Diabetes mellitus in pregnancy, controlled by oral hypoglycemic drugs                                                                                    |
| O24.419  | Gestational Diabetes mellitus in pregnancy, unspecified control                                                                                                      |
| O24.420  | Gestational Diabetes mellitus in childbirth, diet controlled                                                                                                         |

|         |                                                                                    |
|---------|------------------------------------------------------------------------------------|
| O24.424 | Gestational Diabetes mellitus in childbirth, insulin controlled                    |
| O24.425 | Gestational Diabetes mellitus in childbirth, controlled by oral hypoglycemic drugs |
| O24.429 | Gestational Diabetes mellitus in childbirth, unspecified control                   |
| O24.430 | Gestational Diabetes mellitus in the puerperium, diet controlled                   |
| O24.434 | Gestational Diabetes mellitus in the puerperium, insulin controlled                |
| O24.435 | Gestational Diabetes mellitus in puerperium, controlled by oral hypoglycemic drugs |
| O24.439 | Gestational Diabetes mellitus in the puerperium, unspecified control               |
| O24.811 | Other pre-existing Diabetes mellitus in pregnancy, first trimester                 |
| O24.812 | Other pre-existing Diabetes mellitus in pregnancy, second trimester                |
| O24.813 | Other pre-existing Diabetes mellitus in pregnancy, third trimester                 |
| O24.83  | Other pre-existing Diabetes mellitus in the puerperium                             |

## Nutritional Counseling

For Nutritional Counseling, the following CPT/HCPCS codes are considered reimbursable:

|       |                                                                                                                                                                                                                                                                                                    |
|-------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 97802 | Medical nutritional therapy; initial assessment and intervention, individual, face-to-face with the patient, each 15 minutes                                                                                                                                                                       |
| 97803 | Re-assessment and intervention, individual, face-to-face with the patient, each 15 minutes                                                                                                                                                                                                         |
| 97804 | Group (2 or more individuals(s)), each 30 minutes                                                                                                                                                                                                                                                  |
| G0270 | Medical nutritional therapy; re-assessment and subsequent intervention(s) following second referral in same year for change in diagnosis, medical condition or treatment regimen (including additional hours needed for renal disease), individual, face-to-face with the patient, each 15 minutes |
| G0271 | Medical nutritional therapy; re-assessment and subsequent interventions(s) following second referral in the same year for change in diagnosis, medical condition, or treatment regimen (including additional hours needed for renal disease), group, (2 or more individuals), each 30 minutes      |

Nutritional Counseling for codes 97802-97804, G0270-G0271 is limited to the following diagnoses for Medicare MSA plans only. All other plans have no diagnosis code restrictions:

|           |                                                                                                                                                                          |
|-----------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| ICD-10 CM | CMS reserves the right to add or remove diagnosis codes associated with its NCDs to implement those NCDs in the most efficient manner within the confines of the policy. |
| E08.00    | Diabetes mellitus due to underlying condition with hyperosmolarity without nonketotic hyperglycemic-hyperosmolar coma (NKHHC)                                            |
| E08.01    | Diabetes mellitus due to underlying condition with hyperosmolarity with coma                                                                                             |
| E08.10    | Diabetes mellitus due to underlying condition with ketoacidosis without coma                                                                                             |
| E08.11    | Diabetes mellitus due to underlying condition with ketoacidosis with coma                                                                                                |
| E08.22    | Diabetes mellitus due to underlying condition with diabetic chronic kidney disease                                                                                       |
| E08.29    | Diabetes mellitus due to underlying condition with other diabetic kidney complication                                                                                    |
| E08.3211  | Diabetes mellitus due to underlying condition with mild nonproliferative diabetic retinopathy with macular edema, right eye                                              |

# Diagnosis Matching Edits

Effective Date: October 1, 2025

## DIAGNOSIS MATCHING EDITS

- Policy
- Definitions
- Notification/Prior Authorization Requests
- Billing/Coding Guidelines
- References
- History

## Policy

MVP follows the diagnosis matching edits in accordance with Medicare Local Coverage Determinations (LCD) or National Coverage Determinations (NCD), in addition to guidelines established by Physician Medical Societies for the procedures listed in the policy. This policy applies to all lines of business and all claims including, but not limited to, physicians, hospitals, and ambulatory surgery centers. For more information on Medicare coverage determinations, please visit the Center for Medicare & Medicaid services (CMS) website at [cms.gov](https://www.cms.gov).

## Definitions

### Medical Necessity (CMS Medicare's definition)

Medical necessity is the overarching criterion for payment in addition to the individual documentation requirements of a CPT code. It would not be medically necessary or appropriate to bill a higher level of evaluation and management service when a lower level of service is warranted. The volume of documentation should not be the primary influence upon which a specific level of service is billed. Documentation should support the level of service being reported.

## Notification/Prior Authorization Requests

MVP Payment Policies are not a guarantee of payment. Providers must also review MVP's Utilization Management Guides to determine if prior authorization is required and can refer to the searchable PDF versions of Medical, Pharmacy and other Provider and Payment policies for guidelines. The current policies can be found [here](#).

## Billing/Coding Guidelines

### Transthoracic Echocardiography

To access the appropriate diagnoses to be used with these Procedure codes, use Document ID #L33577 – Contract # 13282 or Article A56781 on the CMS website.

| Code                                | Description                                                              | Rule                                                                                                                                                                                                                                                                                                                           |

## Policy

The Durable Medical Equipment (DME) and Orthotics & Prosthetics Coverage and Purchasing Guidelines apply to all MVP participating DME, Orthotics, prosthetics, and specialty Providers only. Physicians, podiatrists, physical therapists, and occupational therapists must refer to the utilization management section of the MVP Provider Policies for Durable Medical Equipment Prosthetic Orthotic Services (DMEPOS) information and guidelines.

## DME Rental vs. Purchase

MVP reimburses Providers for DME for a limited time when all required medical necessity guidelines are met. Claims for DME rental must be for the time the equipment is used by the Member, but not to exceed the maximum allowed rental period for the equipment. For authorized items that have a rental price, MVP will calculate the purchase price on either 10- or 13-months rental according to Medicare payment categories. Monthly rentals cannot exceed capped rental period of 10- or 13-months of continuous use. At that time (end of 10- or 13-month rental) ownership of the equipment passes to the Member.

Equipment may be purchased or rented at MVP's discretion. Purchase or rental would be specified in the prior authorization approval if the item requires prior authorization. MVP does not authorize used equipment for purchase.

DME rental fees will cover the cost of maintenance, repairs, replacement, supplies and accessories during the rental. Equipment delivery services and set-up, education and training for patient and family, and nursing visits, are not eligible for separate reimbursement.

MVP will only pay for the remainder of the capped consecutive rental period when the rental started under a previous insurer or previous plan and the item is medically necessary. If prior authorization is required for the item, then the DME Provider would need to indicate the start date and how many months were rented under the previous insurer or previous plan.

Providers are responsible to honor all manufacturers' warranties. MVP will reimburse for one month's rental fee for temporary equipment while patient-owned equipment is being repaired if the repair is going to take longer than one day. Temporary equipment rentals should use HCPCS code K0462. Labor and parts will be reimbursed based on a Provider's contracted rate with MVP.

Providers may NOT require Members to pay "up front" for items or services except for the Members copay, coinsurance, deductibles, or items that are not covered under the Member's benefits.

MVP follows Medicare Payment Guidelines related to Durable Medical Equipment. If MVP has implemented exceptions from Medicare they are indicated in this payment policy.

- Payment Guidelines for some DME as indicated in this document
- MVP follows the Pricing, Data, Analysis and Coding (PDAC) Contractor for assignment of HCPCS codes, payment categories and product classification: [palmettogba.com/pdac\\_dmecs](http://palmettogba.com/pdac_dmecs)
- MVP does not cover spare or back-up equipment. Claims for backup equipment will be denied as not medically necessary
- This policy relates to the payment of DME items and equipment only; please refer to MVP Medical Policy to review the medical necessity criteria

Note: Providers looking for MVP's payment policy on Enteral Nutrition Therapy should refer to MVP's Home Infusion Policy.

## Definitions

DME is defined as:

- An item for external use that can withstand repeated use
- An item that can be used in the home
- Is reasonable and necessary to sustain a minimum threshold of independent daily living
- Is made primarily to serve a medical purpose
- Is not useful in the absence of illness or injury
- DME includes, but is not limited to, medical supplies, orthotics & prosthetics, custom braces, respiratory equipment, and other qualifying items when acquired from a contracted DME Provider

## Home

For purposes of rental and purchase of DME, a Member's home may be his/her own dwelling, an apartment, a relative's home, a home for the aged, or some other type of institution (such as assisted living facility, or an intermediate care facility for the mentally disabled).

However, an institution may not be considered a Member's home if it:

- Meets at least the basic requirement in the definition of a hospital
- Meets at least the basic requirement in the definition of a skilled nursing facility, i.e., it is primarily engaged in providing to inpatients skilled nursing care and related services for patients who require medical or nursing care, or rehabilitation services

Thus, if an individual is a patient in an institution or distinct part of an institution which provides the services described above, the individual is not entitled to have separate payment made for rental or purchase of DME. This is because such an institution may not be considered the individual's home.

### HCPCS Modifiers: MVP requires the use of the following Medicare modifiers:

| Code | Description             | Rules                                                                                                                                     |
|------|-------------------------|-------------------------------------------------------------------------------------------------------------------------------------------|
| NU   | Purchased/new equipment | • Submit with HCPCS DME code to indicate a purchase                                                                                       |
| RR   | Rental use              | • Submit with HCPCS DME code to indicate a rental                                                                                         |
| RT   | Right Side              | • Submit with HCPCS DME procedure code to indicate item ordered for right side                                                            |
| LT   | Left Side               | • Submit with HCPCS DME procedure code to indicate item ordered for left side                                                             |
| UE   | Used Equipment          | • MVP does not generally reimburse for used equipment; this may require specific prior approval according to the Prior Authorization List |
| AU   | Item furnished in       | • Submit with HCPCS DME procedure codes                                                                                                   |

| Code | Description                                                                    | Rules                                                                                                                 |
|------|--------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------|
|      | conjunction with a urological, ostomy, or tracheostomy supply                  |                                                                                                                       |
| AV   | Item furnished in conjunction with a prosthetic device, prosthetic or orthotic | • Submit with HCPCS DME procedure codes                                                                               |
| AW   | Item furnished in conjunction with a surgical dressing                         | • Submit with HCPCS DME procedure codes                                                                               |
| RA   | Replacement of a DME, orthotic or prosthetic item                              | • Use when an item is furnished as a replacement for the same item which has been lost, stolen or irreparably damaged |
| RB   | Replacement of a part of DME furnished as part of a repair                     | • Use to denote the replacement of a part of a DMEPOS item furnished as part of the service of repairing the item     |

## Referral/Notification/Prior Authorization Requests

Depending on the Member's individual plan and coverage, some items and/or services may or may not be covered. It is imperative that Providers verify Member eligibility and benefits before requesting or providing services. To determine if a Member has coverage for specific DME equipment, please call the MVP Customer Care Center.

Please refer to the "DME Prior Authorization Code List" to determine if an authorization is required. Only DMEPOS items and services requiring prior authorization are listed on the "DME Prior Authorization Code List." Note: The "DME Prior Authorization Code List" does not guarantee payment. Log onto [mvphealthcare.com](http://mvphealthcare.com) or call the MVP Customer Care Center to review the list.

The list is updated periodically and is located on the MVP website in the Provider section, under Reference Library.

Important information for Items and/or services requiring prior authorization:

- Complete the Prior Authorization Request Form for DME/O&P Items and Services (PARF) located at: <https://www.mvphealthcare.com/providers/forms>
- Can be submitted online, faxed to **1-888-452-5947** or emailed to [authorizationrequest@mvphealthcare.com](mailto:authorizationrequest@mvphealthcare.com) unless otherwise noted below.
- Be sure to include all appropriate and pertinent medical documentation (e.g., office notes, lab, and radiology reports) with the completed PARF.
- Phone requests will only be taken for urgent care determinations and hospital discharges. Call **1-800-684-9286**
- If MVP is the secondary plan, all medical necessity rules still apply to DME items/services for all MVP products.
- If prior authorization is not obtained for the required medically necessary items/services, the Member may not be billed by the Provider. MVP does not "backdate" authorizations for items where prior authorization was not obtained.

## Repairs to DME

- Repairs are covered for medically necessary equipment regardless of who is performing the repair. The repair does not have to be completed by the original Provider
- Repair claims must include narrative information itemizing:
  - The nature for which the repair was required

- The actual / anticipated time each repair will take
- Date of purchase (month/year)
- Product name
- Make/model
- Manufacturer's suggested retail price (MSRP) is kept on file, and you would bill according to your contract with MVP
- For common repairs, MVP follows the allowed units of service published by [Medicare](#). Code K0739 should be billed with one unit of service for each 15 minutes. Suppliers are not paid for travel time, equipment pickup and/or delivery, or postage.

Code E1399 may be used for any replacement part(s) without a specific HCPCS code.

## Replacement DME

Replacement requests and claims for DME must include the following:

- The description of the owned equipment that is being replaced
- The HCPCS code of the original piece of equipment
- The date of purchase of the original piece of equipment
- Reason for replacement
- New order from physician

Repair or replacement of durable medical equipment which becomes unusable or nonfunctioning because of individual misuse, abuse, or neglect is not covered under MVP contracts.

Replacement of DME due to manufacturer recall are the responsibility of the manufacturer. Replacement of DME only due to changes in technology without improved outcomes are not medically necessary and will result in claims denials.

## Delivery Charges

Delivery charges, including shipping and handling, are considered part of the purchase or rental costs. Providers may not bill MVP or the Member for these charges. Providers may not bill MVP or the Member if a wrong item is delivered and needs to be exchanged or returned.

## Retrospective Audits

MVP conducts random audits retrospectively to ensure MVP guidelines are being met for medical necessity and claims are processed according to the MVP contract.

## Billing/Coding Guidelines

| Code           | Description                                               | Rules                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

Please refer to the Member's benefits to determine if these are covered</li> </ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

## Medical Supplies

### Medicaid Managed Care and HARP plans

As of April 1, 2023, Providers are no longer able to bill MVP Medicaid Managed Care Plan or HARP Members for pharmacy and pharmacy related DME and supplies. This includes certain DME, enteral and parenteral nutrition, family planning supplies, medical/surgical supplies, miscellaneous supplies, and hearing aid batteries as designated by the New York State Department of Health in the New York State Medicaid Program Medical Supply Procedure Codes & Coverage Guidelines manual. The full list of codes that must be billed to Medicaid Fee-For-Service is located at: [emedny.org/ProviderManuals/DME/PDFS/MedicalSupply\\_Procedure\\_Codes.pdf](https://www.amedny.org/ProviderManuals/DME/PDFS/MedicalSupply_Procedure_Codes.pdf)

Providers should bill these codes directly to New York State Medicaid Fee-For-Service using the Medicaid Member client identification number (CIN) beginning April 1, 2023. Claims submitted directly to MVP for items that are carved out to Fee-For-Service will be denied as not a Covered Benefit.

### Commercial, Medicare and ASO plans

Required medical/dressing supplies can be obtained by the Member from an MVP-contracted DME Provider with a physician's prescription. MVP will not reimburse for disposable medical and surgical supplies unless Member's contract covers disposable medical supplies. Providers should check the Member's benefits to determine if these are covered under their plan. MVP Medicare products have disposable medical supply benefits and do not require a rider for coverage. DME Providers need to call MVP to determine if item is considered a disposable medical supply.

|-------------------------------------------|--------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| A4361-A4435<br>A5051-A5093<br>A5119-A5200 | Ostomy codes | • MVP does reimburse for these items under the Member's DME benefits; these items do not require the disposable coverage or rider<br>• MVP follows the Medicare guidelines for quantity limits<br>• May be provided from either MVP participating DME or pharmacy Providers<br>• MMC and HARP: Providers must bill New York State Medicaid Fee-for-Service |

Over-limits note: If physician prescription is for more quantity than Medicare guidelines allow for supplies, coverage is allowed if the physician prescription indicates the amount required per month. There is no prior authorization for when Medicare quantity limits are exceeded.

Medicare Ostomy LCD link: <https://www.cms.gov/medicare-coverage-database/view/lcd.aspx?LCDId=33828>

## Incontinence Supplies

- MMC and HARP: Providers must bill New York State Medicaid Fee-for-Service
- The following Incontinence supplies are not reimbursed/not covered for Commercial, ASO and Medicare plans: A4335, A4554, T4521, T4522, T4523, T4524, T4529, T4530, T4533, T4535, T4537, T4539, T4540, T4543

## Orthotics and Prosthetics

There is no separate payment if CAD-CAM or 3-D printing technology is used to fabricate an orthosis or prosthesis. Reimbursement is included in the allowance of the codes for custom fabricated orthoses/prosthetics. Fabrication of an orthosis/prosthetic using CAD/CAM or similar technology without the creation of a positive model with minimal self-adjustment at delivery is considered as off-the-shelf (OTS).

There is no separate allowance for the following (included in orthosis/prosthetic):

- Additional fabrication time of an orthosis/prosthetic
- Consult and evaluation

- Digital scanning and casting
- Fabricating an orthosis/prosthetic
- Fitting of orthosis/prosthetic
- Follow up appointments
- Model modification
- Use of CAD-CAM technology
- X-Ray evaluation

## **Prosthetics**

The following items are included in the reimbursement for a prosthesis and, therefore, are not separately billable to MVP under the prosthetic benefit: evaluation of the residual limb and gait, fitting of the prosthesis, cost of base component parts and labor contained in HCPCS base codes, repairs due to normal wear or tear within 90 days of delivery, adjustments of the prosthesis or the prosthetic component made when fitting the prosthesis or component and for 90 days from the date of delivery when the adjustments are not necessitated by changes in the residual limb or the Member's functional abilities.

Repairs to a prosthesis are covered when necessary to make the prosthesis functional.

Code L7510 is used to bill for any "minor" materials (i.e., those without specific HCPCS codes) used to achieve the adjustment and/or repair.

Code L7520 is used to bill for labor associated with adjustments and repairs that either do not involve replacement parts or that involve replacement parts billed with code L7510. Code L7520 must not be billed for labor time involved in the replacement of parts that are billed with a specific HCPCS code. Labor is included in the allowance for those codes.

Except for items described by specific HCPCS codes, there should be no separate billing and there is no separate payment for a component or feature of a microprocessor-controlled knee or foot, including but not limited to real time gait analysis, continuous gait assessment, or electronically controlled static stance regulator.

Payment for a prosthesis is included in the payment to a hospital if:

- The prosthesis is provided to a Member during an inpatient hospital stay prior to the day of discharge
- The Member uses the prosthesis for reasonable and necessary inpatient treatment or rehabilitation

## **Orthotic and Scoliosis Bracing**

The use of HCPCS code L0999 (addition to spinal orthosis, not otherwise specified) or L1499 (spinal orthosis, not otherwise specified) must not be used to bill for any features or functions included in the base code nor should it be used when a specific L-code exists. Use of these two codes in these circumstances is considered incorrect coding (unbundling).

HCPCS codes L1499 and L0999 should not be used as base codes for a scoliosis orthosis.

There is one HCPCS code available that fully describes the following scoliosis braces: The Rigo Cheneau (WCR) (NYRC) brace, the custom Boston scoliosis brace, the Charleston brace, and the Providence brace are properly described by HCPCS code L1300.

Three HCPCS codes: L1005, L1300, and L1310 are all inclusive and are not billed with addition codes. The use of addition codes with these three codes will be considered incorrect coding (unbundling).

Fee-For-Service ICD-10 Procedure Codes Requiring a Condition

Code when a C-Section or Induction of Labor Occurs

References

History

## Policy

MVP will reduce payment for elective C-Section deliveries and induction of labor under 39 weeks gestation without a documented acceptable medical indication. MVP reimburses 100% for C-sections or inductions performed at less than 39 weeks gestation for medical necessity. MVP reimburses 25% of allowed amount for C-sections or inductions performed at less than 39 weeks gestation electively.

All obstetric deliveries will require the use of a modifier or condition code to identify the gestational age of the fetus as of the date of delivery. Failure to provide a modifier/condition code with the obstetric delivery procedure codes will result in the claim being denied.

## Notification/Prior Authorization Requests

MVP Payment Policies are not a guarantee of payment. Providers must also review MVP's Utilization Management Guides to determine if prior authorization is required and can refer to the searchable PDF versions of Medical, Pharmacy and other Provider and Payment policies for guidelines. The current policies can be found [here](#).

## Billing/Coding Guidelines

### For Provider Claims

All obstetrical deliveries require the use of a modifier (U7, U8, or U9). Failure to include a U7, U8, or U9 modifier, as appropriate, on a claim will result in denial of the claim.

|                                                        |                 |
|--------------------------------------------------------|-----------------|
| U7 – Delivery less than 39 weeks for medical necessity | Full payment    |
| U8 – Delivery less than 39 weeks electively            | Reduced payment |
| U9 – Delivery 39 weeks or greater                      | Full payment    |

### Fee-for-Service Procedure Codes Requiring a Modifier

| CPT Procedure Codes Description | CPT Procedure Codes Description                                                                                                                                      |
|---------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|

| 59510                           | Routine obstetric care including antepartum care, cesarean delivery, and postpartum care                                                                             |
| 59514                           | Cesarean delivery only                                                                                                                                               |
| 59515                           | Cesarean delivery; including postpartum care                                                                                                                         |
| 59610                           | Routine obstetric care including antepartum care, vaginal delivery (with or without episiotomy and/or forceps) and postpartum care, after previous cesarean delivery |
| 59612                           | Vaginal delivery, after previous cesarean delivery (with or without episiotomy and/or forceps)                                                                       |
| 59614                           | Vaginal delivery, after previous cesarean delivery (with or without episiotomy and/or forceps); including postpartum care                                            |
| 59618                           | Routine obstetric care including antepartum care, cesarean delivery, and postpartum care, following attempted vaginal delivery after previous cesarean delivery      |
| 59620                           | Cesarean delivery only, following attempted vaginal delivery after previous cesarean delivery                                                                        |
| 59622                           | Cesarean delivery, following attempted vaginal delivery after previous cesarean delivery                                                                             |

## For Facility Claims

All C-Sections and inductions of labor require the use of a condition code (81, 82, or 83). For all spontaneous labor under 39 weeks gestation resulting in a C-Section delivery, please report condition code 81.

|                                                                                                               |                        |
|---------------------------------------------------------------------------------------------------------------|------------------------|
| Condition code 81 – C-sections or inductions performed at less than 39 weeks gestation for medical necessity. | <b>Full payment</b>    |
| Condition code 82 – C-sections or inductions performed at less than 39 weeks gestation electively.            | <b>Reduced payment</b> |
| Condition code 83 – C-sections or inductions performed at 39 weeks gestation or greater.                      | <b>Full payment</b>    |

Note: For those facilities submitting a Graduate Medical Education (GME) claim to fee-for-service Medicaid, please follow the billing instructions stated under fee-for-service inpatient facility billing guidelines

## Fee-For-Service ICD-10 Procedure Codes Requiring a Condition Code when a C-Section or Induction of Labor Occurs

Note: Augmentation of labor does not require a condition code.

| ICD –10 Procedure | Codes Description                                                                  |
|-------------------|------------------------------------------------------------------------------------|
| 10900ZC           | Drainage of amniotic fluid, therapeutic from products of conception, open approach |
| 10903ZC           | Drainage of amniotic fluid, therapeutic from products of conception, open approach |

# Electronic Visit Verification (EVV)

Last Reviewed Date: February 1, 2025

## Electronic Visit Verification (EVV)

- Policy
- Definitions
- Notification/Prior Authorization Requests
- Services Subject to EVV Requirements
- Reimbursement Guidelines
- Attestation
- References
- History

---

## Policy

In compliance with the federal requirements set forth in the 21<sup>st</sup> Century Cures Act<sup>[1]</sup>, New York (NY) and Vermont (VT) require Electronic Visit Verification (EVV) for certain Medicaid-funded Personal Care Assistants (PCA 1& II), and Consumer Directed Personal Assistants (CDPA), Home Health Care Services, and Home and Community Based Services (HCBS) for children. EVV applicable services for Children's HCBS include Community Habilitation, Planned and Crisis Respite. Providers delivering these services should refer to their state requirements for EVV-applicable procedure/rate codes for services provided in a Member's home, unless an exception applies. EVV data must be submitted directly by NY Providers to eMedNY and/or using Time4Care (applicable to PCA and CDPA only) or by VT providers using EVV Mobile Connect or Touch-Tone Telephone. Although EVV data is not submitted to MVP directly, MVP will require Providers to submit an EVV attestation to demonstrate regulatory compliance and monitor quality of care and payment integrity. This policy applies to Managed Medicaid, CHP, and HARP.

## Definitions

**Electronic Visit Verification (EVV)** is a telephone and computer-based system that verifies when health care services are provided to an eligible Medicaid member by collecting information regarding the person receiving and providing the service, the date and location of the service, the type of service rendered, and the start and end times for the service.

**Fiscal Intermediary (FI)** is an entity that provides fiscal intermediary services for the Consumer Directed Personal Assistance Program (CDPAP).

**Office of the Medicaid Inspector General (OMIG)** is the NYS agency responsible for the auditing and reviewing EVV data against claims data and ensuring through review that providers and FIs subject to EVV are in compliance with the 21st Century Cures Act and NYS requirements.

## Notification/Prior Authorization Requests

MVP Payment Policies are not a guarantee of payment. Providers must also review MVP's Utilization Management Guides to determine if prior authorization is required and can refer to the searchable PDF versions of Medical, Pharmacy and other Provider and Payment policies for guidelines. The current policies can be found [here](#).

## Services Subject to EVV Requirements

MVP follows EVV program guidelines and requirements for managed care as currently published by the New York State Department of Health and the Agency of Human Services, Department of Vermont Health Access (see References). For complete guidelines, EVV applicable services/codes and any updates, please refer to the state publications. New York State guidance is available at:

[https://www.health.ny.gov/health\\_care/medicaid/redesign/evv/repository/app\\_billing\\_codes.htm](https://www.health.ny.gov/health_care/medicaid/redesign/evv/repository/app_billing_codes.htm)

And select:

- Personal Care Services (PCS) Managed Care (MC) EVV Applicable Procedure Codes
- -Home Health Care Services (HHCS) Managed Care (MC) EVV Applicable Procedure Codes

Vermont guidance is available at <https://dvha.vermont.gov/initiatives/electronic-visit-verification>.

Non-compliance with state EVV program requirements may result in a claim(s) denial.

## Reimbursement Guidelines

For EVV applicable services, MVP will reimburse according to the Provider's contract when the CPT/HCPCS codes are reported with an appropriate EVV.

MVP will not reimburse when the required EVV was not utilized unless the Provider has specified a valid exception in the medical record. Exceptions may vary, so please review NYS and VT guidance, accordingly. It is expected that system issues can occur, however it is essential that once these issues are identified, corrective actions are implemented swiftly and documented thoroughly to ensure compliance and facilitate future reimbursements.

If a Provider agency or FI has a high rate of paper time sheets or other non-compliant methods and has not shown an improvement of compliance over time, MVP reserves the right to conduct a compliance review which may lead to the discovery of overpayments. Providers are required to maintain all documentation associated with paper timesheets or other non-compliant entries for audit review.

If non-compliance with state EVV program requirements is determined through audit, MVP has the right to recover payment from the Provider.

## Attestation

As a requirement of the NYS EVV Program, Providers and FIs must sign an EVV attestation which details Provider and FI responsibilities annually. The form can be accessed by visiting [www.emedny.org/evv](http://www.emedny.org/evv).

Non-compliance with state EVV program requirements may result in a claim(s) denial or recovery.

## Emergency Department – Physician

### EMERGENCY DEPARTMENT - PHYSICIAN

Policy  
Definitions  
Notification/Prior Authorization Requests  
Billing/Coding Guidelines  
Resources  
History

---

### Policy

All Emergency Department (ED) services must be coded to the appropriate level of service which supports the extent of review required to adequately evaluate and treat patient problem(s) upon presentation to the ED. Physicians should follow the CPT code book to determine complexity requirements for services provided in the ED. The following billing guidelines are used as a guide for physicians seeing MVP members in the ED. These guidelines do not apply to the ED facility charges or to physicians who are employed by the ED. MVP requires all professional charges be submitted on a CMS1500 claims form.

### Definitions

In New York State, a medical emergency is defined as a medical or behavioral condition, when onset is sudden, that manifests itself by symptoms of sufficient severity, including severe pain, that a prudent layperson, possessing an average knowledge of medicine and health, could reasonably expect the absence of immediate medical attention to result in:

- A. Placing the health of the afflicted person in serious jeopardy, or in the case of a behavioral condition, placing the health of the person or others in serious jeopardy;
- B. Serious impairment to the person's bodily functions;
- C. Serious dysfunction of any bodily organ or part of the person; or
- D. Serious disfigurement of the person.

In Vermont, emergency care is defined as medically necessary covered services to evaluate and treat an emergency medical condition. Further, an "emergency medical condition" means the sudden and, at the time, unexpected onset of an illness or medical condition that manifests itself by symptoms of sufficient severity, including severe pain, that the absence of immediate medical attention could reasonably be expected by the prudent layperson, who possesses an average knowledge of health and medicine, to result in:

- A. Placing the member's physical or mental health in serious jeopardy; or
- B. Serious impairment to bodily functions; or
- C. Serious dysfunction of any bodily organ or part.

### Notification/Prior Authorization Requests

MVP Payment Policies are not a guarantee of payment. Providers must also review MVP's Utilization Management Guides to determine if prior authorization is required and can refer to the searchable PDF versions of Medical, Pharmacy and other Provider and Payment policies for guidelines. ## Billing/Coding Guidelines

### Evaluation and Management

| Code  | Description                                         | Rule                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|-------|-----------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 99281 | Evaluation and Management within the Emergency Room | Emergency department visit for the evaluation and management of a patient, which requires these three key components: <ul style="list-style-type: none"><li>• A problem-focused history;</li><li>• A problem-focused examination; and</li><li>• Straightforward medical decision making.</li></ul> Counseling and/or coordination of care with other providers or agencies are provided consistent with the nature of the problem(s) and the patient's and/or family's needs. Usually, the presenting problem(s) are self-limited or minor.                                                                                                                                                                           |
| 99282 | Evaluation and Management within the Emergency Room | Emergency department visit for the evaluation and management of a patient, which requires these three key components: <ul style="list-style-type: none"><li>• An expanded problem focused history;</li><li>• An expanded problem focused examination; and</li><li>• Medical decision making of low complexity.</li></ul> Counseling and/or coordination of care with other providers or agencies are provided consistent with the nature of the problem(s) and the patient's and/or family's needs. Usually, the presenting problem(s) are of low to moderate severity.                                                                                                                                               |
| 99283 | Evaluation and Management within the Emergency Room | Emergency department visit for the evaluation and management of a patient, which requires these three key components: <ul style="list-style-type: none"><li>• An expanded problem focused history;</li><li>• An expanded problem focused examination; and</li><li>• Medical decision making of moderate complexity.</li></ul> Counseling and/or coordination of care with other providers or agencies are provided consistent with the nature of the problem(s) and the patient's and/or family's needs. Usually, the presenting problem(s) are of moderate severity.                                                                                                                                                 |
| 99284 | Evaluation and Management within the Emergency Room | Emergency department visit for the evaluation and management of a patient, which requires these three key components: <ul style="list-style-type: none"><li>• A detailed history;</li><li>• A detailed examination; and</li><li>• Medical decision making of moderate complexity.</li></ul> Counseling and/or coordination of care with other providers or agencies are provided consistent with the nature of the problem(s) and the patient's and/or family's needs. Usually, the presenting problem(s) are of high severity and require urgent evaluation by the physician but do not pose an immediate significant threat to life or physiologic function.                                                        |
| 99285 | Evaluation and Management within the Emergency Room | Emergency department visit for the evaluation and management of a patient, which requires these three key components within the constraints imposed by the urgency of the patient's clinical condition and/or mental status: <ul style="list-style-type: none"><li>• A comprehensive history;</li><li>• A comprehensive examination; and</li><li>• Medical decision making of high complexity.</li></ul> Counseling and/or coordination of care with other providers or agencies are provided consistent with the nature of the problem(s) and the patient's and/or family's needs. Usually, the presenting problem(s) are of high severity and pose an immediate significant threat to life or physiologic function. |

### Documentation of 99285 ED Services

All patient presenting problems must medically necessitate the extent of the history, exam and/or discussion noted. The overall medical decision making will be the overarching criterion in determining if a visit is coded appropriately. The volume of documentation alone will not be the sole determinant of whether a level of service is warranted.

Note: In the event of an urgent visit whereby you are unable to secure the required elements of documentation to support a complete, comprehensive HPI and Exam as required by the CMS 1995/1997 documentation guidelines, MVP recommends that a statement be provided as follows:

"Because of [insert reason] I was unable to secure a comprehensive HPI and/or perform a comprehensive examination today."

Possible conditions could be, but are not limited to dementia, pt is unconscious, pt is poor historian. Language barriers are NOT considered a reason for not meeting documentation requirements.

## E&M and Critical Care CPT Codes

When critical care and ED services are provided on the same date, if there is no break in services and a patient's condition changes, bill the critical care service. If the documentation shows a break in services and a change in the patient's condition, both the initial hospital visit, and the critical care services may be billed.

When billing an E&M visit and Critical Care service on the same claim, please review MVP's Modifier Payment Policies regarding rules around Modifier 25.

## Infusion/Injection Services

| Code        | Description                                                     | Rule                                                                                                                                 |

Billing/Coding Guidelines  
Critical Care Services  
Revision Summary  
History

## Policy

MVP will reimburse for "Medically Necessary" Evaluation / Management (E&M) services. MVP recognizes AMA's definition of CPT codes and follows the CMS 1995/1997 documentation guidelines for E&M services. In addition, MVP will follow the CMS 2021 E&M Coding Guidelines "Office and Other Outpatient Services." Medical records may be periodically requested to ensure appropriate documentation and accuracy of services billed. Member eligibility and benefit specifics should be verified prior to providing services.

## Definitions

### Medical Necessity

**AMA's Definition:** "Health care services or procedures that a prudent physician would provide to a patient for the purpose of preventing, diagnosing, or treating an illness, injury, or disease or its symptoms in a manner that is (a) in accordance with generally accepted standards of medical practice; (b) clinically appropriate in terms of type, frequency, extent, site, and duration; and (c) not primarily for the economic benefit of the health plans and purchases for the convenience of the patient, treating physician or other health care Provider."

**CMS/Medicare Definition:** "Medical necessity is the overarching criterion for payment in addition to the individual documentation requirements of a CPT code. It would not be medically necessary or appropriate to bill a higher level of evaluation and management service when a lower level of service is warranted. The volume of documentation should not be the primary influence upon which a specific level of service is billed. Documentation should support the level of service being reported."

**MVP's Definition:** "Medically Necessary" or "Medical Necessity" means health care services that are: (a) necessary to prevent, diagnose, correct or cure conditions in the person that cause acute suffering, endanger life, result in illness or infirmity, interfere with such person's capacity for normal activity, or threaten some significant handicap; and (b) recommended by the Member's treating Provider; and (c) determined by MVP's or its designee to meet the following criteria, which may be subject to external review:

1. The services are appropriate and consistent with the diagnosis and treatment of the Member's medical condition;
2. The services are not primarily for the convenience of the Member, the Member's family, or the Provider;
3. The services are required for the direct care and treatment of that condition;

4. The services are provided in accordance with general standards of good medical practice, as evidenced by reports in peer reviewed medical literature; reports and guidelines as published by nationally recognized health care organizations that include supporting scientific data; and, any other relevant information brought to MVP's attention; and
5. The services are provided in a safe, appropriate and cost-effective setting given the nature of the diagnosis and severity of symptoms.

The reason for the visit (chief complaint) MUST necessitate the need to perform and document the extent of HPI, Exam, and Medical Decision Making involved in order to appropriately manage the Member's care today.

## **New Patient**

MVP follows the American Medical Association's definition of a new patient as one who has not received any professional services from the same Provider, or other qualified health care professional of the exact same specialty and sub-specialty, who belongs to the same group Participating Provider Group (same tax ID), within the past three years.

## **Significant E&M Service**

A significant service at minimum warrants the need for an expanded problem focused examination.

E&M services which provide reassurance, monitoring, continue meds, refills, and/or are problem- focused (minor rash, bug bite) will not be considered significant.

## **Notification/Prior Authorization Requests**

MVP Payment Policies are not a guarantee of payment. Providers must also review MVP's Utilization Management Guides to determine if prior authorization is required and can refer to the searchable PDF versions of Medical, Pharmacy and other Provider and Payment policies for guidelines. The current policies can be found [here](#).

## **E&M Codes and Preventive Services/Medicine**

If the claim indicates the primary reason for the visit was for preventive services, then the claim will be reimbursed in accordance with state and federal regulations.

There should be no co-pays/co-insurance/cost share taken at the time of the service unless the specific product is excluded from Federal Health Care Reform. For the full policy regarding billing and reimbursement of preventive services, please refer to MVP Payment Policy identified as Preventive Health Care Policy.

## **Payment of Evaluation and Management for Preventive and Sick Visits**

Effective May 1, 2023, in accordance with industry standards, sick E&M visits (99202-99205, and 99211-99215) billed on the same date-of-service and by the same Provider as a preventive E&M visit will be reduced by 50% for the overlapping practice expense component, regardless of the presence of a 25 modifier.

## **E&M Codes and Sexual Assault Forensic Exam**

If the claim indicates the primary reason for the exam is a diagnosis related to sexual assault or sexual abuse, the claim will be reimbursed in accordance with the New York State Office of Victims Services mandated regulations for victims of sexual assault and the forensic exam. This mandate, which is applicable to the New York Fully Insured and select ASO groups, should be billed with applicable CPT codes as outlined in the mandate located at: [Forensic Rape Examination \(FRE\) Direct Reimbursement Program | Office of Victim Services \(ny.gov\)](#) and [Claim No: \(ny.gov\)](#). There

should be no co-pay/co-insurance/cost share or deductible taken at time of service or applied unless the product is excluded.

## Billing/Coding Guidelines

### Multiple E&M Services on the Same Day

MVP allows one E&M CPT code per day of service per physician group, per specialty.

| Code        | Description                                                      | Rule                                                                                                                                                                                                                                                                                                                                                                                      |
|-------------|------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 99381-99387 | Preventative Medicine Evaluation and Management of an individual | MVP will reimburse for a preventive medicine visit; however, will not reimburse for an office visit procedure including the following codes when performed on the same day as the preventive visits: 99201-99215, 92015, 92081, 92551, 92552, 92553, 92555, 92556, 92557, 92567, 99172, 99173, 95930, and 99174.<br>See Member benefits to determine if these codes are reimbursable.     |
| 99391-99397 | Preventative Medicine Evaluation and Management of an individual | MVP will reimburse for a preventive medicine visit; however, will not reimburse for an office visit procedure including the following codes when performed on the same day as the preventive visits: 99202-99215, 92015, 92081, 92551, 92552, 92553, 92555, 92556, 92557, 92567, 99172, 99173, 95930, and 99174.<br><br>See Member benefits to determine if these codes are reimbursable. |

### Routine Screening Services Billed with E&M

| Code          | Description                                                          | Rule                                                                                                                                                                                                                                                                                                                                                                              |
|---------------|----------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| G0102         | Manual rectal neoplasm screening                                     | MVP will not reimburse separately for this procedure on the same day as an E&M Office/Clinic/Outpatient Service – 99202–99215<br>MVP will reimburse for this procedure when it is the sole service provided.                                                                                                                                                                      |
| 36415         | Collection of venous blood by venipuncture                           | MVP will not reimburse separately for this procedure on the same day as an E&M Office/Clinic/Outpatient Service – 99202–99215 when the lab is performed in the office. MVP will reimburse separately for this procedure when the Lab work is sent to an external lab and billed with a modifier CG.<br>MVP will reimburse for this procedure when it is the sole service provided |
| 36416         | Collection of capillary blood specimen i.e., finger, heel, ear stick | MVP will not reimburse separately for this procedure on the same day as an E&M Office/Clinic/Outpatient Service – 99202–99215.<br>MVP will reimburse for this procedure when it is the sole service provided and modifier CG is submitted.                                                                                                                                        |
| 99000 & 99001 | Lab specimen handling services                                       | MVP will not reimburse separately for this procedure on the same day as an E&M Office/Clinic/Outpatient Service – 99202–99215<br>MVP will reimburse for this procedure when it is the sole service provided.                                                                                                                                                                      |

| 94760 & 94761 | Pulse Oximetry Testing                                               | MVP will not Reimburse separately for this procedure on the same day as an E&M Office/Clinic/Outpatient Service.                                                                                                                                                                                                                                                                  |

### Smoking Cessation Billed with E&M

| Code                                     | Description                  | Rule                                                                                                                                       |
|------------------------------------------|------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------|
| 99406, 99407, G0376, G0375, S9453, S9075 | Smoking Cessation Counseling | MVP will not reimburse for these procedure codes.<br>Exception: Please check the Member benefits to determine if this is a covered benefit |

## E&M Billed During a Global Period

MVP will not separately reimburse for any E&M service when reported with major surgical procedure within a global period unless there is a “significant” problem which arises which is not considered a normal complication of recovery or an “unrelated” problem not associated with the procedure performed.

In alignment with CMS guidelines, Modifier 24 must be appended on the E&M service. Modifier 24 states: Unrelated evaluation and management service by the same physician or other qualified health care professional during a postoperative period.

MVP will not separately reimburse for E&M services billed with minor procedures that have a 10-day post-op period. Note: Services billed on day 11 that appear to be related to the procedure performed can be subject to internal review.

For Non-Face-to-Face Evaluation and Management Services, please refer to MVP’s Telehealth Policy.

## Diabetes Education

| Code  | Description                                            | Rule                                                                                                                                                                                                                                           |
|-------|--------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 98960 | Education and training for self-management of Diabetes | MVP will reimburse for these services when the service is billed alone.<br><br>MVP will not reimburse for these codes when billed with an E&M office visit code (example: 99211-99215). The services will deny as bundled to the office visit. |

## Osteopathic Manipulation

| Code                              | Description              | Rule                                                                                                                                                                  |
|-----------------------------------|--------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 98925, 98926, 98927, 98928, 98929 | Osteopathic Manipulation | Osteopathic manipulation codes are only reimbursable to MDs and DOs.<br>Refer to your contractual agreement to determine if there is an exception for these services. |

## Immunization Administration

| Code                                                          | Description                          | Rule                                                                                                    |
|---------------------------------------------------------------|--------------------------------------|---------------------------------------------------------------------------------------------------------|
| 90460, 90461, 90471, 90472, 90473, 90474, G0008, G0009, G0010 | Immunization administration services | MVP will only reimburse for immunization administration services when billed with a Z23 diagnosis code. |

## Modifier 25

| Code                                                               | Description               | Rule                                                                                                                                                                                                                                                                                            |
|--------------------------------------------------------------------|---------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 95115, 95117, 95120, 95125, 95130-95134, 95144-95149, 95165, 95170 | Allergy Injections        | MVP will only reimburse for allergy injections in conjunction with an E&M visit, Inpatient visit, or Emergency Room visit when billed with a modifier 25. |                                                                                                                                            |                                    | global OB allowable amount reimbursed on the Global delivery claim.                                                                                   |
| 59425 for visits 4-6 or 59426 for 7+ visits                                                                                                | Antepartum Care                    | Antepartum Care billed without indicating the number of prenatal visits will not be reimbursed.                                                       |
| 59400, 59410, 59510, 59515, 59610, 59614, 59618, 59620, 59812, 59820, 59821, 59830, 59840, 59841, 59850, 59851, 59852, 59855, 59856, 59857 | Obstetric care and antepartum care | The 1st prenatal visit is global to the total OB Delivery charges with the entire global OB allowable amount reimbursed on the Global delivery claim. |

## Inpatient Visit

| Code          | Description                     | Rule                                                                                                                                                                         |
|---------------|---------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 99201 - 99499 | Evaluation and Management Codes | When two Inpatient Physician E&M codes are billed on the same date of service, for the same/related condition, and by the same Provider, the second E&M code will be denied. |

## After-Hours Visits

| Code          | Description               | Rule                                                                                                                                                                                      |
|---------------|---------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 99051 – 99060 | E&M After-Hour Procedures | Refer to the MVP After-Hours Payment Policy for guidelines on these codes. Please refer to your contractual agreement to determine if this rule applies.                                  |
| 99050         | After-Hours Code          | MVP will reimburse for this code without review unless submitted with preventative visit codes 99381-99397. Please refer to your contractual agreement to determine if this rule applies. |

## Urgent Care Visits

| Code          | Description                                           | Rule                                                                                                                                                           |
|---------------|-------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 99201 - 99499 | Evaluation and Management Codes billed as urgent care | MVP will not reimburse for these codes when an Urgent Care visit is billed with Well Child Care, Routine Diagnoses, or Routine Services such as Immunizations. |

## Consultation Visits

| Code                                                      | Description                               | Rule                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
|-----------------------------------------------------------|-------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 99241-99245                                               | Office/Outpatient Consultation Procedures | MVP follows CMS Guidelines regarding the use of consultations and does not reimburse for these codes.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| 99251-99255                                               | Inpatient Consultation Procedures         | MVP follows CMS Guidelines regarding the use of consultations and does not reimburse for these codes.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| 99218-99220; 99234- 99235, 99236 and discharge code 99217 | Hospital Observation Codes                | Only the Provider who “orders” the observation services can bill observation codes.<br>Bill with the appropriate observation codes which are based on components for observation. The codes must meet the component requirements set forth by the CPT code guidelines.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 99221-99223                                               | Initial Hospital Visit                    | An Initial Consultation in the hospital should be billed as an initial hospital visit. An AI modifier should be affixed to this code if the physician is the “principle physician of record” (i.e. admitting/attending) and is not performing a consultation.<br>MVP will allow one (1) visit per Provider related to the same condition or diagnosis per day. The “volume of documentation” should not be the primary influence upon which a specific level of service is billed. Documentation should support the level of service reported.<br>The duration of a visit is an ancillary factor and does not “control” the level of the service to be billed unless more than 50% of the allowable time by setting occurs and this needs to be documented. |

|                     |                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

|                     |                                                                                                                                                                                               | These are timed and component-based codes. They must meet the components and time requirements set forth by the CPT code guidelines.                                                                                                                                                                                                                                                                                                                                          |
| 99281-99288         | Evaluation and Management within the Emergency Room                                                                                                                                           | MVP does not reimburse for consultations. Please use the following codes to indicate that this is an evaluation and management service in place of a consultation in the Emergency room.<br>MVP will reimburse for these codes if the ER attending provides services and sends the Member home.<br>MVP will reimburse for these codes if a Provider goes to the ER (must be present – no phone) to render a consultation service to determine if a Member should be admitted. |
| 99221-99223         | Evaluation and Management within the Emergency Room<br>In the Emergency Room with an inpatient admission                                                                                      | MVP will reimburse for these codes if a Provider goes to the ER (must be present – no phone) to render a service and admits the Member. Modifier AI must be affixed to the claim. (I.e. when you are the attending/admitting Provider).<br>MVP will reimburse for these codes if the ER attending admits the Member. Modifier AI must be affixed to the claim (i.e. when you are the attending/admitting Provider).                                                           |
| 99211-99215         | Office or other outpatient visit for the evaluation and management of an established patient                                                                                                  | MVP will reimburse for these codes as set forth by the CPT Code guidelines. MVP will reimburse these codes for established patients who do not meet the CPT Code guidelines for a “New” patient. Consultations are not reimbursed by MVP. Providers should use these codes when providing a consultation and documenting as such.                                                                                                                                             |
| 99211               | Office or other outpatient visit for the evaluation and management of an established patient that may not require the presence of a physician. Usually, the presenting problem(s) are minimal | MVP will reimburse as follows:<br>When the patient visit is part of an established physician plan of care requiring medically necessary follow-up.<br>RNs or qualified ancillary staff cannot code higher than a 99211 for E&M services.<br>RNs or qualified ancillary staff cannot bill new problems or new patient visit code 99201.<br>A Provider and a RN or qualified ancillary staff cannot both bill for an E&M office visit within the same day.                      |
| 99304, 99305, 99306 | Initial Skilled Nursing Facility Visit                                                                                                                                                        | MVP will reimburse for these codes as set forth by the CPT Code guidelines. Consultations are not reimbursed by MVP. Providers should use these codes when providing a consultation and documenting as such.<br>If performing the initial evaluation Modifier “AI” must be affixed to the claim which will identify you as the “Principal Physician of Record” (e.g. admitting/attending SNF Provider) vs. a Provider rendering “specialty care.”                             |
| 99307-99310         | Follow-up Skilled Nursing Facility Visit                                                                                                                                                      | MVP will reimburse for these codes as set forth by the CPT Code guidelines. Consultations are not reimbursed by MVP. Providers should use these codes when providing a consultation and documenting as such.                                                                                                                                                                                                                                                                  |
| G0545               | Add-on code                                                                                                                                                                                   | <ul style="list-style-type: none"> <li>Initial visit codes (e.g., 99221- 99223): Used when a patient is admitted to the hospital and evaluated for the first time during that stay.</li> <li>Same-day discharge codes (e.g., 99234-99236): Used when a patient is admitted and discharged on the same day.</li> <li>Subsequent visit codes (e.g., 99231-99233): Used for follow-up visits with the patient during their hospital stay or observation period.</li> </ul>       |

## Discharge Services

| Code  | Description                                                                                         | Rule                                                                                                                                                                                                                                                                                                                                                                                                   |
|-------|-----------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 99238 | Inpatient Standard Discharge instructions typically 0-30 min                                        | These are timed and component based codes. They must meet the components and time requirements set forth by the CPT code guidelines.<br>For discharge services, please follow the state mandate on required documentation prior to discharging a Member.                                                                                                                                               |
| 99239 | Inpatient discharge planning exceeds 30 minutes and is generally considered not a typical discharge | These are timed and component based codes. They must meet the components and time requirements set forth by the CPT code guidelines.<br>For discharge services, please follow the state mandate on required documentation prior to discharging a Member. Provider must note “time” in the note that was spent above/beyond 30 minutes and provide explanation as to why the discharge was not typical. |

## Critical Care Services

Critically ill is defined as: A critical illness or injury that acutely impairs one or more vital organ systems indicating a high probability of "imminent" or "life threatening" deterioration" in the Member's condition. Examples of vital organ system failure include, but are not limited to, central nervous system failure, circulatory failure, shock, renal, hepatic, metabolic and/ or respiratory failure.

- "The time spent engaged in work directly related to the individual patient's care whether that time was spent at the immediate bedside or elsewhere on the floor or unit."
- Time spent does not need to be continuous
- The key is for the Provider to be "immediately" available to the Member
- Time billed is "per calendar day"
- Time must be documented in the medical record;
- Billable time can be time spent at the bedside, reviewing test results, discussing the case w/staff, family (if Member is unable or clinically incompetent to participate)
  - Time spent performing procedures below during critical care do not count towards critical care time;
    - If an additional specialist assists with services while providing critical care (i.e. Vascular
    - Surgeon performs a vascular access procedure) the specialist will be paid for their services.
    - In this situation a critical care physician should not count the time performing this procedure as part of the services they have provided.

Family Discussion cannot be billed as part of critically ill services. Examples of family discussions which do not count toward critical care time include:

- Regular or periodic updates of the Member's condition
- Emotional support for the family
- Answering questions regarding the Member's condition to provide reassurance
- Telephone calls to family members and surrogate decision makers must meet the same conditions as face-to-face meetings
- Time involved in activities that do not directly contribute to the treatment of the Member, and therefore may not be counted towards critical care time, include teaching sessions with residents whether conducted on rounds or in other venues
- Non-Critically Ill or Injured Members in a Critical Care Unit
- Members admitted to a critical care unit because no other hospital beds were available

| Code                | Description                                   | Rule                                                                                                                                                               |
|---------------------|-----------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 93561 & 93562       | Interpretation of cardiac output measurements | Time spent performing this procedure does NOT count toward critical care time and cannot be billed separately by physician providing the critical care services.   |
| 94760, 94761, 94762 | Pulse Oximetry                                | Time spent performing this procedure does NOT count toward critical care time and cannot be billed separately by a physician providing the critical care services. |

## Policy

MVP provides coverage for lenses, frames, and contact lenses for Members when it is deemed medically necessary by an ophthalmologist or optometrist and have the eye wear benefit. Participating opticians/dispensers have a variety of quality eye wear product lines that can be offered to the Member; these products represent the frames and lenses available for this benefit. A prescription from an optometrist or ophthalmologist is required. Providers must check the Member's specific benefits as it relates to eye wear before dispensing any pairs of lenses, frames, or contact lenses.

(Note: Lenses, frames, and contact lenses may be covered under the medical benefit for specific medical circumstances. See "Lenses for Medical Conditions" in related Eye Medical Policy).

## Benefits

Eye wear coverage will be reimbursed based on the Member's benefits. Member benefits vary based on the type of product and may change from year to year. All Member benefits can be found by signing into their secure MVP Provider Online Account at [mvphealthcare.com/providers](https://mvphealthcare.com/providers). Once Providers have signed in, they may access the benefit detail under the Member eligibility section.

## Notification/Prior Authorization Requests

MVP Payment Policies are not a guarantee of payment. Providers must also review MVP's Utilization Management Guides to determine if prior authorization is required and can refer to the searchable PDF versions of Medical, Pharmacy and other Provider and Payment policies for guidelines. The current policies can be found [here](#).

## Billing/Coding Guidelines

Eyeglasses do not require changing more frequently than once every 24 months for individuals over the age of 19 and every 12 months for individuals aged 19 and under unless medically indicated, such as a change in correction greater than half diopter, or unless the glasses are lost, damaged, or destroyed. The replacement of a complete pair must duplicate the original prescription of the lenses and frames. Coverage also includes the repair or replacement of parts in situations where the damage is the result of causes other than defective workmanship. Replacement parts must duplicate the original prescription and frames. Repairs to, and replacements of, frames and/or lenses must be rendered as needed.

When using the eye wear benefit, Providers may review the Member subscriber contract to confirm what is covered.

## MVP Health Care Payment Policy

# EyeMed Payment Policy

## EYEMED PAYMENT POLICY

Policy  
Notifications/Prior Authorization Request  
Billing/Coding Guidelines  
History

## Policy

Eye and vision services billed under a Member's medical benefit will be reimbursed in accordance with their health benefit plan. For eligible MVP members with supplemental vision benefits through EyeMed, additional coverage for routine eye is available through the EyeMed network of participating providers. To determine what is covered by EyeMed or MVP, please review the below CPT codes and diagnosis codes that will be billed to each. If a Member's plan utilizes the EyeMed network for routine vision care, their Member's ID card will bear the EyeMed emblem. Or, sign in to your MVP Provider Online Account to confirm the Member's benefits on the MVP online benefits display.

## Notification/Prior Authorization Requests

MVP Payment Policies are not a guarantee of payment. Providers must also review MVP's Utilization Management Guides to determine if prior authorization is required and can refer to the searchable PDF versions of Medical, Pharmacy and other Provider and Payment policies for guidelines. The current policies can be found [here](#).

## Billing/Coding Guidelines

### Routine Only Eye Care

When the following Vision CPT/HCPCS codes are billed, claims should be sent to **EyeMed**:

| Vision CPT/HCPCS Codes | Description                                                     |
|------------------------|-----------------------------------------------------------------|
| 92002                  | Intermediate Exam                                               |
| 92004                  | Comprehensive Exam                                              |
| 92012                  | Intermediate Exam                                               |

| 0378T | Visual field assessment, with concurrent real time data analysis and accessible data storage with patient initiated<br>Data transmitted to a remote surveillance center |
| 0469T | Retinal polarization scan, ocular screening with on-site automated results, bilateral                                                                                   |
| 0506T | Macular pigment optical density measurement by heterochromatic flicker photometry, unilateral or bilateral, with<br>interpretation and report                           |
| 2023F | Dilated retinal eye exam with interpretation by an ophthalmologist or optometrist documented and reviewed;<br>without evidence of retinopathy (dm)                      |
| 2025F | 7 standard field stereoscopic retinal photos with interpretation by an ophthalmologist or optometrist documented<br>and reviewed: without evidence of retinopathy (dm)  |
| 2033F | Eye imaging validated to match diagnosis from 7 standard field stereoscopic retinal photos results documented<br>and reviewed: without evidence of retinopathy (DM)     |

## Routine and Medical Care with Diagnosis Specific Requirements

### Bill to EyeMed

When billing the Vision CPT/HCPCS codes below with one of the following routine ICD-10 codes, claims should be sent to EyeMed:

| Vision CPT/HCPCS Codes | Claim                          |
|------------------------|--------------------------------|
| H5200                  | Hypermetropia, unspecified eye |
| H5201                  | Hypermetropia, right eye       |
| H5202                  | Hypermetropia, left eye        |
| H5203                  | Hypermetropia, bilateral       |
| H5210                  | Myopia, unspecified eye        |
| H5211                  | Myopia, right eye              |
| H5212                  | Myopia, left eye               |
| H5213                  | Myopia, bilateral              |

|        |                                                              |
|--------|--------------------------------------------------------------|
| H52201 | Unspecified Astigmatism, right eye                           |
| H52202 | Unspecified Astigmatism, left eye                            |
| H52203 | Unspecified Astigmatism, bilateral                           |
| H52209 | Unspecified Astigmatism, unspecified eye                     |
| H52211 | Irregular Astigmatism, right eye                             |
| H52212 | Irregular Astigmatism, left eye                              |
| H52213 | Irregular Astigmatism, bilateral                             |
| H52219 | Irregular Astigmatism, unspecified eye                       |
| H52221 | Regular Astigmatism, right eye                               |
| H52222 | Regular Astigmatism, left eye                                |
| H52223 | Regular Astigmatism, bilateral                               |
| H52229 | Regular Astigmatism, unspecified eye                         |

| Z01020 | Encounter for examination of eyes and vision following failed vision screening without abnormal findings |
| Z01021 | Encounter for examination of eyes and vision following failed vision screening with abnormal findings    |
| Z961   | Presence of intraocular lens                                                                             |

## Bill to MVP

When billing Vision CPT/HCPCS codes below with the ICD-10 Code of H5232, Aniseikonia, the claim should be billed to MVP:

| Vision CPT/HCPCS Codes | Description                                                            |
|------------------------|------------------------------------------------------------------------|
| 92002                  | Ophthalmologic. Serv; intermediate                                     |
| 92004                  | Eye exam, comprehensive, 1 or more session                             |
| 92012                  | Eye exam; intermediate, estab. Pt                                      |
| 92014                  | Comprehensive, established patient                                     |
| 92015                  | Determination of refractive state                                      |
| 92072                  | Fitting of contact lens for management of keratoconus, initial fitting |
| 92311                  | Prescribe/fit contact lens, aphakia, 1 eye                             |
| 92312                  | Prescribe/fit contact lens, aphakia, 2 eyes                            |
| 92326                  | Replacement of contact lens                                            |
| 92340                  | Fit spectacle, not aphakia; monofocal                                  |
| 92341                  | Fit spectacles, not aphakia; bifocal                                   |
| 92342                  | Fit spectacles, not aphakia; multifocal                                |
| 92370                  | Repair/refit spectacles; except aphakia                                |
| S0590                  | Integral lens service, miscellaneous services reported separately      |
| S0592                  | Comprehensive contact lens evaluation                                  |
| S0620                  | Routine ophthalmological exam                                          |
| S0621                  | Routine ophthalmological exam                                          |
| V2020                  | Vision svcs frames purchases                                           |
| V2100                  | Lens spherocylindrical single plano 4.00                               |
| V2101                  | Single vision spherocylindrical 4.12-7.00                              |
| V2102                  | Single vision spherocylindrical 7.12-20.00                             |

 History

## Policy

MVP reimburses a network home infusion therapy provider for the following infusion services when safely administered in the home, only on the days Member receives IV therapy services:

- Administration of the medication
- Medication (not self-administered)

Home infusion Providers will not be reimbursed separately if the administration of the medication or refill of medication is performed by the Member's primary care physician or other health care professional in an office or facility setting (e.g. not in the Member's home).

## Definitions

### Infusion Therapy

Infusion therapy is the continuous, controlled administration of a drug, nutrient, antibiotic, or other fluid into a vein or other tissue on a continuous or intermittent basis, depending on the condition being treated and type of therapy. Infusion therapy may be performed in the home setting for medication infused or injected through a catheter and may include care and maintenance of the catheter site.

## Types of Therapy

- Therapeutic (hydration or medication therapy – e.g. chemotherapy, IVIG)
- Prophylactic (Injections/infusions to prevent "side effects" – e.g. ondansetron)
- Nutritional (Parenteral / Enteral)

### Total Parenteral Nutrition (TPN)

TPN is a form of nutrition that is delivered through a vein which may contain lipids, electrolytes, amino acids, trace elements, and vitamins.

### Enteral Nutrition

Enteral nutrition is a form of nutrition that is delivered into the digestive system as a liquid. Enteral nutrition may be provided orally or through a feeding tube. Enteral products may be liquids or powders that are reconstituted to a liquid form. Refer to the MVP Enteral Policy for coverage criteria.

## **Per Diem Definition**

Per Diem represents each day that a given patient is provided access to a prescribed therapy and is valid for per diem therapies of up to and including every 72 hours. Therapies provided beyond this range (weekly, monthly, etc.) fall outside of the per diem structure, and will receive one (1) per diem unit for the day the infusion was provided. Supplies are included in the rate for those therapies provided on a less frequent basis.

Diluents/solutions for the preparation and administration of the medication, and flushing solutions including heparin, saline, and routinely included supplies (e.g. gauze, tape, cleansing solutions, splints), are included in the per diem rates.

The expected course and duration of the treatment shall be determined by the plan of care as prescribed by the ordering physician.

Per Diem includes the following services/items:

### **1. Professional Pharmacy Services**

- Continuing education to professional pharmacy staff
- Removal, storage, and disposal of infectious waste
- Maintaining accreditation

### **2. Dispensing**

- Medication profile setup and drug utilization review
- Monitoring for potential drug interactions
- Sterile procedures including intravenous admixtures, clean room upkeep, vertical and horizontal laminar flow hood certification, and all other biomedical procedures necessary for a safe environment
- USP797 compliant sterile compounding of medications
- Patient counseling as required under OBRA 1990

### **3. Clinical Monitoring**

- Development and implementation of pharmaceutical care plans
- Pharmacokinetic dosing
- Review and interpretation of patient test results
- Recommending dosage or medication changes based on clinical findings
- Initial and ongoing pharmacy patient assessment and clinical monitoring
- Measurement of field nursing competency with subsequent education and training
- Other professional and cognitive services as needed to clinically manage the patient pharmacy care

### **4. Care Coordination**

- Patient admittance services, including communication with other medical professionals, patient assessment, and opening of the medical record
- Patient/caregiver educational activities, including providing training and patient education materials
- Clinical coordination of infusion services care with physicians, nurses, patients, patient's family, other providers, caregivers, and case managers
- Clinical coordination of non-infusion related services
- Patient discharge services, including communication with other medical professionals and closing of the medical record
- 24 hours/day, 7 days/week availability for questions and/or problems of a dedicated infusion team consisting of pharmacist(s), nurse(s), and all other medical professionals responsible for clinical response,

problem solving, trouble shooting, question answering, and other professional duties from pharmacy staff that do not require a patient visit

- Development and monitoring of nursing care plans
- Coordination, education, training and management of field nursing staff (or subcontracted agencies)
- Delivery of medication, supplies, and equipment to patient's home

#### 5. Supplies and Equipment

- Line maintenance supplies including non-therapeutic anti-coagulants and saline.
- DME (pumps, poles and accessories) for drug and nutrition administration\*
- Equipment maintenance and repair (excluding patient owned equipment)
- Short peripheral vascular access devices
- Needles, gauze, non-implanted sterile tubing, catheters, dressing kits, and other necessary supplies for the safe and effective administration of infusion, specialty drug and nutrition therapies\*

\*Enteral supplies (including but not limited to enteral feeding kits, pumps, and poles) and/or nursing and home services when the formula is determined to be not medically necessary are not covered. MVP shall review all claims retrospectively for services and supplies, including but not limited to nursing services, per diem charges, pumps, poles, and feeding bags, associated with enteral formulas.

#### 6. Administrative Services

- Administering coordination of benefits with other insurers
- Determining insurance coverage, including coverage for compliance with all state and federal regulations
- Verification of insurance eligibility and extent of coverage
- Obtaining certificate of medical necessity and other medical necessity documentation
- Obtaining prior authorizations
- Performing billing functions
- Performing account collection activities
- Internal and external auditing and other regulatory compliance activities
- Postage and shipping
- Design and production of patient education materials

### **Notification/Prior Authorization Requests**

Medications and enteral formula administered in the home may require prior authorization; refer to the MVP Formulary or Benefit Interpretation Manual to determine if authorization is required.

### **Billing/Coding Guidelines**

#### **Medical Necessity for Infusion Therapy**

Medical necessity is the overarching criterion for payment in addition to the individual documentation requirements of a CPT code. It would not be medically necessary or appropriate to bill a higher level of evaluation and management service when a lower level of service is warranted. The volume of documentation should not be the primary influence upon which a specific level of service is billed. Documentation should support the level of service being reported.

Infusion must be prescribed by an appropriately licensed prescriber as part of a treatment plan for a covered medical condition.

Administration of the drug via infusion therapy is medically necessary. Infusion therapy is prescribed only when the member's condition cannot be appropriately treated with alternative dosage forms of medication (e.g. oral, topical,

or SQ) or the therapy is not available in alternative dosage forms and achieve the same or equivalent therapeutic effect.

All components of the infusion must meet medical necessity criteria and be medically necessary to treat the member's medical condition for the infusion to be covered.

Treatments can be safely administered in the home.

Services must be provided by a network/preferred home infusion therapy provider.

Peripherally Inserted Central Catheter (PICC) line placement does not guarantee approval or payment of the medication to be infused if the medication does not meet medical necessity criteria or requires prior authorization.

### **Anti-infective Therapy** (antibiotics/antifungals/antivirals)

## Enteral Nutrition Therapy

Enteral formula is limited to a 30-day supply per dispensing or as specified in the member's contract, rider, or specific benefit design. The following codes do not apply to nutritional formulas taken orally. Refer to the MVP Enteral Therapy policies for coverage criteria.

Medicaid variation: All Medicaid Members enrolled in MVP Medicaid Managed Care will receive their prescription drugs through NYRx, the Medicaid Pharmacy Program, including enteral therapy.

| Code         | Description                                                                                                                                                                                                                       | Rule                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

## Hydration Therapy

| Code  | Description                                                                                                                                                                                                                        | Rule |
|-------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| S9374 | Home infusion therapy, hydration therapy; more than 3 liters per day, administrative services, professional pharmacy services, care coordination, and all necessary supplies (drugs and nursing visits coded separately), per diem |      |
| S9375 | Home infusion therapy, hydration therapy; more than 3 liters per day, administrative services, professional pharmacy services, care                                                                                                |      |

|       |                                                                                                                                                                                                                                    |  |
|-------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
|       | coordination, and all necessary supplies (drugs and nursing visits coded separately), per diem                                                                                                                                     |  |
| S9376 | Home infusion therapy, hydration therapy; more than 3 liters per day, administrative services, professional pharmacy services, care coordination, and all necessary supplies (drugs and nursing visits coded separately), per diem |  |
| S9377 | Home infusion therapy, hydration therapy; more than 3 liters per day, administrative services, professional pharmacy services, care coordination, and all necessary supplies (drugs and nursing visits coded separately), per diem |  |

### Pain Management Infusion

| Code  | Description                                                                                                                                                                                                                                                   | Rule |
|-------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| S9326 | Home infusion therapy, continuous (24 hours or more) pain management infusion; administrative services, professional pharmacy services, care coordination, and all necessary supplies and equipment (drugs and nursing visits coded separately), per diem     |      |
| S9327 | Home infusion therapy, intermittent (less than 24 hours) pain management infusion; administrative services, professional pharmacy services, care coordination, and all necessary supplies and equipment (drugs and nursing visits coded separately), per diem |      |
| S9338 | Home infusion therapy, immunotherapy, administrative services, professional pharmacy services, care coordination, and all necessary supplies and equipment (drugs and nursing visits coded separately), per diem                                              |      |
| S9377 | Home infusion therapy, hydration therapy; more than 3 liters per day, administrative services, professional pharmacy services, care coordination, and all necessary supplies (drugs and nursing visits coded separately), per diem                            |      |

### Total Parenteral Nutrition

| Code  | Description                                                                                                                                                                                                                                                                  | Rule |
|-------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| S9365 | Home infusion therapy, total parenteral nutrition (TPN); 1 liter per day, administrative services, professional pharmacy services, care coordination, and all necessary supplies and equipment including standard TPN formula (lipids, specialty amino acid formulas, drugs, |      |

|       |                                                                                                                                                                                                                                                                                                                                                                                                 |  |
|-------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
|       | other than in standard formula and nursing visits coded separately), per diem                                                                                                                                                                                                                                                                                                                   |  |
| S9366 | Home infusion therapy, total parenteral nutrition (TPN); more than 1 liter but no more than 2 liters per day, administrative services, professional pharmacy services, care coordination, and all necessary supplies and equipment including standard TPN formula (lipids, specialty amino acid formulas, drugs other than in standard formula, and nursing visits coded separately), per diem  |  |
| S9367 | Home infusion therapy, total parenteral nutrition (TPN); more than 2 liters but no more than 3 liters per day, administrative services, professional pharmacy services, care coordination, and all necessary supplies and equipment including standard TPN formula (lipids, specialty amino acid formulas, drugs other than in standard formula, and nursing visits coded separately), per diem |  |
| S9368 | Home infusion therapy, total parenteral nutrition (TPN); more than 3 liters per day, administrative services, professional pharmacy services, care coordination, and all necessary supplies and equipment including standard TPN formula (lipids, specialty amino acid formulas, drugs other than in standard formula, and nursing visits coded separately), per diem                           |  |
| B4185 | Parenteral nutrition solution, per 10 grams lipids                                                                                                                                                                                                                                                                                                                                              |  |

## Specialty Therapy

| Code  | Description                                                                                                                                                                                                                                       | Rule |
|-------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| S9061 | Home administration of aerosolized drug therapy (e.g., Pentamidine); administrative services, professional pharmacy services, care coordination, all necessary supplies and equipment (drugs and nursing visits coded separately), per diem       |      |
| S9338 | Home infusion therapy, immunotherapy, administrative services, professional pharmacy services, care coordination, and all necessary supplies and equipment (drugs and nursing visits coded separately), per diem                                  |      |
| S9346 | Home infusion therapy, alpha-1-proteinase inhibitor (e.g., Prolastin); administrative services, professional pharmacy services, care coordination, and all necessary supplies and equipment (drugs and nursing visits coded separately), per diem |      |

|       |                                                                                                                                                                                                                                                                      |  |
|-------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
|       |                                                                                                                                                                                                                                                                      |  |
| S9372 | Home therapy; intermittent anticoagulant injection therapy (e.g., Heparin); administrative services, professional pharmacy services, care coordination, and all necessary supplies and equipment (drugs and nursing visits coded separately), per diem               |  |
| S9351 | Home infusion therapy, continuous or intermittent antiemetic infusion therapy; administrative services, professional pharmacy services, care coordination, and all necessary supplies and equipment (drugs and visits coded separately), per diem                    |  |
| S9370 | Home therapy, intermittent antiemetic injection therapy; administrative services, professional pharmacy services, care coordination, and all necessary supplies and equipment (drugs and nursing visits coded separately), per diem                                  |  |
| S9345 | Home infusion therapy, antihemophilic agent infusion therapy (e.g., factor VIII); administrative services, professional pharmacy services, care coordination, and all necessary supplies and equipment (drugs and nursing visits coded separately), per diem         |  |
| S9359 | Home infusion therapy, antitumor necrosis factor intravenous therapy; (e.g., Infliximab); administrative services, professional pharmacy services, care coordination, and all necessary supplies and equipment (drugs and nursing visits coded separately), per diem |  |
| S9355 | Home infusion therapy, chelation therapy; administrative services, professional pharmacy services, care coordination, and all necessary supplies and equipment (drugs and nursing visits coded separately), per diem                                                 |  |
| S9490 | Home infusion therapy, corticosteroid infusion; administrative services, professional pharmacy services, care coordination, and all necessary supplies and equipment (drugs and nursing visits coded separately), per diem                                           |  |
| S9361 | Home infusion therapy, diuretic intravenous therapy; administrative services, professional pharmacy services, care coordination, and all necessary supplies and equipment (drugs and nursing visits coded separately), per diem                                      |  |
| S9558 | Home injectable therapy; growth hormone, including administrative services, professional pharmacy services, care coordination, and all necessary supplies and equipment (drugs and nursing visits coded separately), per diem                                        |  |

|       |                                                                                                                                                                                                                                                                         |                                                                                                                                                                        |
|-------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| S9537 | Home therapy; hematopoietic hormone injection therapy (e.g., erythropoietin, G-CSF, GM-CSF); administrative services, professional pharmacy services, care coordination, and all necessary supplies and equipment (drugs and nursing visits coded separately), per diem |                                                                                                                                                                        |
| S9348 | Home infusion therapy, sympathomimetic/inotropic agent infusion therapy (e.g., Dobutamine); administrative services, professional pharmacy services, care coordination, all necessary supplies and equipment (drugs and nursing visits coded separately), per diem      |                                                                                                                                                                        |
| S5521 | Home infusion therapy, all supplies (including catheter) necessary for a midline catheter insertion                                                                                                                                                                     |                                                                                                                                                                        |
| S5520 | Home infusion therapy, all supplies (including catheter) necessary for a peripherally inserted central venous catheter (PICC) line insertion                                                                                                                            |                                                                                                                                                                        |
| S9357 | Home infusion therapy, enzyme replacement intravenous therapy; (e.g., Imiglucerase); administrative services, professional pharmacy services, care coordination, and all necessary supplies and equipment (drugs and nursing visits coded separately), per diem         |                                                                                                                                                                        |
| S5517 | Home infusion therapy, all supplies necessary for restoration of catheter patency or declotting                                                                                                                                                                         |                                                                                                                                                                        |
| S5518 | Home infusion therapy, all supplies necessary for catheter repair                                                                                                                                                                                                       |                                                                                                                                                                        |
| S9379 | Home infusion therapy, infusion therapy, not otherwise classified; administrative services, professional pharmacy services, care coordination, and all necessary supplies and equipment (drugs and nursing visits coded separately), per diem                           | Documentation must be available for retrospective review. Should only be billed for a service or procedure that does not have a valid specific therapy code available. |
|       |                                                                                                                                                                                                                                                                         |                                                                                                                                                                        |

#### **J0640 (Leucovorin) and J0641 (Fusilev)**

These medications are classified as therapeutic. The following administration codes will be allowed when billing for these two codes:

#### **J0640 (Leucovorin)**

|       |                                                                                                                                     |
|-------|-------------------------------------------------------------------------------------------------------------------------------------|
| 96372 | Therapeutic, prophylactic, or diagnostic injection (specify substance or drug); subcutaneous or intramuscular.                      |
| 96374 | Therapeutic, prophylactic, or diagnostic injection (specify substance or drug); intravenous push, single or initial substance/drug. |

### J0641 (Fusilev) (requires prior authorization)

|       |                                                                                                                                                                             |
|-------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 96365 | Intravenous infusion, for therapy, prophylaxis, or diagnosis (specify substance or drug); initial, up to 1 hour.                                                            |
| 96366 | Intravenous infusion, for therapy, prophylaxis, or diagnosis (specify substance or drug); each additional hour (List separately in addition to code for primary procedure). |

### Catheter Care – not in conjunction with any other per diem, only when a standalone service

| Code  | Description                                                                                                                                                                                                                                                                                                                                     |
|-------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| S5498 | Home infusion therapy, catheter care/ maintenance, simple (single lumen), includes administrative services, professional pharmacy services, care coordination, and all necessary supplies and equipment, (drugs and nursing visits coded separately), per diem                                                                                  |
| S5501 | Home infusion therapy, catheter care/ maintenance, complex (more than one lumen), includes administrative services, professional pharmacy services, care coordination, and all necessary supplies and equipment (drugs and nursing visits coded separately), per diem                                                                           |
| S5502 | Home infusion therapy, catheter care/ maintenance, implanted access device, includes administrative services, professional pharmacy services, care coordination, and all necessary supplies and equipment (drugs and nursing visits coded separately), per diem (use this code for interim maintenance of vascular access not currently in use) |

### Home Nursing

| Code  | Description                                                                                                                                              |
|-------|----------------------------------------------------------------------------------------------------------------------------------------------------------|
| 99601 | Home infusion/specialty drug administration, per visit (up to 2 hours);                                                                                  |
| 99602 | Home infusion/specialty drug administration, per visit (up to 2 hours); each additional hour (List separately in addition to code for primary procedure) |

### Per Diem Code Modifiers

| Code | Description                                                                      | Rule                        |
|------|----------------------------------------------------------------------------------|-----------------------------|
| SH   | Second concurrently administered infusion therapy                                | Payable at 50%              |
| SJ   | Third or more concurrently administered infusion therapy                         | Payable at 50%              |
| SS   | Home infusion services provided in the infusion suite of the IV therapy provider | For Reporting Purposes Only |

## Nursing Services

Services are provided by an RN with special education, training, and expertise in home administration of drugs via infusion and home administration of specialty drugs. Nursing services may be provided directly by infusion pharmacy nursing staff or by a qualified home health agency. Home infusion vendors may subcontract with another agency for all or part of the nursing services. In these instances, the home infusion vendor:

- Assumes responsibility and oversight of care provided;
- Bills MVP for their services; and
- Is responsible to pay for all subcontracted services.

## Drugs

Contracted network pharmacies must be able to:

- Deliver home infused drugs in a form that can be easily administered in a clinically appropriate fashion;
- Provide infusible drugs for both short-term acute care and long-term chronic care therapies;
- Ensure that the professional services and ancillary supplies necessary for the provision of home infusion therapy are in place before dispensing home infusion drugs, consistent with the quality assurance requirement for Part D sponsors described in 42 CFR 423.153(c); and
- Provide covered home infusion drugs within 24 hours of discharge from an acute setting, unless the next required dose, as prescribed, is required to be administered later than 24 hours after discharge.

The drug HCPC code set is to be used for claim submission. NDC numbers should be submitted on the claim in the appropriate "additional information" locations on paper and electronic submissions. Refer to the MVPNDC Payment Policy for additional billing information.

Prior authorization is required to receive reimbursement for the administration of a drug that is not on the fee schedule. Reimbursement will be based on the drug pricing process below. Refer to your vendor fee schedule for a list of billable drug codes and to MVP's *Benefit Interpretation Manual* or [Prescription Drug Formulary](#) to determine if a specific medication requires prior authorization.

Medications that are self-administered are not reimbursable under Home Infusion. MVP will cover one home infusion nurse visit for the initial self-administration teaching, and one follow up visit if determined to be medically necessary. Charges for self-administered drugs are a pharmacy benefit and must be billed online to the pharmacy benefits manager. Supplies required for the administration of the drug during the teaching visit are global to the service and are not reimbursable separately.

MVP offers a Medicare Advantage Plan with and without Part D. Pharmaceuticals which are not covered under mandated medical benefits may be covered under the Part D Prescription Drug benefit if the member has that benefit. Ancillary Provider acknowledges that Ancillary Provider will be required to participate with MVP's or the member's Employer's Pharmacy Benefit Manager for MVP Part D.

## Billable Units

Billable Units represent the number of units in a product based on strength of the product per vial/ampule/syringe, etc., as it relates to the HCPCS or CPT Drug Code description. For example:

Code J0290 – Injection, ampicillin sodium, 500 mg

Injection, ampicillin sodium **500 mg/vial** = 1.0 billable unit

---

Injection, ampicillin sodium **1 gm/vial** = 2.0 billable units

Injection, ampicillin sodium **250 mg/vial** = 0.50 billable unit

Injection, ampicillin sodium **2 gm /vial** = 4.0 billable units

Injection, ampicillin sodium **125 mg/vial** = 0.25 billable unit

Injection, ampicillin sodium **10gm/vial** = 20.0 billable units

Billable Units per package are the number of units in the entire package as it relates to the HCPCS or CPT® drug code.

## **Wastage Policy**

In cases where therapy is terminated or interrupted, MVP will reimburse Ancillary Provider for drugs and supplies (per diem) which are dispensed to the Member and which are non-returnable, up to a seven-day supply. Drugs will be reimbursed at the contracted rate and the supplies (per diem) will be reimbursed at 50% of the contracted rate beginning on the first day of the termination or interruption. MVP will resume full reimbursement of drugs and supplies (per diem) on the first day services have resumed. Documentation must be available regarding interruption/discontinuation of therapy and resumption of therapy services.

## **TPN and Peripheral Parenteral Nutrition (PPN) Per Diem**

Standard TPN formula includes the following components: non-specialty amino acids, concentrated dextrose, sterile water, electrolytes, standard trace elements, standard multivitamins, and home additives including but not limited to insulin and heparin.

Components not included in standard TPN formula are specialty amino acids, lipids, Tagamet, and antibiotics. Such components are billed on claims with HCPCS medication codes, NDC number of covered medications, description of product, dosage, and units administered.

## **Medicare Variation**

All claims for enteral and parenteral products must meet the current NCD and/or LCD policies for coverage. All claims may be subject to retrospective review to determine coverage. Enteral nutrition which does not meet the coverage criteria identified in the NDC and/LCD and supplemental nutrition are not covered benefits under either Part B or Part D. Parenteral nutrition which does not meet the coverage criteria identified in the NCD and/or LCD may be covered under the Part D benefit.

Intradialytic Parenteral Nutrition (IDPN) is considered a Part D compound and must be billed to the pharmacy vendor. Intraperitoneal Nutrition (IPN) is considered a Part B benefit, even when a pharmacy or home infusion vendor adds amino acids or other ingredients to the dialysate. Non-covered drugs such as sterile water are part of the per diem and should not be billed independently.

Refer to the MVP Medicare Part D formulary for drugs that may be covered under the Part D benefit.

# Implantable Devices

## IMPLANTABLE DEVICES

Policy  
Definitions  
Notification/Prior Authorization Requests  
Reimbursement Guidelines  
Billing and Reimbursement Guidelines  
References  
Revision Summary  
History

### Policy

**Applies to:** Hospitals and Ambulatory Surgery Centers

**Applicable Plans:** All plans

MVP requires an invoice of the implantable device for reimbursement and reserves the right to request additional supporting documentation if necessary. The invoice submitted should clearly identify the applicable line item(s) corresponding to the implantable device billed.

When revenue codes 0274, 0275, 0276, or 0278 are billed, a HCPCS code that meets the definition of an Implant must be reported on the claim. If a HCPCS code is not submitted and/or an invoice is not submitted, the claim line(s) will be denied.

### Definitions

Implantable Devices or Implants is defined by the United States Food and Drug Administration (FDA) as “a device that is placed into a surgically or naturally formed cavity of the human body and is intended to remain there for a period of 30 days or more.”

Implants may include, but are not limited to, metal anchors, artificial joints, pins, plates, radioactive seeds, metal screws, shunts, and stents; and must remain in the patient’s body upon discharge from the inpatient stay or outpatient procedure. Implantable Devices or brachytherapy sources eligible for payment by MVP will have a CMS Status Indicator H (pass-through device) or K (brachytherapy sources).

### Notification/Prior Authorization Requests

MVP Payment Policies are not a guarantee of payment. Providers must also review MVP’s Utilization Management Guides to determine if prior authorization is required and can refer to the searchable PDF versions of Medical, Pharmacy and other Provider and Payment policies for guidelines. The current policies can be found [here](#).

### Billing and Reimbursement Guidelines

The following condition codes, value codes, and/or modifiers are required to report the respective circumstances they represent:

**Condition Codes:**

1. Condition Code 49: Product Replacement within Product Lifecycle - Replacement of a product earlier than the anticipated lifecycle due to premature failure, etc.
2. Condition code 50: Product Replacement for Known Recall of a Product - Manufacturer or FDA has identified the product for recall and is being replaced accordingly.
3. Condition code 53: Initial Placement of a Medical Device Provided as Part of a Clinical Trial or Free Sample – Provider has been issued a credit upon initial Implant placement as part of a clinical trial or a free sample.

#### **Value Codes:**

1. Value Code FD: Credit Received from the Manufacturer for a Medical Device

#### **Modifiers:**

1. Modifier FB: Items without cost to provider, supplier, or practitioner, or full credit received for replaced device (examples include but are not limited to devices covered under warranty, replaced due to defect, or furnished at zero dollars to provider)
2. Modifier FC: Partial credit for replaced device

#### **Use of C1889:**

For procedure codes that require the use of devices that are not described by a specific HCPCS code, hospitals should report HCPCS code C1889 (Implantable/insertable device, not otherwise classified) and charges for all devices that are used to perform the procedures.

Such devices must:

- Have received FDA marketing authorization, have received an FDA investigational device exemption (IDE) and have been classified as a Category B device by FDA in accordance with 405.203 through 405.207 and 405.211 through 405.215, or meets another appropriate FDA exemption from premarket review;
- Be an integral part of the service furnished;
- Be used for one patient only;
- Come in contact with human tissue;
- Be surgically implanted or inserted (either permanently or temporarily); and
- Not be either of the following:
  - A. Equipment, an instrument, apparatus, implement, or item of the type for which depreciation and financing expenses are recovered as depreciable assets.
  - B. A material or supply furnished to a service (for example, a suture, customized surgical kit, scalpel, or clip, other than a radiological site marker).

#### **Examples of HCPCS Codes That Do Not Meet the FDA Definition of an Implant\***

HCPCS codes that do not qualify as a medical device and/or implant according to the FDA and are therefore excluded from reimbursement include, but are not limited to, the following:

C1724 C1725 C1726 C1727 C1728 C1729 C1730 C1731 C1732 C1733 C1750 C1751 C1752 C1753 C1754 C1755 C1756 C1757 C1758 C1759 C1764 C1765 C1766 C1769 C1773 C1782 C1819 C1884 C1885 C1886 C1887 C1892 C1893 C1894 C2614 C2615 C2618 C2628 C2629 C2630

\*This list is subject to change based on FDA guidance. MVP will use the most current FDA information available when deciding whether a device meets the requirements for payment.

#### **Other Exclusions:**

- Materials, liquids, and allografts that are dissolved/absorbed/resorbed/remodeled, such as sealants, hemostats, topical thrombin's, bone morphogenetic protein, bone putty or cement, catheters, staples, and clips; these are generally considered supplies and do not meet the definition of Implants for reimbursement.
- Single use/disposable instruments or supplies do not meet the definition of Implants for reimbursement.
- Provider or vendor administrative storage and delivery costs are not separately reimbursable.
- Cardiac and vascular catheters and guide wires billed separately regardless of the amount billed are not separately reimbursable.

The following circumstances will disqualify any Implant from payment. Providers cannot bill MVP or MVP Members for these items:

- 1. Implants obtained by the provider at no cost or reduced cost. (See additional information below on use of appropriate condition codes, value codes, and/or modifiers.)
- 2. Implants that are contaminated or unused and/or were not implanted in the patient. Examples include:
  - Items that were prepared or opened during a surgical case but not used or implanted into the patient
  - Items opened in error
  - Surgeon “change of mind”
  - Technical or equipment failure/difficulties
  - Surgery case cancellation
  - Multi-pack implants when more appropriate unit sizes can be purchased

## Incident to Guidelines

### INCIDENT TO GUIDELINES

Policy  
Notification/Prior Authorization Requests  
References  
Summary  
History

### Policy

MVP Health Care follows the CMS Incident to guidelines in full for all lines of business. Summarized content is provided in this policy for Provider convenience, and the complete guidelines are publicly accessible for complete review. Please see the references below.

#### Services provided in a Physician's office:

Incident to a physician's professional services means that the services or supplies are furnished as an integral, although incidental, part of the physician's personal professional services during diagnosis or treatment of an injury or illness.

Supplies usually furnished by the physician in the course of performing his/her services, e.g., gauze, ointments, bandages, and oxygen, are also covered. Charges for such services and supplies must be included in the physicians' bills. To be covered, supplies, including drugs and biologicals, must represent an expense to the physician or legal entity billing for the services or supplies. For example, where a patient purchases a drug and the physician administers it, the cost of the drug is not covered. However, the administration of the drug, regardless of the source, is a service that represents an expense to the physician. Therefore, administration of the drug is payable if the drug would have been covered if the physician purchased it.

#### Direct, or Virtual Direct, Personal Supervision:

Coverage of services and supplies incident to the professional services of a physician in private practice is limited to situations in which there is direct physician supervision or virtual direct supervision of auxiliary personnel.

Auxiliary personnel means any individual who is acting under the supervision of a physician, regardless of whether the individual is an employee, leased employee, or independent contractor of the physician, or of the legal entity that employs or contracts with the physician. Likewise, the supervising physician may be an employee, leased employee or independent contractor of the legal entity billing and receiving payment for the services or supplies.

Direct, or virtual, supervision in the office setting does not mean that the physician must be present in the same room with his or her aide. However, the physician must be present in the office suite, or available through real-time, audio-visual technology, and immediately available to provide assistance and direction throughout the time the aide is performing services. If auxiliary personnel perform services outside the office setting, e.g., in a patient's home or in an institution (other than hospital or SNF), their services are covered incident to a physician's service only if there is direct supervision by the physician.

Services provided by auxiliary personnel in an institution (e.g., nursing, or convalescent home) present a special problem in determining whether direct, or virtual, physician supervision exists. The availability of the physician by

audio-visual technology and the presence of the physician somewhere in the institution does not constitute direct supervision.

### **Services of Nonphysician Personnel Provided Incident To Physician's Services:**

Services performed by nonphysician licensed practitioners (certified nurse midwives, clinical psychologists, clinical social workers, physician assistants, nurse practitioners, and clinical nurse specialists) incident to a physician's professional services include not only services ordinarily rendered by a physician's office staff person (e.g., medical services such as taking blood pressures and temperatures, giving injections, and changing dressings) but also services ordinarily performed by the physician such as minor surgery, setting casts or simple fractures, reading xrays, and other activities that involve evaluation or treatment of a patient's condition.

For services of a nonphysician practitioner to be covered as incident to the services of a physician, the services must meet all the requirements for coverage specified in this policy. For example, the services must be an integral, although incidental, part of the physician's personal professional services, and they must be performed under the physician's direct supervision.

### **Incident To Physician's Services in Clinic:**

A physician directed clinic is one where:

1. A physician (or a number of physicians) is present to perform medical (rather than administrative) services at all times the clinic is open;
2. Each patient is under the care of a clinic physician; and
3. The nonphysician services are under medical supervision.

In most clinics, direct physician supervision may be the responsibility of several physicians as opposed to an individual attending physician. In this situation the physician ordering a particular service need not be the physician who is supervising the service.

Supplies provided by the clinic during the course of treatment are also covered. When the auxiliary personnel perform services outside the clinic premises, the services are covered only if performed under the direct supervision of a clinic physician. If the clinic refers a patient for auxiliary services performed by personnel who are not supervised by clinic physicians, such services are not incident to a physician's service.

### **Incident to Services for Behavioral Health:**

MVP Health Care covers the services of CP, CSW, CNS, NP, PA, and CNM and supplies as an incident to professional services of a physician or other specified NPP, the same as an MD or a DO with the same requirements listed in this policy.

## **Notification/Prior Authorization Requests**

MVP Payment Policies are not a guarantee of payment. Providers must also review MVP's Utilization Management Guides to determine if prior authorization is required and can refer to the searchable PDF versions of Medical, Pharmacy and other Provider and Payment policies for guidelines. The current policies can be found [here](#).

# Infusion Policy

Last Reviewed Date: June 1, 2023

## INFUSION POLICY

Policy  
Definitions  
Notification/Prior Authorization Requests  
Billing/Coding Guidelines  
References  
History

---

## Policy

MVP reimburses providers for the following infusion services when provided in a contracted office, or outpatient setting, only on the days members receives IV therapy services:

- Administration of the medication
- Medication (not self-administered)

## Definitions

### Infusion Therapy

Infusion therapy is the continuous, controlled administration of a drug, nutrient, antibiotic, or other fluid into a vein or other tissue on a daily, weekly, or monthly basis, depending on the condition being treated and the type of therapy.

### Medical Necessity for Infusion Therapy

Infused drug is determined to meet medical necessity criteria for infusion in office or outpatient facility site when home infusion is the preferred site of care. Refer to MVP Pharmacy policies for drugs subject to this requirement.

### Types of Infusion

Push Technique: When medication is injected through a catheter placed in a vein or artery.

Intrathecal: When medication is injected into the spinal cord through a catheter placed through the space between the lower back bones (via lumbar puncture).

### Medical Necessity for Infusion Therapy

Therapeutic (hydration or medication therapy – e.g., chemotherapy, IVIG)

Prophylactic (Injections/infusions to prevent “side effects” – e.g., ondansetron)

Diagnostic (evocative/provocative testing; cortisol stimulation testing)

### Types of Therapy

- Therapeutic (hydration or medication therapy – e.g., chemotherapy, IVIG)
- Prophylactic (Injections/infusions to prevent “side effects” – e.g., ondansetron)
- Nutritional (Parenteral / Enteral)

## Notification/Prior Authorization Requests

MVP Payment Policies are not a guarantee of payment. Providers must also review MVP's Utilization Management Guides to determine if prior authorization is required and can refer to the searchable PDF versions of Medical, Pharmacy and other Provider and Payment policies for guidelines. The current policies can be found [here](#).

## Billing/Coding Guidelines

### Drugs/Medications

MVP requires all providers to bill using the standard HCPCS and also the 11-digit National Drug Code (NDC) which represents the drug and drug strength, manufacturer and package size used/administered.

Some medications require prior authorization. Refer to the MVP Formulary for specific drugs that require prior authorization.

MVP will provide coverage for drugs that meet medical necessity criteria and meet the site of care requirements noted in this policy.

Administration of the drug via injection/infusion is medically necessary when the member's condition cannot be appropriately treated with alternative dosage forms of medication (e.g. oral, topical or SQ) or the therapy is not available in alternative dosage forms and achieve the same or equivalent therapeutic effect.

All components of the infusion/injection must meet medical necessity criteria and be medically necessary for the member's condition for the infusion/injection to be covered.

Medications that can be self-administered will be billed under Member's pharmacy benefit.

### J0640 (Leucovorin) and J0641 (Fusilev)

These medications are classified as therapeutic. The following administration codes will be allowed when billing for these two codes:

#### J0640 (Leucovorin)

|       |                                                                                                                                     |
|-------|-------------------------------------------------------------------------------------------------------------------------------------|
| 96372 | Therapeutic, prophylactic, or diagnostic injection (specify substance or drug); subcutaneous or intramuscular.                      |
| 96374 | Therapeutic, prophylactic, or diagnostic injection (specify substance or drug); intravenous push, single or initial substance/drug. |

#### J0641 (Fusilev) (requires prior authorization)

|       |                                                                                                                                                                             |
|-------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 96365 | Intravenous infusion, for therapy, prophylaxis, or diagnosis (specify substance or drug); initial, up to 1 hour.                                                            |
| 96366 | Intravenous infusion, for therapy, prophylaxis, or diagnosis (specify substance or drug); each additional hour (List separately in addition to code for primary procedure). |

## Miscellaneous Drug Codes

| Code                                                                 | Description                     | Rule                                                                                                                                                                                |
|----------------------------------------------------------------------|---------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| A9699, J3490, J3590, J7199, J7599, J7699, J7799, J8499, J8999, J9999 | <b>Miscellaneous drug codes</b> | Drugs over \$50 must be reviewed by MVP and 1 of the following pieces of information must be submitted:<br>• An invoice for the drug must be submitted with the claim.<br><b>OR</b> |

• A valid NDC number for the drug is required to be submitted on the claim. This is a list of most commonly used miscellaneous drug codes; however, it is subject to change and should not be considered all inclusive.

Items excluded and are non-reimbursable, include but are not limited to:

- Diluents/solution for administration of medication
- Flushing solution including heparin and saline

Refer to the MVP Formulary for medications that must be obtained from MVP's specialty pharmacy vendor. Diagnosis and quantity edits apply only when drugs are billed directly to MVP using the applicable J-code. Peripherally Inserted Central Catheter (PICC) Line placement does not guarantee approval or payment of the medication to be infused if medication does not meet medical necessity criteria or requires prior authorization.

Drugs determined to be self-administrable and eligible for coverage under the Prescription Drug benefit.

### **Medicare Variation**

All claims for enteral and parenteral products must meet the current NCD and/or LCD policies for coverage. All claims may be subject to retrospective review to determine coverage. Enteral nutrition which does not meet the coverage criteria identified in the NCD and/LCD and supplemental nutrition are not covered benefits under either Part B or Part D.

Parenteral nutrition, which does not meet the coverage criteria identified in the NCD and/or LCD, may be covered under the Part D benefit.

Intradialytic Parenteral Nutrition (IDPN) is considered a Part D compound and must be billed to the pharmacy vendor. Intraperitoneal Nutrition (IPN) is considered a Part B benefit, even when a pharmacy or home infusion vendor adds amino acids or other ingredients to the dialysate. Non-covered drugs such as sterile water are part of the per diem and should not be billed independently.

### **Medicaid Variation**

For medical benefit drugs, buy and bill is the preferred method of obtaining. If provider is unable to buy and bill, provider can work with MVP's preferred specialty pharmacy CVS Specialty to obtain the drug. CVS Specialty will then bill MVP via a medical claim. If CVS Specialty is unable to provide the medication, such as limited distribution drugs, MVP would consider a single case agreement with an alternative pharmacy.

# Interpreter Services

## Medicaid Products

Last Reviewed Date: February 1, 2025

### INTERPRETER SERVICES

Policy  
Notification/Prior Authorization Requests  
Billing/Coding Guidelines  
Reimbursement Guidelines  
References  
History

---

## Policy

The need for medical language interpreter services must be documented in the medical record and must be provided during a medical visit by a third-party interpreter, who is either employed by or contracts with the Medicaid Provider.

These services may be provided either face-to-face or by telephone. The interpreter must demonstrate competency and skills in medical interpretation techniques, ethics, and terminology. It is recommended, but not required, that such individuals be recognized by the National Board of Certification for Medical Interpreters (NBCMI).

## Notification/Prior Authorization Requests

MVP Payment Policies are not a guarantee of payment. Providers must also review MVP's Utilization Management Guides to determine if prior authorization is required and can refer to the searchable PDF versions of Medical, Pharmacy and other Provider and Payment policies for guidelines. The current policies can be found [here](#).

## Billing/Coding Guidelines

Reimbursement of medical language interpreter services is payable with HCPCS procedure code T1013 - sign language and oral interpretation services and is billable during a medical visit. Medical language interpreter services are included in the prospective payment system rate for those FQHCs that do not participate in APG reimbursement.

### Reimbursement for units is as follows:

---

|              |                                                                                            |
|--------------|--------------------------------------------------------------------------------------------|
| <b>T1013</b> | Includes a minimum of eight and up to 22 minutes of medical language interpreter services. |
|--------------|--------------------------------------------------------------------------------------------|

---

|              |                                                                                    |
|--------------|------------------------------------------------------------------------------------|
| <b>T1013</b> | Includes a minimum of 23 or more minutes of medical language interpreter services. |
|--------------|------------------------------------------------------------------------------------|

Code T1013 must be billed in units of two to be reimbursed at the appropriate rate.

Reimbursement is limited to Medicaid products only. All other MVP products will deny, as these services are not reimbursable.

## Reimbursement Guidelines

Please see your Provider fee schedule or your IPA agreement for specific reimbursement guidelines.

# JW and JZ Modifiers

Last Reviewed Date: February 1, 2025

### JW AND JZ MODIFIERS

Policy  
Definitions  
Notification/Prior Authorization Requests  
Billing/Coding Guidelines  
References  
History

---

## Policy

MVP encourages physicians, hospitals, and other Providers and suppliers to schedule patients in such a way that they can administer drugs or biologicals efficiently and in a clinically appropriate manner and minimize the amount of drug wastage.

When a physician, hospital, other Providers or other supplier must discard the remainder of a single use vial or other single use package after administering a dose/quantity of the drug or biological, payment will be made for the amount of the drug or biological discarded as well as the dose administered, up to the amount of the drug or biological as indicated on the vial or package label.

## Notification/Prior Authorization Requests

MVP Payment Policies are not a guarantee of payment. Providers must also review MVP's Utilization Management Guides to determine if prior authorization is required and can refer to the searchable PDF versions of Medical, Pharmacy and other Provider and Payment policies for guidelines. The current policies can be found [here](#).

## Billing/Coding Guidelines

JW modifier must be used to identify unused drugs or biologicals from single use vials or single use packages that are appropriately discarded. The use of this modifier is not appropriate for drugs that are from multiple-dose containers. This modifier provides payment for the amount of drug or biological (hereafter "drug") discarded along with the amount administered up to the amount of the drug or biological indicated on the vial or package label. The smallest vial or package size needed to administer the appropriate dose should be used.

This JW modifier must be billed on a separate line and will provide payment for the amount of the discarded drug or biological. Drug wastage must be documented in the patient's medical record with the date, time, amount wasted, and reason for wastage. Upon review, any discrepancy between amount administered to the patient and amount billed may be denied as non-rendered unless the wastage is clearly and accurately documented. The amount billed as "wasted" must not be administered to another patient or billed to either MVP or another carrier. Drug wastage cannot be billed if none of the drug was administered (e.g., missed appointment).

Under Medicare Part B only, the JZ modifier must be reported on a claim to attest that no amount of drug was discarded and eligible for payment. The JZ modifier is required when there are no discarded amounts of a single-dose container drug for which the JW modifier would be required if there were discarded amounts. The JZ modifier is required on claims for single-dose container drugs to attest when there are no discarded amounts as of July 1, 2023.

### Example of when JW Modifier IS required:

A single use vial that is labeled to contain 100 units of a drug has 95 units administered to the patient and five units discarded. The 95-unit dose is billed on one line, while the discarded five units may be billed on another line by using the JW modifier. Both line items would process for payment.

**Example of when JW Modifier IS NOT required and JZ Modifier IS required if under Medicare Part B:**

A billing unit for a single drug is equal to 10mg. A 7mg dose is administered to a patient and 3mg is discarded. The 7mg dose is billed as 10mg on a single line item because the billing unit for this drug is already established at 10mg regardless of how much was administered. The claim would be processed as a single line item for 10mg, which includes the 7mg administered and the 3mg discarded. Billing another unit on a separate line item with the JW modifier for the discarded 3mg of the drug is not permitted because it has already been accounted for. In this example, the actual dose of the drug or biological being administered is less than the billing unit so the JW modifier would not apply. To attest that there was no waste, a JZ Modifier must be submitted.

# Locum Tenens

**Effective Date: October 1, 2025**

### LOCUM TENENS

Policy  
Definitions  
Notification/Prior Authorization Requests  
Billing/Coding Guidelines  
References  
History

---

## Policy

### Locum Tenens for a physician under leave of absence:

Participating Provider physicians may retain substitute physicians to take over their professional practices when the Participating Provider physicians are temporarily out of office for personal time (e.g. vacation) or require an extended leave of absence for reasons such as illness, pregnancy, deployment in armed forces, or continuing medical education. The Participating Provider physician can bill and receive payment for the substitute physician's Covered Services as though they performed the Covered Services themselves. The Locum Tenens cannot be an employee of the regular Participating Provider and should be paid for their services on a per diem or similar fee-for-time basis. Locum Tenens may only substitute for a Participating Provider physician for a maximum of 60 days. Locum Tenens can also cover for Participating Provider Physical Therapists. The Locum Tenens, if substituting for a Participating Provider who left a practice, must be contracted and credentialed with MVP and bill under their own provider NPI, and will be reimbursed per the terms of the Provider Agreement with MVP. At MVP's sole discretion and any applicable Medicare Requirements, Participating Provider practice in a health professional shortage area, medically under-served area, or rural area may request an exception to this policy. If approved by MVP, the Locum Tenens provider is limited to the 60 days and is required to meet all MVP Registration requirements (in lieu of full Credentialing). The Locum Tenens provider is required to abide by all MVP Protocols including the Benefits Interpretation Manual, Provider Policies and Payment Policies.

## Definitions

### Locum Tenens or Substitute Physician

A substitute physician who works in place of a Regular Physician when the Regular Physician has taken a leave of absence.

### Regular Physician

Includes a Participating Provider physician (or Physical Therapist) who is absent for reasons such as illness, pregnancy, vacation, deployment in armed forces, or continuing medical education.

## Notification/Prior Authorization Requests

MVP Payment Policies are not a guarantee of payment. Providers must also review MVP's Utilization Management Guides to determine if prior authorization is required and can refer to the searchable PDF versions of Medical, Pharmacy and other Provider and Payment policies for guidelines. The current policies can be found [here](#).

## Billing/Coding Guidelines

All claims for Covered Services should be submitted under the Member's Regular Physician. MVP will report any serious or significant health and safety concerns to OMH and OASAS immediately upon discovery, performed by a Locum Tenens provider. The Covered Services performed by a Locum Tenens are not restricted to the Regular Physician's office if the following guidelines are met:

- The Member had arranged or seeks to receive the Covered Services from the Regular Physician
- The Regular Physician pays the Locum Tenens for their services on a per diem or similar fee-for-time basis
- The Locum Tenens does not provide Covered Services to Members over a continuous period of more than sixty (60) days. If there is a break after the initial 60 days of Locum Tenens service, the same Locum Tenens may be used to provide services again

The Regular Physician must bill using their NPI and enter the HCPCS Q6 modifier (services furnished by a Locum Tenens physician) after the procedure code. If the only Covered Services performed by a Locum Tenens are postoperative Covered Services furnished during the post-operative period covered, such Covered Services, HCPCS Q6 modifier is not required.

### **Participating Provider Group Claims**

Participating Provider Groups submitting claims for Covered Services provided to Members by a Locum Tenens physician for a Regular Physician must meet the requirements set forth in this Policy. For purposes of these requirements, per diem or similar fee-for-time compensation that the Participating Provider group pays the Locum Tenens physician is considered paid by the Regular Physician.

Participating Provider Groups must keep accurate files of Covered Services provided by the Locum Tenens physician associated with the Locum Tenens physician's NPI and make this record available upon request.

### **Billing/Coding Guidelines for Locum Tenens for Physician Who has Left the Practice**

Except as outline in this policy, Locum Tenens may not be used on a per-diem or similar fee-for-time basis to provide Covered Services on a temporary basis when a Participating Provider has left the practice. Providers filling in for a Participating Provider who has left the practice must follow all applicable MVP Credentialing or Registrations requirements based on their specialty and location of practice.

## MVP Health Care Payment Policy

---

# Mental Health and Substance Use Disorder

**Related Policies–MVP Behavioral Health Policy**  
**MVP Claims Section**

## MENTAL HEALTH AND SUBSTANCE USE DISORDER

Policy  
Definitions  
Billing/Coding Guidelines  
Notification/Prior Authorization Requests  
References  
Summary  
History

---

## Policy

This policy summarizes regulatory and administrative requirements needed for behavioral health claims to be reimbursed and applies to all MVP lines of business, with any exceptions noted below. Covered Services and payments are based on the Member's Subscriber Contract and the terms and conditions in the Provider's participation agreement. In addition to this policy, MVP uses claims payment rules supported by the American Medical Association, National Correct Coding Initiative, ClaimsXten, and other MVP administrative guidelines. For specific NYS Medicaid Managed Care CPT codes and rate codes by services, MVP follows the applicable State and Federal guidance.

## Mental Health Parity

In accordance with federal and state laws and regulations, MVP has conducted non-quantitative treatment limitation ("NQTL") comparability and stringency analyses. MVP maintains these NQTL and other parity standards as operational policies that align with the Mental Health Parity and Addiction Equity Act of 2008 ("MHPAEA"), the Consolidated Appropriations Act of 2021, and various guidance issued by the NYS Department of Financial Services (DFS), NYS Department of Health (DOH), NYS Office of Mental Health (OMH), and the U.S. Department of Labor.

## Billing/Coding Guidelines

All Behavioral Health Participating Providers must submit claims using the correct forms and CPT and HCPCS codes and billing guidelines. For those benefits covered by Commercial plans, MVP follows Medicare Advantage payment rules unless otherwise specified in the Provider Contract, or applicable State or Federal law, rule or regulations, or as outlined below. Medicaid, HARP and CHP reimbursement follow all relevant State-specific guidance and requirements and can be found below.

## Adult Behavioral Health Home and Community Based Services (BH HCBS)

Services may only be billed for HARP Members meeting eligibility requirements as defined by NYS. Specific billing and coding requirements are attributable to all HCBS services and must follow NYS billing guidelines, including transportation requirements.

## Ambulatory Behavioral Health Services

Ambulatory Behavioral Health Services including, but not limited to Assertive Community Treatment (ACT), OMH licensed and OASAS Certified clinics, Continuing Day Treatment (CDT), Comprehensive Psychiatric Emergency Program (CPEP), Intensive Psychiatric Rehabilitation Treatment (IPRT), Partial Hospitalization (PHP) and Personalized Recovered Oriented Services (PROS), shall be reimbursed using APG rate-setting methodology or other government

rates established and published by OMH and/or OASAS. The lesser of billed charges or the rates set forth in the Provider Services Agreement or fee schedules, is not applicable to claims reimbursed using the APG methodology.

### **Article 29-I Health Facility (VFCA) Services**

Article 29-I Health Facility services are available to Managed Medicaid under the age of 21 (effective July 1, 2021) and CHP Members (effective January 1, 2023). Specific billing and coding requirements are attributable to 29-I Health facilities. 29-I Health facilities must follow New York States 29-I Health Facility Billing guidelines which can be found under 29-I Health Facility Rates and Billing Guidance at [health.ny.gov/health\\_care/medicaid/redesign/behavioral\\_health/children/vol\\_foster\\_trans.htm](https://health.ny.gov/health_care/medicaid/redesign/behavioral_health/children/vol_foster_trans.htm)

### **Assertive Community Treatment (ACT), Young Adult and Youth Assertive Community Treatment**

ACT, Young Adult ACT and Youth ACT services must be billed in accordance with NYS Billing guidelines. Effective January 1, 2023, ACT, Youth ACT and Young Adult ACT services are also available to CHP Members and must be billed in accordance with NYS Billing guidelines.

### **Children's Family Treatment and Support Services (CFTSS)**

CFTSS Services may only be billed for Managed Medicaid Members under the age of 21 that meet applicable medical necessity criteria. CFTSS services must follow the specific billing and coding requirements indicated within the NYS Children and Family Treatment and Support Services Provider Manual. Effective January 1, 2023, CFTSS services are also available to CHP Members and must be billed in accordance with the same billing guidance. See [Children and Family Treatment and Support Services \(ny.gov\)](https://www.health.ny.gov/health_care/medicaid/redesign/behavioral_health/children/vol_foster_trans.htm)

In addition, effective for dates of service beginning December 1, 2023, CFTSS services must include the applicable value code and Federal Information Processing Standard (FIPS) or Proxy Locator Code that identifies where the Member received services in order to be reimbursed.

### **Children's HCBS**

Children's HCBS Services may only be billed for Members under the age of 21 that are eligible for waiver services. Effective January 1, 2025, Children's HCBS service were expanded to CHP members that meet eligibility and medical necessity criteria. Specific billing and coding requirements are attributable to all Children's HCBS services and must follow NYS Children's HCBS Provider Manual. Both the billing guidance and Allowable Service combinations can be found in the [HCBS Provider Manuals and Rates \(ny.gov\)](https://www.health.ny.gov/health_care/medicaid/redesign/behavioral_health/children/vol_foster_trans.htm)

Per NYS guidance, effective for dates of service beginning December 1, 2023, Children's HCBS services must include the applicable value code and Federal Information Processing Standard (FIPS) or Proxy Locator Code that identifies where the Member received services in order to be reimbursed. This requirement is applicable to both Managed Medicaid and CHP members.

Additionally, NYS Department of Health now requires an Electronic Visit Verification (EVV) for certain Children's HCBS services. Please refer to NYS guidance available at [https://www.health.ny.gov/health\\_care/medicaid/redesign/evv/repository/app\\_billing\\_codes.htm](https://www.health.ny.gov/health_care/medicaid/redesign/evv/repository/app_billing_codes.htm) for the applicable billing codes and guidance, as well as any updates that may occur (see also MVP EVV Payment Policy).

### **Community Health Workers (CHW)**

Beginning January 1, 2024, CHW services provided in accordance with NYS CHW program guidance are covered for Medicaid Managed Care and HARP members. CHW services must be billed in accordance with NYS billing guidance to be eligible for reimbursement. Additional information on CHW program and billing guidance can be found at [health.ny.gov/health\\_care/medicaid/redesign/evv/repository/app\\_billing\\_codes.htm](https://www.health.ny.gov/health_care/medicaid/redesign/evv/repository/app_billing_codes.htm)

## **Community Oriented Recovery and Empowerment Services (CORE)**

Services may only be billed for HARP Members. Specific billing and coding requirements are attributable to all CORE services and must follow NYS billing guidelines. CORE and BH HCBS Allowable Service Combinations and the CORE and other OASAS/OMH Service Allowable combinations can be found in the NYS CORE Billing guide. See <https://omh.ny.gov/omhweb/bho/core/>

## **Comprehensive Psychiatric Emergency Program (CPEP)**

All CPEP services must be billed in accordance with NYS billing guidance. CPEP programs designated for Mobile Crisis Services may provide and be reimbursed for Mobile Crisis services for adults and children in accordance with the New York State Crisis Intervention State Plan Amendment (#22-0026). CPEP programs must bill with the applicable Mobile Crisis rate codes, procedures, and modifier combinations per NYS guidelines. In addition, effective July 1, 2023, per updated guidance, Rate code 4010 was discontinued and is not reimbursable. Effective July 1, 2024, Rate code 4009 was retired and ineligible for reimbursement.

## **Crisis Residence**

Effective March 1, 2024, claims submitted for Crisis Residence Services for both Children and Adults must be billed in accordance with the NYS Crisis Intervention State Plan Amendment. NYS Rate codes 4625-4627 and their associated procedure codes and modifiers will apply for both children and adults. There are no longer different requirements for individuals ages 18-20, effective retroactive to April 1, 2022. Crisis Residence rate code 7943-7945 were retired as of May 1, 2024.

## **Electroconvulsive Therapy (ECT)**

MVP will reimburse for electroconvulsive therapy when performed by a psychiatrist.

## **Evaluation and Management (E&M) Codes**

MVP will reimburse psychiatrists and psychiatric nurse practitioners according to the terms of their agreements with MVP. We expect claims to be submitted with the appropriate outpatient E&M CPT code selected from the E&M code range.

## **Gambling Disorder Treatment**

In accordance with NYS guidance, Providers must have the OASAS Gambling Designation to be eligible for reimbursement when providing problem gambling only services for Government program Members.

## **Inpatient Treatment**

Medically necessary inpatient care is covered.

## **Outpatient Treatment**

Medically necessary diagnostic and treatment services provided by Mental Health Outpatient Treatment and Rehabilitative Services (MHOTRS) and OASAS clinics, physicians, including psychiatrists, as well as clinical psychologists, social workers, psychiatric nurse specialists, nurse practitioners, licensed professional counselor physicians' assistants are covered.

## **Partial Hospitalization**

Partial hospitalization services must be provided under the direct supervision of a physician pursuant to an individualized treatment plan, and the services must be essential for treatment of the patient's condition.

### **Personalized Recovery Oriented Services (PROS)**

PROS may be billed for Managed Medicaid or HARP Members that are 18 or over which meet applicable medical necessity criteria. PROS services must be billed in accordance with NYS billing guidelines to be reimbursable.

### **Psychological and Neuropsychological Testing**

MVP will reimburse licensed physicians, doctorate-level psychologists, and qualified technicians for psychological and neuropsychological testing.

### **Residential Rehabilitation Services for Youth (RRSY)**

Effective April 1, 2023, RRSY is a covered service for CHP members. RRSY services must be billed with rate code 4210.

### **Residential Treatment Centers (RTC)**

Medically necessary treatment provided in RTCs is covered, determined by line of business for which the Member is covered. Mental Health Residential is not covered for CHP, Medicaid Managed Care Plans, or Medicare Advantage Plans (including D-SNP). Substance Use Residential is not covered for Medicare Advantage Plans (including D-SNP).

Accepted Bill Types and Revenue codes for Managed Medicaid, CHP and HARP Members for Part 820 Residential Substance Use programs:

Bill Types: 731,762,763,861,086,891

Revenue Codes: 0900.0902.0911.0914.0944.0945.1002

### **Transcranial Magnetic Stimulation (TMS)**

MVP will reimburse psychiatrists for Transcranial Magnetic Stimulation.

### **Managed Medicaid, CHP, and HARP Variations:**

All billing for Behavioral Health Services for Managed Medicaid, CHP and HARP Members must follow the New York State OMH 14 NYCRR Part 599 Clinic Treatment Programs Interpretive/Implementation Guidance, OASAS APG Clinical and Medicaid Billing Guidance, HARP/Mainstream Behavioral Health Billing and Coding Manual, CORE Benefit and Billing Guidance, Children's HCBS Provider Manual, Children and Family Treatment and Support Services Provider Manual and/or 291 Health Facility Billing Guidance as applicable to the service being rendered.

Billing requirements are specific to service and facility type.

### **Claims**

Electronic claims for the mental health or substance use programs outlined above will be submitted using the 837i (institutional) claim form. This will allow for use of rate codes which will inform the Plans as to the type of behavioral health program submitting the claim and the service(s) being provided. Rate code will be a required input to MEDS (the Medicaid Encounter Data System) for all outpatient MH/SUD services. Therefore, the Plan must accept rate code on all behavioral health outpatient claims and pass that rate code to MEDS. All other services will be reported to MEDS using the definitions in the MEDS manual.

Providers will enter the rate code in the header of the claim as a value code. This is done in the value code field by first typing in "24" and following that immediately with the appropriate four-digit rate code. This is the standard mechanism historically and currently used in Medicaid FFS billing.

Billing requirements depend on the type of service provided; however, every electronic claim submitted will require at least the following:

- Use of the 837i claim form;
- Medicaid fee-for-service rate code;
- Valid procedure code(s);
- Procedure code modifiers (as needed); and
- Units of service

As of December 1, 2023, CHCBS and CFTSS services must include the applicable value code and Federal Information Processing Standard (FIPS) or Proxy Locator Code that identifies where the Member received services in order to be reimbursed:

**When billing electronically**, Value code 24 and the rate code for the CHCBS or CFTSS service are to be entered in field 39A; the rate code is input into the amount field. Value code 85 and the FIPS code are to be entered into field 40A; the 5-digit FIPS code is input into the amount field.

**When billing paper claims**, Value code 24 and the rate code are to be entered into field 39A; the rate code is input into the amount field. Value code 61 and the 3-digit county locator code are to be entered in field 40A.

For additional information on claims, please review the MVP Claims section.

## Notification/Prior Authorization Requests

MVP Payment Policies are not a guarantee of payment. Providers must also review MVP's Utilization Management Guides to determine if prior authorization is required and can refer to the searchable PDF versions of Medical, Pharmacy and other Provider and Payment policies for guidelines. The current policies can be found [here](#).

# Modifier Policy for Physician

Last Reviewed Date: May 1, 2025

## MODIFIER POLICY FOR PHYSICIAN

- Policy
- Definitions
- Process for Documentation Submission
- Notification/Prior Authorization Requests
- Billing/Coding Guidelines
- References
- History

## Policy

MVP reimburses for modifiers when billed in accordance with CMS guidelines for Assistant at Surgery Services. but also applies appropriate clinical edits for certain modifiers listed below. In certain circumstances, MVP will recognize the use of modifiers to provide additional clarification regarding services provided. See Billing/Coding Guidelines below for Modifier Guidance. Modifiers should not be used to bypass an edit. For modifiers that require documentation, the documentation should always support the use of each modifier.

## Definitions

A modifier indicates that the service or procedure performed has been altered by some specific circumstance but not changed the underlying definition or code for the service or procedure.

## Process for Documentation Submission

Paper claim submission is preferable to electronic submission, as documentation can be submitted along with the paper claim. If a claim is submitted without documentation and denied, a Provider may use a Claim Adjustment Request Form (CARF) to appeal the denial and submit clinical and other supporting documentation .

As all documentation is scanned into MVP's system; it is preferred if the specific portion of included in the documentation that supports the request is underlined, starred, or bracketed rather than highlighted. Highlighting may result in sections being blacked out when they are scanned.

## Notification/Prior Authorization Requests

MVP Payment Policies are not a guarantee of payment. Providers must also review MVP's Utilization Management Guides to determine if prior authorization is required and can refer to the searchable PDF versions of Medical, Pharmacy and other Provider and Payment policies for guidelines. The current policies can be found [here](#).

| <b>Modifier 25</b> | <b>Description</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
|                    | <p>This modifier is used when a procedure or service identified by a CPT code was performed due to the fact that the patient's condition required a significant, separate, identifiable Evaluation and Management Service by the same physician above and beyond the other service provided or beyond the usual preoperative and postoperative care associated with the procedure that was performed.</p> <p><b>Rule</b></p> <p><b>Preventive and E&amp;M</b></p> <p>Documentation that satisfies the relevant criteria for both evaluation and management services and procedures to be reported will be required in the patient's medical record. Documentation is not required up front but may be requested on audit.</p> <p><b>E&amp;M and Office Procedure</b></p> <p>Documentation that satisfies the relevant criteria for the respective E&amp;M service and procedure to be reported will be required in the patient's chart. Documentation is not required up front but may be requested on audit.</p> <p><b>Reimbursement</b></p> <p>Claims that are determined to meet the clinical criteria as a separate identifiable procedure will be paid at the physician contracted fee schedule.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

**Primary considerations for modifier 25 usages are:**

- Why is the physician seeing the patient?
- Could the complaint or problem stand alone as a billable service; and did you perform and document
- the key components of a problem-oriented E/M service for the complaint or problem?

If the patient exhibits symptoms from which the physician diagnoses the condition and begins treatment by performing a minor procedure or an endoscopy on that same day, modifier 25 should be added to the correct level of E/M service.

If the patient is present for the minor procedure or endoscopy only, modifier 25 does not apply.

If the E/M service was to familiarize the patient with the minor procedure or endoscopy immediately before the procedure, modifier 25 does not apply.

If the E/M service is related to the decision to perform a major procedure (90-day global), modifier 25 is not appropriate. The correct modifier is modifier 57, decision for surgery.

When determining the level of visit to bill when modifier 25 is used, physicians should consider only the content and time associated with the separate E/M service, not the content or time of the procedure.

If during a well/preventive care visit, the Provider discovers a new problem or abnormality with a pre-existing problem that is significant enough to require additional work to perform the key components of a problem-oriented E&M, then the appropriate office/outpatient code may be billed with modifier 25.

### **Examples of Appropriate Use of Modifier 25**

#### **Example 1:**

A patient has a nosebleed. The physician performs packing of the nose in the office, which stops the bleeding. At the same visit, the physician then evaluates the patient for moderate hypertension that was not well controlled and adjusts the antihypertensive medications.

The 25 modifier may be reported with the appropriate level of E/M code in addition to the minor procedure. The hypertension E/M was medically necessary, significant, and a separately identifiable service performed on the same day as control of the nosebleed. The hypertension was exacerbating the nosebleed and was actually related to the nosebleed, but management of the hypertension was a separate service from actually packing the nose.

#### **Example 2:**

A patient presents to the physician with symptoms of urinary retention. The physician performs a thorough E/M service and decides to perform a cystourethroscopy. Cystourethroscopy is performed the same day as the E/M code.

The 25 modifier may be reported with the appropriate level of E/M code in addition to the cystourethroscopy. The physician had to evaluate the patient based on the symptoms and decides on the procedure to be performed. The procedure was then performed on the same day as the E/M.

#### **Example 3:**

A patient presents to a Dermatologist with a concern about a small skin lesion on his back that has not healed. The Dermatologist examines the patient and documents a detailed history, detailed exam (including the skin of the patient's back, neck, arms, and legs; and cervical and axillary lymph nodes), and moderate medical decision making (including the decision to excise the lesion at this visit). Excision, malignant lesion, trunk, 0.5 cm or less (11600 – 10 global days) is performed with intermediate repair (layered closure) of wounds of trunk, 5.0 cm (12032 – 10 global days). Use modifier 25 on the E/M service.

The 25 modifier may be reported with the appropriate level of E/M code in addition to the lesion removal. The physician had to evaluate the patient based on the symptoms and decides on the procedure to be performed. The procedure was then performed on the same day as the E/M.

#### **Example 4:**

A 52-year-old established patient presents for an annual exam. When you ask about his current complaints, he mentions that he has had mild chest pain and a productive cough over the past week and that the pain is worse on deep inspiration. You take additional history related to his symptoms, perform a detailed respiratory and CV exam,

and order an electrocardiogram and chest X-ray. You make a diagnosis of acute bronchitis with chest pain and prescribe medication and bed rest along with instructions to stop smoking. You document both the problem-oriented and the preventive components of the encounter in detail.

You should submit 99396, "Periodic comprehensive preventive medicine, established patient; 40-64 years" and ICD-9 code V70.0, and the problem-oriented code that describes the additional work associated with the evaluation of the respiratory complaints with modifier 25 attached, ICD-9 codes 466.0, "Acute bronchitis" and 786.50, "Chest pain" and the appropriate code for the electrocardiogram.

\*Note that the work associated with performing the history, examination, and medical decision making for the problem-oriented E/M service will likely overlap those performed as part of the comprehensive preventive service to a certain extent. Therefore, the E/M code reported for the problem-oriented service should be based on the additional work performed by the physician to evaluate that problem. An insignificant or trivial problem or abnormality that does not require performance of these key components should not be reported separately from the preventive medicine service.

#### Example 5:

An established 42-year-old patient reports to the outpatient office for her yearly gynecological exam, including breast exam and Pap smear. During the same encounter the patient complains of irregular menstrual cycles and has noticeable ovarian pain and tenderness during the pelvic exam, requiring the physician to order additional tests such as an ultrasound or CT scan and schedule a follow-up visit.

An additional Office/Outpatient code may be applied with a Modifier 25 Significant, separately identifiable evaluation and management service by the same physician on the same day of the procedure or service. The service would be reported as: 99396, 99213-25

### **Examples of Inappropriate Use of Modifier 25**

#### **Example 1:**

A patient has a small skin cancer of the forearm removed in the physician's office. This is a routine procedure and no other conditions are treated.

The office visit is considered part of the surgery service and, therefore, not separately reimbursable. The use of modifier 25 is inappropriate. Only the surgical procedure should be reported.

#### **Example 2:**

A patient visits the physician on Monday with symptoms of GI bleeding. The physician evaluates the patient and bills and E/M service. The physician tells the patient to return on Wednesday for a sigmoidoscopy. On Wednesday, a sigmoidoscopy is performed in a routine manner.

An E/M service (no modifier applied) may be billed for the service provided on Monday. However, a separate E/M service should not be reported for Wednesday when the patient returned for the sigmoidoscopy.

#### **Example 3:**

A Gastroenterologist has been asked to place an NG tube. A brief evaluation of the patient's oropharynx and airway is performed. The Gastroenterologist documents an EPF history, PF exam, and low decision making. The NG tube is placed.

The office visit is considered part of the surgery service and, therefore, not separately reimbursable. The use of the 25 modifier is inappropriate. Only the surgical procedure should be reported.

#### **Example 4:**

A patient presented it to her physician's office complaining of a painful abscess on her back. The physician took a problem-focused history and performed a problem-focused exam. He decided to incise and drain the abscess while the patient was still in the office. The office visit is considered part of the surgery service and, therefore, not separately reimbursable. The use of modifier 25 is inappropriate. Only the surgical procedure should be reported.

**Example 5:**

A 44-year-old established patient presents for her annual well-woman exam. A complete review of systems is obtained, and an interval past, family, and social history is reviewed and updated. A neck-to-groin exam is performed, including a pelvic exam, and a Pap smear is taken. Counseling is given on diet and exercise. Appropriate labs are ordered. The patient also complains of vaginal dryness, and her prescriptions for oral contraception and chronic allergy medication are renewed.

This additional work would be considered part of the preventive service, and the prescription renewal would not be considered significant.

**Example 6:**

A 44-year-old established patient presents for her annual well-woman exam. A complete review of systems is obtained, and an interval past, family, and social history is reviewed and updated. A neck-to-groin exam is performed, including a pelvic exam, and a Pap smear is taken. Counseling is given on diet and exercise. Appropriate labs are ordered. The patient also complains of vaginal dryness, and her prescriptions for oral contraception and chronic allergy medication are renewed. The patient also requests advice on hormone replacement therapy. She is anticipating menopause but is currently asymptomatic.

This would not be considered significant because the patient is asymptomatic and preventive medicine services include counseling or guidance on issues common to the patient's age group.

**Example 7:**

An E/M service is submitted with CPT code 99213 and CPT modifier 25. During the same patient encounter, the physician also debrides the skin and subcutaneous tissues (CPT code 11042, 0 global days). CPT 99213 was submitted to reflect the physician's time, examination, and decision making related to determining the need for skin debridement. The physician's time was not significant and separately identifiable from the usual work associated with the surgery, and no other conditions were addressed during the encounter.

\*See Reference section at the end of this document for source of examples.

| Modifier 26 | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

|                                     | <p>These modifiers are used to identify procedures/ services, other than E&amp;M services, that are not normally reported together but are appropriate under the circumstances.</p> <p>Modifier 59 Distinct Procedural Service<br/> Modifier XE Separate Encounter, A Service That Is Distinct Because It Occurred During A Separate Encounter<br/> Modifier XS Separate Structure, A Service That Is Distinct Because It Was Performed On A Separate Organ/Structure<br/> Modifier XP Separate Practitioner, A Service That Is Distinct Because It Was Performed By A Different Practitioner<br/> Modifier XU Unusual Non-Overlapping Service, The Use Of A Service That Is Distinct Because It Does Not Overlap Usual Components Of The Main Service</p> <p><b>Rule</b><br/>MVP cannot accept documentation electronically to support modifiers 59, XE, XS, XP, XU at this time. Additional reimbursement will be considered when the operative report accompanies the paper claim. MVP may request additional information when the operative report does not clearly demonstrate that the procedures should be unbundled. This may include documentation that demonstrates why a different session, different procedure or surgery, different site or organ system, separate incision/excision, separate lesion, or separate injury (or area of injury in extensive injuries) not ordinarily encountered or performed on the same day by the same individual was done; rationale for why the use of modifiers 59, XE, XS, XP, XU is warranted.</p> <p>When another already established modifier is appropriate it should be used rather than modifier 59. Only if another descriptive modifier is unavailable, and the use of modifier 59 best explains the circumstances, should modifier 59 be used. Note: Modifier 59 should not be appended to an E&amp;M service. To report a separate and distinct E&amp;M service with a non-E&amp;M service performed on the same date, see modifier 25.</p> <p><b>Reimbursement</b><br/>Claims that are determined to meet the clinical criteria as a separate identifiable procedure will be paid at the physician contracted rate.</p> |
| <b>Modifier 62</b>                  | <b>Description</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

# Multiple Surgery- Vermont Facilities Only

Last Reviewed Date: February 1, 2025

## MULTIPLE SURGERY – VT FACILITIES ONLY

Policy  
Notification/Prior Authorization Requests  
Billing/Coding Guidelines  
History

## Policy

For surgical procedures that occur in the outpatient or inpatient facility setting, MVP follows the basic multiple surgery rules and will reduce reimbursement for the second procedure when done at the same time as the first procedure.

## Notification/Prior Authorization Requests

MVP Payment Policies are not a guarantee of payment. Providers must also review MVP's Utilization Management Guides to determine if prior authorization is required and can refer to the searchable PDF versions of Medical, Pharmacy and other Provider and Payment policies for guidelines. The current policies can be found [here](#).

## Billing/Coding Guidelines

History

---

## Policy

Only valid National Drug Code (NDC) numbers may be submitted. MVP requires the valid NDC and quantity to be included on all claims where a medication is administered for outpatient or professional setting with a procedure code beginning with J, or for codes that have an O1E or O1D BETOS designation. The BETOS designation can be referenced [here](#).

When an NDC is submitted on any claim or; for any procedure, that NDC will be verified for accuracy, and the unit quantity will be reviewed to ensure it is not a value of zero.

## Notification/Prior Authorization Requests

MVP Payment Policies are not a guarantee of payment. Providers must also review MVP's Utilization Management Guides to determine if prior authorization is required and can refer to the searchable PDF versions of Medical, Pharmacy and other Provider and Payment policies for guidelines. The current policies can be found [here](#).

## Billing/Coding Guidelines

### Instructions for filling out the Health Insurance Claim Form (CMS 1500)

Valid NDC numbers should be entered in the respective fields 24A – 24G for the corresponding CPT codes. The following should be included in order:

- Report the N4 qualifier (left justified)
- Followed immediately by 11-digit NDC (no hyphens)
- One space
- Followed immediately by Unit or Basis for Measurement Code: F2 – International Unit

ML – Milliliter

GR – Gram

UN - Unit

- Followed immediately by:
  - Unit Quantity – is limited to eight digits before the decimal and three digits after the decimal. If entering a whole number, do not use a decimal.
  - Must be > 0 and <= 9,999,999.999.

- Examples: 1234.56    2    9,999,999.999
- Example: N412345678901 UN1234.567

## NDC Formatting

A valid NDC is submitted as an 11-digit code without any hyphens. However, you will rarely see 11 digits when referring to an NDC on a medication package. This is because the 11 digits of an NDC are separated into three (3) sections.

- The first 5 digits identify the drug manufacturer
- The next 4 digits identify the specific drug and its strength
- The last 2 digits indicate the package size

In some cases, you may see a 5 digit-4 digit-2-digit code (for example 12345-1234-12). In this situation, you should remove hyphens, and submit the 11-digit numbers.

But in most cases, you will see other formats as many manufacturers omit leading zeros in one or more of the three NDC sections.

For MVP to process a claim for reimbursement, the leading zeros must be added back into the appropriate place within the NDC to create an 11-digit NDC number that matches the Medispan and/or First Data Bank databases.

The following table provides illustrative examples on how to convert sample NDC numbers into the acceptable 5-4-2 format and how to enter them appropriately into a claim form by adding the N4 qualifier:

| Packaging NDC Format | Add leading zero(s) to the:                        | Conversion Examples                               | Keyed as      |
|----------------------|----------------------------------------------------|---------------------------------------------------|---------------|
| 4-4-2                | First segment to make it 5-4-2                     | 4-4-2=1234-1234-12<br>becomes 5-4-2=01234-1234-12 | N401234123412 |
| 5-3-2                | Second segment to make it 5-4-2                    | 5-3-2=12345-123-12<br>becomes 5-4-2=12345-0123-12 | N401234123412 |
| 5-4-1                | Third segment to make it 5-4-2                     | 5-4-1=12345-1234-1<br>becomes 5-4-2=12345-1234-01 | N401234123412 |
| 3-2-1                | First, second, and third segments to make it 5-4-2 | 3-2-1=333-22-1<br>becomes 5-4-2=00333-0022        | N400333002201 |

## Choosing the Applicable NDC

If a drug has two (2) NDC numbers - one on the package and one on the vial, submit the NDC on the package rather than the number on the vial.

If the drug is a compound drug and does not have a single Federal NDC, individual components and their respective Federal NDC's numbers must be billed on separate lines with appropriate numbers of units.

If the drug is available in both medical and cosmetic packaging (e.g., Botox and Botox Cosmetic), use the appropriate NDC for the medical packaging. Submission of an NDC associated with the cosmetic product will result in a claim denial regardless of authorization status and diagnosis being treated.

### Policy

MVP recognizes nurse practitioner, physician assistant and clinical nurse specialist billing guidelines as outlined below.

### Definitions

#### **Consolidated Billing**

Consolidated billing, which is similar in concept to hospital bundling, requires the SNF or NF to include on its Part A bill all Medicare-covered services that a resident has received during a covered Part A stay, other than a small list of excluded services that are billed separately under Part B by an outside entity. CB also places with the SNF itself the Medicare billing responsibility for all its residents' physical therapy (PT), occupational therapy (OT), and speech-language pathology (SLP) services, regardless of whether the resident who receives the services is in a covered Part A stay. There are several services that are excluded from SNF CB. Services that are categorically excluded from SNF CB include physicians' services furnished to SNF residents. Physician assistants working under a physician's supervision and nurse practitioners and clinical nurse specialists working in collaboration with a physician are also excluded.

### Notification/Prior Authorization Requests

MVP Payment policies are not a guarantee of payment. Providers must also check Member eligibility and refer to the Member Benefits Display to determine benefits. Providers must also review MVP's Utilization Management Guides to determine if prior authorization is required and the Benefit Interpretation Manual for MVPs clinical guidelines. These resources can be accessed by signing into your account at [mvphealthcare.com](http://mvphealthcare.com).

### Billing/Coding Guidelines in a Skilled Nursing Facility

Except for the therapy services (PT,OT,SLP), the professional component of physician services and services of the following non-physician providers are excluded from Part A PPS payment and the requirement for consolidated billing, and may be billed separately:

- Physician assistants, working under a physician's supervision
- Nurse practitioners and clinical nurse specialists working in collaboration with a physician

Providers should use appropriate place of service according to Medicare guidelines.

A physician may not delegate a task when the regulations specify that the physician must perform it personally, or when the delegation is prohibited under State law or by the facility's own policies.

The initial comprehensive visit in an SNF is the initial visit during which the physician completes a thorough assessment, develops a plan of care, and writes or verifies admitting orders for the resident. Under the regulations at 42 C.F.R. 483.40(c)(1), the initial comprehensive visit must occur no later

than 30 days after admission. Further, under 42 C.F.R. 483.40(c)(4) and (e), the physician may not delegate the initial comprehensive visit in an SNF. Non-physician practitioners may perform other medically necessary visits prior to and after the physician initial comprehensive visit.

Once the physician has completed the initial comprehensive visit in the SNF, the physician may then delegate alternate visits to a Physician Assistant (PA), Nurse Practitioner (NP), or Clinical Nurse Specialist (CNS) who is licensed as such by the State and performing within the scope of practice in that State, as required under 42 C.F.R. 483.40(c)(4).

MVP only pays for medically necessary face-to-face visits by the physician or NP/PA with the resident. If the NP/PA is performing the medically necessary visit, the NP/PA would bill for the visit.

Payment may be made for the services of Nurse Practitioners (NPs) and Clinical Nurse Specialists (CNSs) who are employed by a SNF or NF when their services are rendered to facility residents. If NPs and CNSs employed by a facility opt to reassign payment for their professional services to the facility, the facility can bill the appropriate Medicare Part B carrier under the NPs' or CNSs' PINs for their professional services. Otherwise, the NPs or CNSs who are employed by an SNF or NF bill the carrier directly for their services to facility residents.

Physician Assistants (PAs) who are employed by an SNF or NF cannot reassign payment for their professional services to the facility because Medicare law requires the employer of a PA to bill for the PA's services. The facility must always bill the Part B carrier under the PA's PIN for the PA's professional services to facility residents.

The regulation at 42 CFR, § 483.40(b)(3) states the physician must "Sign and date all orders with the exception of influenza and pneumococcal polysaccharide vaccines, which may be administered per physician-approved facility policy after an assessment for contraindications." In accordance with 42 CFR, Section 483.40(f), required physician tasks, such as verifying and signing orders in an NF, can be delegated under certain circumstances to a physician assistant, nurse practitioner, or clinical nurse specialist who is not an employee of the facility but who is working in collaboration with a physician. Therefore, to comply with survey and certification requirements, the physician must sign all orders written by an NP who is employed by the NF.

## **Billing/Coding Guidelines in a Nursing Facility**

The initial comprehensive visit in an NF is the same as in an SNF. That is, the initial comprehensive visit is the initial visit during which the physician completes a thorough assessment, develops a plan of care, and writes or verifies admitting orders for the resident, which must take place no later than 30 days after admission. The regulations at 42 C.F.R. 483.40(f) state that "At the option of the State, any required physician task in an NF (including tasks which the regulations specify must be performed personally by the physician) may also be satisfied when performed by a nurse practitioner, clinical nurse specialist, or physician assistant who is not an employee of the facility but who is working in collaboration with a physician." In other words, non-physician practitioners that have a direct relationship with a physician and who are not employed by the facility may perform the initial comprehensive visit, any other required physician visit, and other medically necessary visits for a resident of an NF as the State allows. Non-physician

practitioners may also perform other medically necessary visits prior to and after the physician initial comprehensive visit.

At the option of the State, NPs, PAs, and CNSs who are employees of the facility, while not permitted to perform visits required under the schedule prescribed at 42 C.F.R. 483.40(c)(1), are permitted to perform other medically necessary visits and write orders based on these visits. The physician must verify and sign any orders written by non-physician practitioners who are employed by the facility. For example, if a resident complains of a headache, the NP, CNS, or PA employed by the facility may assess the resident and write orders to address the condition. The physician must then verify and sign the orders. However, these medically necessary visits performed by NPs, CNSs, and PAs employed by the facility may not take the place of the physician required visits, nor may the visit count towards meeting the required physician visit schedule prescribed at 42 C.F.R. 483.40(c)(1).

# Observation Status for Facility and Provider

Last Reviewed Date: May 1, 2025

## OBSERVATION STATUS FOR FACILITY AND PROVIDER

Policy  
Definitions  
Notification/Prior Authorization Requests  
Billing/Coding Guidelines  
References  
History

### Policy

MVP does not require prior authorization for observation services. However, any observation services that are converted to an inpatient stay will require authorization. Any observation that exceeds forty-eight (48) hours may have medical records requested to perform a medical necessity review to verify if there is clinical justification for additional hours to be billed.

### Definitions

**Observation care** is a well-defined set of specific, clinically appropriate services, which include ongoing short-term treatment, assessment, and reassessment before a decision can be made regarding whether patients will require further treatment as hospital inpatients or if they are able to be discharged from the hospital. Observation services are commonly ordered for patients who present to the emergency department and who then require a significant period of treatment or monitoring to decide concerning their admission or discharge.

### Notification/Prior Authorization Requests

MVP Payment Policies are not a guarantee of payment. Providers must also review MVP's Utilization Management Guides to determine if prior authorization is required and can refer to the searchable PDF versions of Medical, Pharmacy and other Provider and Payment policies for guidelines. The current policies can be found [here](#).

### Billing/Coding Guidelines

Observation services are covered only when provided by the order of a physician or another individual authorized by State licensure law and hospital staff bylaws to admit patients to the hospital or to order outpatient tests. In most cases, the decision whether to discharge a patient from the hospital following resolution of the reason for the observation care or to admit the patient as an inpatient can be made in less than forty-eight (48) hours, usually in less than twenty-four (24) hours).

When a physician orders that a patient receive observation care, the patient's status is classified as outpatient. The purpose of observation is to determine the need for further treatment or for inpatient admission. Thus, a patient receiving observation services may improve and be released or be admitted as an inpatient.

The chart must document that the physician explicitly assessed the patient's risk to determine that the Member would benefit from observation care. The physician's clinical documentation must support the requirement for an observation level of care or for full admission. In addition, the physician's order must clearly identify the date and time of the Member's admission or placement into observation status. The attending physician is responsible for evaluating the Member at least each twenty-four (24)-hour interval.

MVP may retrospectively conduct a review of observation services which may take place either pre-claim payment or post-claim payment to ensure compliance with medical necessity criteria, regulatory requirements and to ensure compliance with MVP’s administrative and medical policies.

MVP does not reimburse observation services for the following:

- Preparation for, or recover from, diagnostic tests
- The routine recovery period following an ambulatory surgical procedure or an outpatient procedure
- Services routinely performed in the emergency department or outpatient department; observation services should not be billed concurrently with diagnostic or therapeutic services for which active monitoring is a part of the service
- Observation services submitted with routine pregnancy diagnosis
- Retaining a member for socioeconomic factors
- Custodial care

# Occupational Therapy (OT)

Last Reviewed Date: February 1, 2025

## OCCUPATIONAL THERAPY (OT)

Policy  
Definitions  
Notification/Prior Authorization Requests  
Billing/Coding Guidelines  
Non-Reimbursable OT Services  
History

### Policy

Occupational therapy is reimbursed only when provided for the purpose of enabling the Member to perform the activities of daily living.

### Definitions

Occupational Therapy (OT) is the use of purposeful activity or interventions designed to achieve functional outcomes which promote health or prevent injury or disability. It includes assessment by means of skilled observation or evaluation through the administration and interpretation of tests and measurements. OT may be appropriate for clinical findings such as changes in fine motor abilities, decreased strength or range of motion in small muscle groups, presence of pain, difficulty with activities of daily living (ADLs), and circulatory problems.

The American Medical Association (AMA) Current Procedural Terminology (CPT) manual defines a modality as, "any physical agent applied to produce therapeutic changes to biologic tissue; includes but is not limited to thermal, acoustic, light, mechanical, or electric energy." Modalities may be supervised, not requiring direct patient contact by the provider, or modalities may require constant attendance by a health care professional. Examples of supervised modalities may include application of hot or cold packs, vasopneumatic devices, whirlpool, diathermy, and infrared. Modalities that require constant attendance include ultrasound, electrical stimulation, and iontophoresis.

The AMA CPT manual defines therapeutic procedures as, "A manner of effecting change through the application of clinical skills and/or services that attempt to improve function." Examples of therapeutic procedures include therapeutic exercise to develop strength and endurance, range of motion and flexibility; neuromuscular re-education of movement, balance and coordination; and manual therapy techniques.

### Notification/Prior Authorization Requests

MVP Payment Policies are not a guarantee of payment. Providers must also review MVP's Utilization Management Guides to determine if prior authorization is required and can refer to the searchable PDF versions of Medical, Pharmacy and other Provider and Payment policies for guidelines. The current policies can be found [here](#).

## Billing/Coding Guidelines

The following CPT codes are covered for Occupational Therapy Providers:

| CPT Code | CPT Code                                                                                                                                                                                                          |
|----------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 97165    | Occupation therapy: low complexity                                                                                                                                                                                |
| 97166    | Occupational therapy: moderate complexity                                                                                                                                                                         |
| 97167    | Occupational therapy: high complexity                                                                                                                                                                             |
| 97168    | Re-evaluation of occupational therapy standard plan of care                                                                                                                                                       |
| 97010    | Application of a modality to one or more areas; hot or cold packs                                                                                                                                                 |
| 97012    | Application of a modality to one or more areas; traction, mechanical                                                                                                                                              |
| 97014    | Application of a modality to one or more areas; electrical stimulation (unattended)                                                                                                                               |
| 97016    | Application of a modality to one or more areas; vasopneumatic devices                                                                                                                                             |
| 97018    | Application of a modality to one or more areas; paraffin bath                                                                                                                                                     |
| 97022    | Application of a modality to one or more areas; whirlpool                                                                                                                                                         |
| 97024    | Application of a modality to one or more areas; diathermy (eg. microwave)                                                                                                                                         |
| 97026    | Application of a modality to one or more areas; infrared                                                                                                                                                          |
| 97028    | Application of a modality to one or more areas; ultraviolet                                                                                                                                                       |
| 97032    | Application of a modality to one or more areas; electrical stimulation (manual), each 15 minutes                                                                                                                  |
| 97033    | Application of a modality to one or more areas; iontophoresis, each 15 minutes                                                                                                                                    |
| 97034    | Application of a modality to one or more areas; contrast baths, each 15 minutes                                                                                                                                   |
| 97035    | Application of a modality to one or more areas; ultrasound, each 15 minutes                                                                                                                                       |
| 97036    | Application of a modality to one or more areas; Hubbard tank, each 15 minutes                                                                                                                                     |
| 97110    | Therapeutic procedure, one or more areas, each 15 minutes; therapeutic exercises to develop strength and endurance, range of motion and flexibility                                                               |
| 97112    | Therapeutic procedure, one or more areas, each 15 minutes; neuromuscular reeducation of movement, balance, coordination, kinesthetic sense, posture, and/or proprioception for sitting and/or standing activities |
| 97113    | Therapeutic procedure, one or more areas, each 15 minutes; aquatic therapy with therapeutic exercises                                                                                                             |
| 97116    | Therapeutic procedure, one or more areas, each 15 minutes; gait training (includes stair climbing)                                                                                                                |
| 97140    | Manual therapy techniques (e.g., mobilization/ manipulation, manual lymphatic drainage, manual traction), one or more regions, each 15 minutes                                                                    |
| 97530    | Therapeutic activities, direct (one-on-one) patient contact by the provider (use of dynamic activities to improve functional performance), each 15 minutes                                                        |
| 97535    | Self-care/home management training (eg, activities of daily living (ADL) and compensatory training, meal preparation, safety procedures, and instructions in                                                      |
| 97542    | Wheelchair management (e.g., assessment, fitting, training), each 15 minutes                                                                                                                                      |

|       |                                                                                                                                                                                                                                                                                                                                                                                                                              |
|-------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 97760 | Orthotic(s) management and training (including assessment and fitting when not otherwise reported), upper extremity(s), lower extremity(s) and/or trunk, each 15 minutes                                                                                                                                                                                                                                                     |
| 97761 | Prosthetic training, upper and/or lower extremity(s), each 15 minutes                                                                                                                                                                                                                                                                                                                                                        |
| 97550 | Caregiver training in strategies and techniques to facilitate the patient's functional performance in the home or community (eg, activities of daily living [ADLs], instrumental ADLs [iADLs], transfers, mobility, communication, swallowing, feeding, problem solving, safety practices) (without the patient present), face to face; initial 30 minutes                                                                   |
| 97551 | Caregiver training in strategies and techniques to facilitate the patient's functional performance in the home or community (eg, activities of daily living [ADLs], instrumental ADLs [iADLs], transfers, mobility, communication, swallowing, feeding, problem solving, safety practices) (without the patient present), face to face; each additional 15 minutes (List separately in addition to code for primary service) |
| 97552 | Group caregiver training in strategies and techniques to facilitate the patient's functional performance in the home or community (eg, activities of daily living [ADLs], instrumental ADLs [iADLs], transfers, mobility, communication, swallowing, feeding, problem solving, safety practices) (without the patient present), face to face with multiple sets of caregivers                                                |

## Non-Reimbursable OT Services

Duplicate therapy—if Members receive both occupational and physical or speech therapy, the therapies should provide different treatments and not duplicate the same treatment.

Non-Skilled Services—treatments that do not require the skills of a qualified provider of OT services, such as services which maintain function by using routine, repetitive, and reinforced procedures such as daily feeding programs, once adaptive procedures are in place.

Work-hardening program—programs which attempt to recreate the work environment to rebuild self-esteem. These programs are designed to recondition a Member with the primary goal of returning an individual to work, not to treat a specific medical condition; therefore, they are not covered.

## Medicare Therapy Cap

There is a combined annual per-beneficiary therapy cap amount for physical therapy and speech language pathology services combined and a separate amount allotted for occupational therapy services. The amount of the cap is determined by CMS and may change periodically.

The therapy cap with an exceptions process applies to services furnished in the following outpatient therapy settings: physical therapists in private practice, physician offices, skilled nursing facilities (Part B), rehabilitation agencies (or ORFs), comprehensive outpatient rehabilitation facilities (CORFs), and outpatient hospital departments.

The Provider should use the KX modifier to the therapy procedure code that is subject to the cap limits only when a beneficiary qualifies for a therapy cap exception. The KX modifier should not be used prior to the Member meeting their therapy cap. By attaching the KX modifier, the Provider is attesting that the services billed:

- Qualified for the cap exception
- Are reasonable and necessary services that require the skills of a therapist
- Are justified by appropriate documentation in the medical record

Claims for Members who meet or exceed the Medicare annual stated therapy service threshold in therapy expenditures will be subject to a manual medical review.

### Office Place of Service

Policy  
Definitions  
Notifications/Prior Authorization Request  
Billing/Coding Guidelines  
Reimbursement Guidelines  
References  
History

---

### Policy

This policy is intended to ensure reimbursement is based on the code(s) that most appropriately describe the place of service in which a service is provided. The in-office procedure list below reflects those procedures that can be safely and more effectively performed in the in-office setting when reported by a physician or other health care professional. This policy applies to services billed on a CMS-1500 form or its equivalent or successor form (e.g. "Professional Claims") by any MVP Participating Provider or non-Participating Provider and applies to all MVP Commercial benefit plans.

### Definitions

**"Place of Service" (POS)** means a two-digit code used on health care Professional Claims to indicate the setting in which a health care service was provided.

**"POS 11"** indicates the place of service is "Office" setting, which refers to a "location, other than a hospital, skilled nursing facility (SNF), military treatment facility, community health center, State or local public health clinic, or intermediate care facility (ICF), where the health professional routinely provides health examinations, diagnosis, and treatment of illness or injury on an ambulatory basis."

**"POS 22"** indicates the place of service is "On Campus-Outpatient Hospital" setting, which refers to a "portion of a hospital's main campus which provides diagnostic, therapeutic (both surgical and nonsurgical), and rehabilitation services to sick or injured persons who do not require hospitalization or institutionalization."

**"Professional Claim" or "Professional Claims"** means a health care service(s) reported by a physician or other health care professional or group and is billed on a CMS-1500 form or its equivalent or successor form and is entirely separate and distinct from a facility fee.

### Notification/Prior Authorization Requests

MVP Payment Policies are not a guarantee of payment. Providers must also review MVP's Utilization Management Guides to determine if prior authorization is required and can refer to the searchable PDF versions of Medical, Pharmacy and other Provider and Payment policies for guidelines. The current policies can be found [here](#).

**Billing/Coding Guidelines**

MVP follows The Centers for Medicare and Medicaid Services (CMS) POS Code Set for place of service codes and descriptions, and for purposes of applying industry-standard coding guidelines for place(s) of service for many CPT and HCPCS codes. In this policy, MVP is adopting a list of certain CPT and HCPCS codes that include a POS modifier in their description or applicable coding guidelines.

Procedure codes on the MVP In-Office Only list are not reimbursed under a split billing arrangement regardless of product unless an authorization is obtained. If an authorization is obtained, reimbursement may be allowed for Medicare and Medicaid products.

**Reimbursement Guidelines**

MVP will reimburse CPT and HCPCS codes when reported with an appropriate POS based on the code’s description or available coding guidelines when reported by a physician or other health care professional.

MVP does not classify Provider Based Clinics (PBCs), classified by CMS , as an extension of the hospital.

Professional Claims for certain procedures and services provided in-office should be appropriately billed with POS 11. For these CPT or HCPCS services specified below that are billed with POS modifier other than POS 11 will default to POS 11.

MVP does not reimburse separate facility fees billed in conjunction Professional Claims in an office setting.

**Procedure and POS List:**

| CPT/HCPCS | POS |
|-----------|-----|
| 99202     | 11  |

# Personal Care/Consumer Directed Personal Assistance Services – Service Units Billings

Effective Date: October 1, 2025

## PERSONAL CARE/CONSUMER DIRECTED PERSONAL ASSISTANCE SERVICES - SERVICE UNITS BILLING

Policy  
Definitions  
Notifications/Prior Authorization Request  
Billing/Coding Guidelines  
References  
History

### Policy

MVP requires Providers who are billing claims for reimbursement of Personal Care Services (PCS) or Consumer Directed Personal Assistance Services (CDPAS) units of service for a date of service to bill on a single line. Units of service provided for each date of service should not be split to separate lines on claim submissions. This policy applies to Medicare Advantage Dual Special Needs Plan, Medicaid, and HARP Members.

### Definitions

**Activities of Daily Living (ADLs)** include bathing, dressing, grooming, eating, transferring, ambulating, and toileting.

**Consumer Directed Personal Assistance Program (CDPAP)** is the New York State Medicaid program for chronically ill or disabled individuals who have a medical need for help with activities of daily living (ADLs), instrumental activities of daily living (IADLs), or skilled nursing services. Services can include any of the services provided by a personal care aide (home attendant), home health aide, or nurse and are under the instruction, supervision and direction of the consumer or the consumer's designated representative. To be eligible for these services the individual must meet all NYS DOH program eligibility requirements.

**Consumer Directed Personal Assistant** is an adult who provides Consumer Directed Personal Assistance to a Consumer under the Consumer's instruction, supervision, and direction or under the instruction, supervision and direction of the Consumer's designated representative.

**Consumer** is the medical assistance recipient who a social services district has determined eligible to participate in the CDPAP.

**Designated Representative** is an adult to whom a self-directing Consumer has delegated authority to instruct, supervise and direct the Consumer Directed Personal Assistant and to perform the Consumer's responsibilities and who is willing and able to perform these responsibilities. With respect to a non-self-directing Consumer, a "designated representative" means the Consumer's parent, legal guardian or, subject to the social services district's approval, a responsible adult surrogate who is willing and able to perform such responsibilities on the Consumer's behalf.

**Instrumental Activities of Daily Living (IADLs)** include housekeeping, laundry, meal planning and preparation, use of a telephone, managing finances, and shopping or errands.

**Personal Care Assistant/Aide (PCA)** assists an individual with day-to-day activities in their home and community. PCAs assist with ADLs, health-related procedures and tasks, observation, and redirection of behaviors, and IADLs.

**Personal Care Services (PCS)** are services for chronically ill or disabled individuals who have a medical need for help with activities of daily living (ADLs) and/or instrumental activities of daily living (IADLs) provided by a personal care assistant/aide. To be eligible for these services the individual must meet all NYS DOH program eligibility requirements.

## Notification/Prior Authorization Requests

MVP Payment Policies are not a guarantee of payment. Providers must also review MVP's Utilization Management Guides to determine if prior authorization is required and can refer to the searchable PDF versions of Medical, Pharmacy and other Provider and Payment policies for guidelines. The current policies can be found [here](#).

## Billing/Coding Guidelines

Billing with the appropriate procedure and diagnosis codes expedites processing for payment of services. It is important to code to the highest specificity based on the diagnoses of the Member. MVP will deny claims if a non-specific diagnosis code is utilized as outlined below.

### Non-Specific Diagnosis Codes:

| Diagnosis Codes | Description                                                                 |
|-----------------|-----------------------------------------------------------------------------|
| R69             | Illness, unspecified                                                        |
| R5381           | Other malaise                                                               |
| R6889           | Other general symptoms and signs                                            |
| R52             | Pain, unspecified                                                           |
| I6990           | Unspecified sequelae of unspecified cerebrovascular disease                 |
| R5383           | Other fatigue                                                               |
| R54             | Age related physical debility                                               |
| Q8789           | Other specified congenital malformation syndromes, not elsewhere classified |

History

## Policy

Medically necessary physical therapy, including rehabilitation after various surgeries, injuries, and illness, is considered reimbursable.

## Definitions

"Physical Therapy" (PT) is a prescribed program of treatment generally provided to improve or restore lost or impaired physical function resulting from illness, injury, congenital defect, or surgery and seeks to enhance rehabilitation and recovery by clarifying a Member's impairments and functional limitations and by identifying interventions, treatment goals, and precautions.

"**Modality**" is defined by the American Medical Association (AMA) Current Procedural Terminology (CPT) manual as "any physical agent applied to produce therapeutic changes to biologic tissue; includes but is not limited to thermal, acoustic, light, mechanical, or electric energy." Modalities may be supervised, not requiring direct Member contact by the provider, or modalities may require constant attendance by a healthcare professional. Examples of supervised modalities may include application of hot or cold packs, vasopneumatic devices, whirlpool, diathermy, and infrared. Modalities that require constant attendance include ultrasound, electrical stimulation, and iontophoresis.

"**Therapeutic Procedures**" are defined by the AMA CPT manual as "[a] manner of effecting change through the application of clinical skills and/or services that attempt to improve function." Examples of therapeutic procedures include therapeutic exercise to develop strength and endurance, range of motion, and flexibility; neuromuscular re-education of movement, balance, and coordination; gait training; and manual therapy techniques (e.g., manual traction).

## Notification/Prior Authorization Requests

MVP Payment Policies are not a guarantee of payment. Providers must also review MVP's Utilization Management Guides to determine if prior authorization is required and can refer to the searchable PDF versions of Medical, Pharmacy and other Provider and Payment policies for guidelines. The current policies can be found [here](#).

## Billing/Coding Guidelines

The following CPT codes are covered for Physical Therapy Providers:

CPT Code

CPT Code

|       |                                                                                                                                                                                                                                                                               |
|-------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 95992 | Canalith repositioning procedure(s) (eg, Epley maneuver, Semont maneuver), per day                                                                                                                                                                                            |
| 97161 | Physical therapy evaluation: low complexity                                                                                                                                                                                                                                   |
| 97162 | Physical therapy evaluation: moderate complexity                                                                                                                                                                                                                              |
| 97163 | Physical therapy evaluation: high complexity                                                                                                                                                                                                                                  |
| 97164 | Re-evaluation of physical therapy established plan of care                                                                                                                                                                                                                    |
| 97010 | Application of a modality to one or more areas; hot or cold packs                                                                                                                                                                                                             |
| 97012 | Application of a modality to one or more areas; traction, mechanical                                                                                                                                                                                                          |
| 97014 | Application of a modality to one or more areas; electrical stimulation (unattended)                                                                                                                                                                                           |
| 97016 | Application of a modality to one or more areas; vasopneumatic devices                                                                                                                                                                                                         |
| 97018 | Application of a modality to one or more areas; paraffin bath                                                                                                                                                                                                                 |
| 97022 | Application of a modality to one or more areas; whirlpool                                                                                                                                                                                                                     |
| 97024 | Application of a modality to one or more areas; diathermy (eg, microwave)                                                                                                                                                                                                     |
| 97026 | Application of a modality to one or more areas; infrared                                                                                                                                                                                                                      |
| 97028 | Application of a modality to one or more areas; ultraviolet                                                                                                                                                                                                                   |
| 97032 | Application of a modality to one or more areas; electrical stimulation (manual), each 15 minutes                                                                                                                                                                              |
| 97033 | Application of a modality to one or more areas; iontophoresis, each 15 minutes                                                                                                                                                                                                |
| 97034 | Application of a modality to one or more areas; contrast baths, each 15 minutes                                                                                                                                                                                               |
| 97035 | Application of a modality to one or more areas; contrast baths, each 15 minutes                                                                                                                                                                                               |
| 97036 | Application of a modality to one or more areas; Hubbard tank, each 15 minutes                                                                                                                                                                                                 |
| 97110 | Therapeutic procedure, one or more areas, each 15 minutes; therapeutic exercises to develop strength and endurance, range of motion and flexibility                                                                                                                           |
| 97112 | Therapeutic procedure, one or more areas, each 15 minutes; neuromuscular reeducation of movement, balance, coordination, kinesthetic sense, posture, and/or proprioception for sitting and/or standing activities                                                             |
| 97113 | Therapeutic procedure, one or more areas, each 15 minutes; aquatic therapy with therapeutic exercises                                                                                                                                                                         |
| 97116 | Therapeutic procedure, one or more areas, each 15 minutes; gait training (includes stair climbing)                                                                                                                                                                            |
| 97124 | Therapeutic procedure, one or more areas, each 15 minutes; massage, including effleurage, petrissage and/or tapotement                                                                                                                                                        |
| 97140 | Manual therapy techniques (e.g., mobilization/manipulation, manual lymphatic drainage, manual traction), one or more regions, each 15 minutes                                                                                                                                 |
| 97530 | Self-care/home management training (e.g., activities of daily living (ADL) and compensatory training, meal preparation, safety procedures, and instructions in use of assistive technology devices/adaptive equipment) direct one-on-one contact by provider, each 15 minutes |
| 97535 | Self-care/home management training (e.g., activities of daily living (ADL) and compensatory training, meal preparation, safety procedures, and instructions in use of assistive technology devices/adaptive equipment) direct one-on-one contact by provider, each 15 minutes |
| 97542 | Wheelchair management (e.g., assessment, fitting, training), each 15 minutes                                                                                                                                                                                                  |
| 97760 | Orthotic(s) management and training (including assessment and fitting when not otherwise reported), upper extremity(s), lower extremity(s) and/or trunk, each 15 minutes                                                                                                      |

|       |                                                                                                                                                                                 |
|-------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 97761 | Prosthetic training, upper and/or lower extremity(s), each 15 minutes                                                                                                           |
| 97763 | Orthotic(s)/prosthetic(s) management and/or training, upper extremity(ies), lower extremity(ies), and/or trunk, subsequent orthotic(s)/prosthetic(s) encounter, each 15 minutes |

For coverage of DME supplies, please see the Durable Medical Equipment Payment Policy for dispensing guidelines and code coverage.

## Non-Reimbursable PT Services

The following treatments are non-reimbursable PT services:

Non-skilled services—treatments that do not require the skills of a qualified PT provider, such as passive range of motion (PROM) treatment that is not related to restoration of a specific loss of function.

Duplicate therapy—if Members receive both physical and occupational therapy, the therapies should provide different treatments and not duplicate the same treatment. They must also have separate treatment plans and goals.

Maintenance programs—activities that preserve the Member's present level of function and prevent regression of that function. Maintenance begins when the therapeutic goals of a treatment plan have been achieved, or when no additional functional progress is apparent or expected to occur.

The following treatments are not covered because they are nonmedical, educational, or related to academic or work performance:

- Back to school programs and any program with the primary goal of education on the prevention of back pain or injury
- Work Hardening programs and any program with the primary goal of returning an individual to work (CPT 97545, 97546)
- Educational interventions (e.g., classroom environmental manipulation and academic skills training)
- Services provided within the school setting
- Sensory Integration Therapy (CPT 97533)
- Athletic training and evaluations (CPT 97169 – 97172)
- Equestrian/hippotherapy

## Medicare Therapy Cap

There is a combined annual per-beneficiary therapy cap amount for physical therapy and speech language pathology services combined and a separate amount allotted for occupational therapy services. The amount of the cap is determined by CMS and may change periodically.

The therapy cap with an exceptions process applies to services furnished in the following outpatient therapy settings: physical therapists in private practice, physician offices, skilled nursing facilities (Part B), rehabilitation agencies (or ORFs), comprehensive outpatient rehabilitation facilities (CORFs), and outpatient hospital departments.

The Provider should use the KX modifier with the therapy procedure code that is subject to the cap limits only when a Member qualifies for a therapy cap exception. The KX modifier should not be used prior to the Member meeting their therapy cap. By attaching the KX modifier, the provider is attesting that the services billed:

- Qualified for the cap exception
- Are reasonable and necessary services that require the skills of a therapist
- Are justified by appropriate documentation in the medical record

Claims for patients who meet or exceed the Medicare annual stated therapy service threshold in therapy expenditures will be subject to a manual medical review.

## Reimbursement Guidelines

Please see your provider fee schedule or your Provider agreement for specific reimbursement guidelines.

# Preoperative Lab Testing

Effective Date: October 1, 2025

## PREOPERATIVE LAB TESTING

Policy

Definitions

Notification/Prior Authorization Requests

Billing/Coding Guidelines

ICD-10 Codes that DO NOT Support Reimbursement

Reimbursement Guidelines

History

## Policy

Routine preoperative testing is not reimbursable for up to 30 days prior to any inpatient or outpatient surgery. Routine preoperative testing will be denied as global to the surgery for all products. This policy applies to all physicians, free standing facilities, labs, and hospitals.

## Definitions

Preoperative diagnostic tests are those that are performed to determine a patient's perioperative risk and optimize perioperative care.

## Notification/Prior Authorization Requests

MVP Payment Policies are not a guarantee of payment. Providers must also review MVP's Utilization Management Guides to determine if prior authorization is required and can refer to the searchable PDF versions of Medical, Pharmacy and other Provider and Payment policies for guidelines. The current policies can be found [here](#).

## Billing/Coding Guidelines

### General Guidelines

The use of diagnostic testing as part of a preoperative examination, where there is an absence of signs or symptoms indicating a need for the test, is not reimbursable. These services will be denied as global.

Examples of diagnostic tests which are often performed routinely prior to surgical procedures include but are not limited to:

- Electrocardiograms performed pre-operatively, when there are no indications for this test
- Radiologic examination of the chest performed pre-operatively, when there are no indications for this test
- Partial thromboplastin time (PTT) performed prior to medical intervention when there are no signs or symptoms of bleeding or thrombotic abnormality or a personal history of bleeding, thrombosis conditions associated with coagulopathy
- Prothrombin Time (PT) performed prior to medical intervention when there are no signs or symptoms of bleeding or thrombotic abnormality or a personal history of bleeding, thrombosis conditions associated with coagulopathy
- Serum iron studies performed as a pre-operative test when there is no indication of anemia or recent autologous blood collections prior to surgery

- COVID-19 testing performed as part of any preoperative evaluation when there are no indications for this test

Claims submitted for these tests performed solely as part of a preoperative examination, without additional diagnoses, will be denied as global. This is not an all-inclusive list of tests or laboratory services; any test done for pre-operative purposes without signs or symptoms will be denied.

Hospital/clinic-specific policies, protocols, etc., in and of themselves alone do not justify coverage. Providers should assign the ICD-10 codes describing the signs, symptoms, or conditions that justify the medical necessity for the test. If no underlying signs, symptoms, or conditions are present, a screening code must be used.

## ICD-10 Codes that DO NOT Support Reimbursement

For pre-operative testing (Chest X-ray, EKG, Partial Thromboplastin, Prothrombin Time, Serum Iron):

| ICD-10 Code | Description                                                               |
|-------------|---------------------------------------------------------------------------|
| Z01.810     | Encounter for preprocedural cardiovascular examination                    |
| Z01.811     | Encounter for preprocedural respiratory examination                       |
| Z01.812     | Encounter for preprocedural laboratory examination                        |
| Z01.818     | Encounter for other preprocedural examination                             |
| Z01.30      | Encounter for examination of blood pressure without abnormal findings     |
| Z01.31      | Encounter for examination of blood pressure with abnormal findings        |
| Z01.89      | Encounter for other specified special examinations                        |
| Z00.00      | Encounter for general adult medical examination without abnormal findings |
| Z11.52      | Encounter for screening for COVID-19                                      |

## Reimbursement Guidelines

Please see your Provider fee schedule or your IPA agreement for specific reimbursement guidelines.

# Preventive Health Care

## PREVENTIVE HEALTH CARE

Policy  
Notification/Prior Authorization Requests  
Billing/Coding Guidelines  
Summary  
History

## Policy

MVP covers the full cost of the preventive services listed below, with no co-pays, deductibles, or co-insurance for members, in accordance with state and federal regulations, when these services are the primary reason for the visit. Providers should bill MVP for these services appropriately; however, no cost share should be taken at the time of service. Providers should also check the Member's benefits to determine if preventive services apply to the Member's plan.

All standard correct coding practices should be observed. Claims will still be subject to clinical edits and bundling. Payment for preventive services by MVP depends on the correct claim submission, using diagnosis and procedure codes that identify the services as preventive. When billing the primary reason for the visit, the diagnosis codes should be billed at the claim line level in the principal diagnosis position.

## Notification/Prior Authorization Requests

MVP Payment Policies do not constitute a guarantee of reimbursement. Providers are responsible for reviewing MVP's Utilization Management Guides to determine if prior authorization is required. For detailed guidance, providers should consult the searchable PDF versions of MVP's Medical, Pharmacy, and other applicable Provider and Payment policies. The current policies can be found [here](#).

## Billing/Coding Guidelines

Please refer to the billing and coding guidelines below for instructions on accurate claim submission, including the appropriate use of diagnosis and procedure codes.

When services are billed in accordance with standard coding practices and align with one of the following evidence-based recommendations, no co-payment, deductible, or co-insurance will apply.

### Abdominal Aortic Aneurysm Screening: Men

#### (December 2019) Rating B

USPSTF recommends a 1-time screening for abdominal aortic aneurysm (AAA) with ultrasonography in men aged 65 to 75 years who have ever smoked.

Note: Facilities must bill with an appropriate code and one of the following revenue codes: 0320, 0321, 0322, 0323, 0324, 0329, 0400, 0402, 0409.

| Code  | Description                                                                                                          |
|-------|----------------------------------------------------------------------------------------------------------------------|
| 76706 | Ultrasound, abdominal aorta, real time with image documentation, screening study for abdominal aortic aneurysm (AAA) |

## **Anxiety in Children, Adolescents, and Adults: Screening**

### **(October 2022) Rating B**

The USPSTF recommends screening for anxiety in children and adolescents aged 8 to 18 years. This recommendation applies to those who do not have a diagnosed anxiety disorder or are not showing recognized signs or symptoms of anxiety.

(June 2023) Rating B: The USPSTF recommends screening for anxiety disorders in adults aged 19 to 64 years, including pregnant and postpartum persons. This recommendation applies to those who do not have a diagnosed mental health disorder and are not showing recognized signs or symptoms of anxiety disorders.

The WPSI recommends screening for anxiety in adolescent and adult women aged 13 and older, including those who are pregnant or postpartum. Optimal screening intervals are unknown and clinical judgement should be used to determine screening frequency. Given the high prevalence of anxiety disorders, lack of recognition in clinical practice, and multiple problems associated with untreated anxiety, clinicians should consider screening women who have not been recently screened. Consider screening for anxiety in conjunction with screening for depression, which is also recommended, because of their frequent co-occurrence.

| Code  | Description                                                                                                                                                                            |
|-------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 96127 | Brief emotional/behavioral assessment (e.g., depression inventory, attention-deficit/hyperactivity disorder [ADHD] scale), with scoring and documentation, per standardized instrument |

## **Aspirin Use to Prevent Preeclampsia and Related Morbidity and Mortality: Preventive Medication**

### **(September 2021) Rating B**

The USPSTF recommends the use of low-dose aspirin (81 mg/day) as preventive medication after twelve (12) weeks of gestation in persons who are at high risk for pre-eclampsia. This recommendation applies to pregnant persons who are at high risk for preeclampsia and who have no prior adverse effects with or contraindications to low-dose aspirin. A written prescription for aspirin is required: Age limit  $\geq 12$  (women) QL of 100 units/fill Generics only Single ingredient OTC dosages 325mg or less.

## **Asymptomatic Bacteriuria Screening: Pregnant Persons**

### **(September 2019) Rating B**

The USPSTF recommends screening for asymptomatic bacteriuria using urine culture in pregnant persons 12 to 16 weeks of gestation or at the first prenatal visit. This recommendation applies to pregnant persons of any age without signs and symptoms of a urinary tract infection.

The WPSI recommends screening for asymptomatic bacteriuria with urine culture for pregnant women at their first prenatal visit.

The following codes are eligible for no cost-sharing when submitted with one of the specified pregnancy-related ICD-10 diagnosis codes listed below, provided the diagnosis code is reported as the principal diagnosis.

| Code  | Description                                                                              |
|-------|------------------------------------------------------------------------------------------|
| 87086 | Culture, bacterial; quantitative colony count, urine                                     |
| 87088 | Culture, bacterial; with isolation and presumptive identification of each isolate, urine |

Pregnancy-related ICD-10 diagnosis codes:

A34, O00-O9A, Z03.71, Z03.72, Z03.73, Z03.74, Z03.75, Z03.79, Z33.1, Z33.3, Z34.00, Z34.01, Z34.02, A34.03, Z34.80, Z34.81, Z34.82, Z34.83, Z34.90, Z34.91, Z34.92, Z34.93, Z36.0, Z36.1, Z36.2, Z36.3, Z36.4, Z36.5, Z36.81, Z36.82, Z36.83, Z36.84, Z36.85, Z36.86, Z36.87, Z36.88, Z36.89, Z36.8A, Z36.9, Z37.0, Z37.1, Z37.2, Z37.3, Z37.4, Z37.50, Z37.51, Z37.52, Z37.53, Z37.54, Z37.59, Z37.60, Z37.61, Z37.62, Z37.63, Z37.64, Z37.69, Z37.7, Z37.9, Z39.0, Z39.1, Z39.2, Z3A.00, Z3A.01,

Z3A.08, Z3A.09, Z3A.10, Z3A.11, Z3A.12, Z3A.13, Z3A.14, Z3A.15, Z3A.16, Z3A.17, Z3A.18, Z3A.19, Z3A.20, Z3A.21, Z3A.22, Z3A.23, Z3A.24, Z3A.25, Z3A.26, Z3A.27, Z3A.28, Z3A.29, Z3A.30, Z3A.31, Z3A.32, Z3A.33, Z3A.34, Z3A.35, Z3A.36, Z3A.37, Z3A.38, Z3A.39, Z3A.40, Z3A.41, Z3A.42, Z3A.49

## BRCA-Related Cancer: Risk Assessment, Genetic Counseling, and Genetic Testing

(August 2019) Rating B

The USPSTF recommends that primary care clinicians assess women with a personal or family history of breast, ovarian, tubal, or peritoneal cancer or who have an ancestry associated with breast cancer susceptibility 1 and 2 (BRCA1/2) gene mutations with an appropriate brief familial risk assessment tool. Women with a positive result on the risk assessment tool should receive genetic counseling and, if indicated after counseling, genetic testing.

Modifier 33 must be appended to codes 96041 and S0265.

Facilities must bill with appropriate code and one of the following revenue codes: 0500, 0510.

| Code                          | Description                                                                                                                                                                                                                                     |
|-------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 81162                         | BRCA1 (BRCA1, DNA repair associated), BRCA2 (BRCA2, DNA repair associated) (eg, hereditary breast and ovarian cancer) gene analysis; full sequence analysis and full duplication/deletion analysis (ie, detection of large gene rearrangements) |
| 81163                         | BRCA1 (BRCA1, DNA repair associated), BRCA2 (BRCA2, DNA repair associated) (eg, hereditary breast and ovarian cancer) gene analysis; full sequence analysis                                                                                     |
| 81164                         | BRCA1 (BRCA1, DNA repair associated), BRCA2 (BRCA2, DNA repair associated) (eg, hereditary breast and ovarian cancer) gene analysis; full duplication/deletion analysis (ie, detection of large gene rearrangements)                            |
| 81165                         | BRCA1 (BRCA1, DNA repair associated) (eg, hereditary breast and ovarian cancer) gene analysis; full sequence analysis                                                                                                                           |
| 81166                         | BRCA1 (BRCA1, DNA repair associated) (eg, hereditary breast and ovarian cancer) gene analysis; full duplication/deletion analysis (ie, detection of large gene rearrangements)                                                                  |
| 81167                         | BRCA2 (BRCA2, DNA repair associated) (eg, hereditary breast and ovarian cancer) gene analysis; full duplication/deletion analysis (ie, detection of large gene rearrangements)                                                                  |

## Breast Cancer: Medication Used to Reduce Risk

(September 2019) Rating B

The USPSTF recommends that clinicians offer to prescribe risk-reducing medications, such as tamoxifen, raloxifene, or aromatase inhibitors, to women who are at increased risk for breast cancer and at low risk for adverse medication effects. This recommendation applies to asymptomatic women 35 years and older, including women with previous benign breast lesions on biopsy.

| Code        | Description                                                                                                                                                                                                                                                                                             |

| 99385-99387 | Initial comprehensive preventive medicine evaluation and management of an individual including an age and gender appropriate history, examination, counseling/anticipatory guidance/risk factor reduction interventions, and the ordering of laboratory/diagnostic procedures, new patient;             |
| 99395-99397 | Periodic comprehensive preventive medicine re-evaluation and management of an individual including an appropriate age and gender history, examination, counseling/anticipatory guidance/risk factor reduction interventions, and the ordering of laboratory/diagnostic procedures, established patient; |

## Breast Cancer Screening

### (April 2024) Rating B

The USPSTF recommends biennial (every 2 years) screening mammography for women aged 40 to 74 years.

The WPSI recommends that average-risk women initiate mammography screening no earlier than age 40 and no later than age 50. Screening mammography should occur at least biennially and as frequently as annually. Women may require additional imaging to complete the screening process or to address findings on the initial screening mammography. If additional imaging (e.g., magnetic resonance imaging, ultrasound, mammography) and pathology evaluation are indicated, these services also are recommended to complete the screening process for malignancies. Screening should continue through at least age 74, and age alone should not be the basis to discontinue screening. Women at increased risk should also undergo periodic mammography screening, however, recommendations for additional services are beyond the scope of this recommendation.

The WPSI recommends patient navigation services for breast and cervical cancer screening and follow-up, as relevant, to increase utilization of screening recommendations based on an assessment of the patient's needs for navigation services. Patient navigation services involve person-to-person (e.g., in-person, virtual, hybrid models) contact with the patient. Components of patient navigation services should be individualized. Services include, but are not limited to, person-centered assessment and planning, health care access and health system navigation, referrals to appropriate support services (e.g., language translation, transportation, and social services), and patient education. There are no specific procedural codes available to separately report patient navigation services. This work is considered incidental to the other procedures previously outlined in the sections concerning Breast Cancer Screening.

| 77067 | Screening mammography, bilateral (2-view study of each breast), including computer-aided detection (CAD) when performed                       |

### Breast Cancer Screening – Women's Preventive Health, New York

In accordance with New York State Insurance Law Chapter 74 of the Laws of 2016 Insurance Law §§ 3216(i)(11)(F), 3221(l)(11)(F), and 4303(p)(5) Diagnostic Mammograms Medical Services. New York State Legislation S.2465C/A.1696C expands coverage of breast cancer screening and imaging to include procedures as deemed necessary by nationally recognized clinical practice guidelines.

The law removes cost-sharing for mammograms, including:

- A single, baseline mammogram for individuals 35 to 39 years old
- Yearly mammograms for individuals 40 years of age or older, and
- Mammograms for individuals at any age who are at an increased risk of breast cancer because they have dense breast tissue, personal history of breast cancer, diagnosis of breast cancer prior to age 50 and genetics-based risk (including BRCA1 carriers), or they have a first degree relative (e.g., parent, sibling, child) with breast cancer when a physician recommends the mammogram.

The law also removes cost-sharing for those in need of imaging tests other than standard mammograms - such as diagnostic mammograms, breast ultrasounds, and breast magnetic resonance imaging (MRI) for the detection of breast cancer.

| Code  | Description                                                                                                                                                                                                              |

### Breast Imaging Following Inconclusive Screening or Dense Breast Findings - Vermont

Coverage is provided for medically necessary diagnostic and supplemental breast imaging including MRIs, ultrasounds, and other breast imaging services for a patient for whom the results of a screening mammogram were inconclusive or who has dense breast tissue, or both. Benefits provided shall cover the full cost of the mammography service or ultrasound, as applicable, and shall not be subject to any co-payment, deductible, coinsurance, or other cost-sharing requirement or additional charge.

No cost share for the following codes when billed with one of the following diagnosis codes in the primary diagnosis position: R92.2, R92.30, R92.311, R92.312, R92.313, R92.321, R92.322, R92.323, R92.331, R92.332, R92.333, R92.341, R92.342, R92.343, R92.8, Z12.39

## Breastfeeding: Primary Care Interventions

### (April 2025) Rating B

The USPSTF recommends providing interventions or referrals during pregnancy and after birth to support breastfeeding.

| Code        | Description                                                                                                                                   |

## Breastfeeding Support Services and Supplies - Women's Preventive Health

The WPSI recommends comprehensive lactation support services (including consultation; counseling; education by clinicians and peer support services; and breastfeeding equipment and supplies) during the antenatal, perinatal, and postpartum periods to optimize the successful initiation and maintenance of breastfeeding.

Breastfeeding equipment and supplies include, but are not limited to, double electric breast pumps (including pump parts and maintenance) and breast milk storage supplies. Access to double electric pumps should be a priority to optimize breastfeeding and should not be predicated on prior failure of a manual pump. Breastfeeding equipment may also include equipment and supplies as clinically indicated to support dyads with breastfeeding difficulties and those who need additional services.

| Code        | Description                                                                                                                                                                                                    |

## Cervical Cancer: Screening

### (August 2018) Rating A

For women, ages 21-29 years. USPSTF recommends screening for cervical cancer every three (3) years with cervical cytology alone.

For women, ages 30-65 years. USPSTF recommends screening for cervical cancer every three (3) years with cervical cytology alone, every five (5) years with high-risk human papillomavirus (hrHPV) testing alone, or every five (5) years with hrHPV testing in combination with cytology (co-testing).

The WPSI recommends cervical cancer screening for average-risk women aged 21 to 65 years. For women aged 21 to 29 years, the WPSI recommends cervical cancer screening using cervical cytology (Pap test) every three (3) years. Co-testing with cytology and human papillomavirus testing is not recommended for women younger than 30 years. Women aged 30 to 65 years should be screened with cytology and human papillomavirus testing every five (5) years or cytology alone every 3 years. Women who are at average risk should not be screened more than once every 3 years.

The WPSI recommends patient navigation services for breast and cervical cancer screening and follow-up, as relevant, to increase utilization of screening recommendations based on an assessment of the patient's needs for navigation services. Patient navigation services involve person-to-person (e.g., in-person, virtual, hybrid models) contact with the patient. Components of patient navigation services should be individualized. Services include, but are not limited to, person-centered assessment and planning, health care access and health system navigation, referrals to appropriate support services (e.g., language translation, transportation, and social services), and patient education.

| G0147 | Screening cytopathology smears, cervical or vaginal, performed by automated system under physician supervision                                                                                                                          |
| G0148 | Screening cytopathology smears, cervical or vaginal, performed by automated system with manual rescreening                                                                                                                              |
| G0476 | Infectious agent detection by nucleic acid (DNA or RNA); human papillomavirus HPV), high-risk types (e.g., 16, 18, 31, 33, 35, 39, 45, 51, 52, 56, 58, 59, 68) for cervical cancer screening, must be performed in addition to pap test |
| P3000 | Screening Papanicolaou smear, cervical or vaginal, up to three smears, by technician under physician supervision                                                                                                                        |
| P3001 | Screening Papanicolaou smear, cervical or vaginal, up to three smears, requiring interpretation by physician                                                                                                                            |
| Q0091 | Screening Papanicolaou smear; obtaining, preparing and conveyance of cervical or vaginal smear to laboratory                                                                                                                            |

## Chlamydia and Gonorrhea: Screening

### (September 2021) Rating B

The USPSTF recommends screening for chlamydia and gonorrhea in all sexually active women twenty-four (24) years or younger and in women twenty-five (25) years or older who are at increased risk for infection. This recommendation applies to asymptomatic, sexually active adolescents and adults, including pregnant persons.

| Code  | Description                                                                                                                                                                                                                                                         |

| 87590 | Infectious agent detection by nucleic acid (DNA or RNA); Neisseria gonorrhoeae, direct probe technique                                                                                                                                                              |
| 87591 | Infectious agent detection by nucleic acid (DNA or RNA); Neisseria gonorrhoeae, amplified probe technique                                                                                                                                                           |
| 87592 | Infectious agent detection by nucleic acid (DNA or RNA); Neisseria gonorrhoeae, quantification                                                                                                                                                                      |
| 87810 | Infectious agent antigen detection by immunoassay with direct optical (ie, visual) observation; Chlamydia trachomatis                                                                                                                                               |
| 87850 | Infectious agent antigen detection by immunoassay with direct optical (ie, visual) observation; Neisseria gonorrhoeae                                                                                                                                               |

## **Colorectal Cancer: Screening**

### **(May 2021) Rating A and Rating B**

Rating A – The USPSTF recommends screening for colorectal cancer in all adults aged 50 to 75 years.

Rating B – The USPSTF recommends screening for colorectal cancer in adults aged 45 to 49 years.

The USPSTF recommendation applies to asymptomatic adults 45 years or older who are at average risk of colorectal cancer (ie, no prior diagnosis of colorectal cancer, adenomatous polyps, or inflammatory bowel disease; no personal diagnosis or family history of known genetic disorders that predispose them to a high lifetime risk of colorectal cancer [such as Lynch syndrome or familial adenomatous polyposis]).

All services associated with a screening colonoscopy including anesthesia, medically necessary office visits, and associated laboratory tests are covered with no co-pay/deductible /co-insurance.

### **Colorectal Cancer Screening–NYS Circular Letter No. 4 (2022) - New York only**

[https://www.dfs.ny.gov/industry\\_guidance/circular\\_letters/cl2022\\_04](https://www.dfs.ny.gov/industry_guidance/circular_letters/cl2022_04)

MVP covers follow-up colonoscopies for New York Members when an abnormal or positive non-invasive stool-based screening test or direct visualization screening test as recommended by the USPSTF and clarified in federal guidance is obtained.

### **Colorectal Cancer Screening–Vermont only**

MVP covers colorectal cancer screening for Vermont Members as follows:

- Member is 45 years of age or older with the option of:
  - who is not at high risk for colorectal cancer, colorectal cancer screening examinations and laboratory tests in accordance with the most recently published recommendations established by the U.S. Preventive Services Task Force for average-risk individuals; and
- Members who are at high risk\* for colorectal cancer, colorectal cancer screening examinations and laboratory tests as recommended by the treating clinician. \*An individual is at high risk for colorectal cancer if the individual has:
  - A family medical history of colorectal cancer or a genetic syndrome predisposing the individual to colorectal cancer;
  - A prior occurrence of colorectal cancer or precursor polyps;
  - A prior occurrence of a chronic digestive disease condition such as inflammatory bowel disease, Crohn's disease, or ulcerative colitis; or
  - Other predisposing factors as determined by the individual's treating physician.

Colorectal cancer screening services are not subject to any co-pay, deductible, co-insurance, or other cost-sharing requirement. In addition, there is no additional charge for any services associated with a procedure or test for colorectal cancer screening, which may include one or more of the following:

- Removal of tissue or other matter;
- Laboratory services;
- Clinician services;
- Facility use; and
- Anesthesia

### Applicable to New York and Vermont:

No cost share for the following CPT/HCPCS codes:

| 44388 | Colonoscopy through stoma; diagnostic, including collection of specimen(s) by brushing or washing, when performed (separate procedure)                                                                                                                                       |
| 44389 | Colonoscopy through stoma; with biopsy, single or multiple                                                                                                                                                                                                                   |
| 44390 | Colonoscopy through stoma; with removal of foreign body(s)                                                                                                                                                                                                                   |
| 44391 | Colonoscopy through stoma; with control of bleeding, any method                                                                                                                                                                                                              |
| 44392 | Colonoscopy through stoma; with removal of tumor(s), polyp(s), or other lesion(s) by hot biopsy forceps                                                                                                                                                                      |
| 44394 | Colonoscopy through stoma; with removal of tumor(s), polyp(s), or other lesion(s) by snare technique                                                                                                                                                                         |
| 44401 | Colonoscopy through stoma; with ablation of tumor(s), polyp(s), or other lesion(s) (includes pre- and post-dilation and guide wire passage, when performed)                                                                                                                  |
| 44402 | Colonoscopy through stoma; with endoscopic stent placement (including pre- and post-dilation and guide wire passage, when performed)                                                                                                                                         |
| 44403 | Colonoscopy through stoma; with endoscopic mucosal resection                                                                                                                                                                                                                 |
| 44404 | Colonoscopy through stoma; with directed submucosal injection(s), any substance                                                                                                                                                                                              |
| 44405 | Colonoscopy through stoma; with transendoscopic balloon dilation                                                                                                                                                                                                             |
| 44406 | Colonoscopy through stoma; with endoscopic ultrasound examination, limited to the sigmoid, descending, transverse, or ascending colon and cecum and adjacent structures                                                                                                      |
| 44407 | Colonoscopy through stoma; with transendoscopic ultrasound guided intramural or transmural fine needle aspiration/biopsy(s), includes endoscopic ultrasound examination limited to the sigmoid, descending, transverse, or ascending colon and cecum and adjacent structures |
| 44408 | Colonoscopy through stoma; with decompression (for pathologic distention) (eg, volvulus, megacolon), including placement of decompression tube, when performed                                                                                                               |
| 45300 | Proctosigmoidoscopy, rigid; diagnostic, with or without collection of specimen(s) by brushing or washing (separate procedure)                                                                                                                                                |
| 45303 | Proctosigmoidoscopy, rigid; with dilation (eg, balloon, guide wire, bougie)                                                                                                                                                                                                  |
| 45305 | Proctosigmoidoscopy, rigid; with biopsy, single or multiple                                                                                                                                                                                                                  |

|       |                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|-------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 45307 | Proctosigmoidoscopy, rigid; with removal of foreign body                                                                                                                                                                                                                                                                                                                                                                                          |
| 45309 | Proctosigmoidoscopy, rigid; with removal of single tumor, polyp, or other lesion by snare technique                                                                                                                                                                                                                                                                                                                                               |
| 45315 | Proctosigmoidoscopy, rigid; with removal of multiple tumors, polyps, or other lesions by hot biopsy forceps, bipolar cautery or snare technique                                                                                                                                                                                                                                                                                                   |
| 45317 | Proctosigmoidoscopy, rigid; with control of bleeding (eg, injection, bipolar cautery, unipolar cautery, laser, heater probe, stapler, plasma coagulator)                                                                                                                                                                                                                                                                                          |
| 45320 | Proctosigmoidoscopy, rigid; with ablation of tumor(s), polyp(s), or other lesion(s) not amenable to removal by hot biopsy forceps, bipolar cautery or snare technique (eg, laser)                                                                                                                                                                                                                                                                 |
| 45327 | Proctosigmoidoscopy, rigid; with transendoscopic stent placement (includes predilation)                                                                                                                                                                                                                                                                                                                                                           |
| 45330 | Sigmoidoscopy, flexible; diagnostic, including collection of specimen(s) by brushing or washing, when performed (separate procedure)                                                                                                                                                                                                                                                                                                              |
| 45331 | Sigmoidoscopy, flexible; with biopsy, single or multiple                                                                                                                                                                                                                                                                                                                                                                                          |
| 45332 | Sigmoidoscopy, flexible; with removal of foreign body(s)                                                                                                                                                                                                                                                                                                                                                                                          |
| 45333 | Sigmoidoscopy, flexible; with removal of tumor(s), polyp(s), or other lesion(s) by hot biopsy forceps                                                                                                                                                                                                                                                                                                                                             |
| 45334 | Sigmoidoscopy, flexible; with control of bleeding, any method                                                                                                                                                                                                                                                                                                                                                                                     |
| 45337 | Sigmoidoscopy, flexible; with decompression (for pathologic distention) (eg, volvulus, megacolon), including placement of decompression tube, when performed                                                                                                                                                                                                                                                                                      |
| 45338 | Sigmoidoscopy, flexible; with removal of tumor(s), polyp(s), or other lesion(s) by snare technique                                                                                                                                                                                                                                                                                                                                                |
| 45341 | Sigmoidoscopy, flexible; with endoscopic ultrasound examination                                                                                                                                                                                                                                                                                                                                                                                   |
| 45342 | Sigmoidoscopy, flexible; with transendoscopic ultrasound guided intramural or transmural fine needle aspiration/biopsy(s)                                                                                                                                                                                                                                                                                                                         |
| 45346 | Sigmoidoscopy, flexible; with ablation of tumor(s), polyp(s), or other lesion(s) (includes pre- and post-dilation and guide wire passage, when performed)                                                                                                                                                                                                                                                                                         |
| 45347 | Sigmoidoscopy, flexible; with placement of endoscopic stent (includes pre- and post-dilation and guide wire passage, when performed)                                                                                                                                                                                                                                                                                                              |
| 45378 | Colonoscopy, flexible; diagnostic, including collection of specimen(s) by brushing or washing, when performed (separate procedure)                                                                                                                                                                                                                                                                                                                |
| 45379 | Colonoscopy, flexible; with removal of foreign body(s)                                                                                                                                                                                                                                                                                                                                                                                            |
| 45380 | Colonoscopy, flexible; with biopsy, single or multiple                                                                                                                                                                                                                                                                                                                                                                                            |
| 45381 | Colonoscopy, flexible; with directed submucosal injection(s), any substance                                                                                                                                                                                                                                                                                                                                                                       |
| 45382 | Colonoscopy, flexible; with control of bleeding, any method                                                                                                                                                                                                                                                                                                                                                                                       |
| 45384 | Colonoscopy, flexible; with removal of tumor(s), polyp(s), or other lesion(s) by hot biopsy forceps                                                                                                                                                                                                                                                                                                                                               |
| 45385 | Colonoscopy, flexible; with removal of tumor(s), polyp(s), or other lesion(s) by snare technique                                                                                                                                                                                                                                                                                                                                                  |
| 45386 | Colonoscopy, flexible; with transendoscopic balloon dilation                                                                                                                                                                                                                                                                                                                                                                                      |
| 45388 | Colonoscopy, flexible; with ablation of tumor(s), polyp(s), or other lesion(s) (includes pre- and post-dilation and guide wire passage, when performed)                                                                                                                                                                                                                                                                                           |
| 45389 | Colonoscopy, flexible; with endoscopic stent placement (includes pre- and post-dilation and guide wire passage, when performed)                                                                                                                                                                                                                                                                                                                   |
| 74263 | Computed tomographic (CT) colonography, screening, including image postprocessing                                                                                                                                                                                                                                                                                                                                                                 |
| 88305 | Level IV - Surgical pathology, gross and microscopic examination                                                                                                                                                                                                                                                                                                                                                                                  |
| 99152 | Moderate sedation services provided by the same physician or other qualified health care professional performing the diagnostic or therapeutic service that the sedation supports, requiring the presence of an independent trained observer to assist in the monitoring of the patient's level of consciousness and physiological status; initial 15 minutes of intraservice time, patient age 5 years or older                                  |
| 99153 | Moderate sedation services provided by the same physician or other qualified health care professional performing the diagnostic or therapeutic service that the sedation supports, requiring the presence of an independent trained observer to assist in the monitoring of the patient's level of consciousness and physiological status; each additional 15 minutes intraservice time (List separately in addition to code for primary service) |
| 99156 | Moderate sedation services provided by a physician or other qualified health care professional other than the physician or other qualified health care professional performing the diagnostic or therapeutic service that the sedation supports; initial 15 minutes of intraservice time, patient age 5 years or older                                                                                                                            |

|       |                                                                                                                                                                                                                                                                                                                                                         |
|-------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 99157 | Moderate sedation services provided by a physician or other qualified health care professional other than the physician or other qualified health care professional performing the diagnostic or therapeutic service that the sedation supports; each additional 15 minutes intraservice time (List separately in addition to code for primary service) |
| 00811 | Anesthesia for lower intestinal endoscopic procedures, endoscope introduced distal to duodenum; not otherwise specified                                                                                                                                                                                                                                 |
| 00812 | Anesthesia for lower intestinal endoscopic procedures, endoscope introduced distal to duodenum; screening colonoscopy                                                                                                                                                                                                                                   |

## ICD-10 Diagnosis codes applicable by State:

The following CPT/HCPCS codes are exempt from cost sharing when billed with one of the ICD-10 diagnosis codes listed below in the principal diagnosis position:

- **New York** only diagnosis codes: Z12.10, Z12.11, Z12.12, Z80.0, Z83.710, Z83.711, Z83.718, Z83.719, or Z83.79
- **Vermont** only diagnosis codes: D12.0, D12.2, D12.3, D12.4, D12.5, D12.6, D12.7, D12.8, D12.9, D50.9, K63.5, Z00.00, Z12.10, Z12.13, Z13.811, Z13.818, Z80.0, Z80.9, Z83.71, Z83.710, Z83.711, Z83.718, Z83.719, Z83.72, Z83.79, Z85.030, Z85.038, Z85.040, Z85.048, Z85.060, Z85.068, Z86.010, Z86.0100, Z86.0101, Z86.0102, Z86.0109, Z86.018, or Z87.19

| Code  | Description                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|-------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 44389 | Colonoscopy through stoma; with biopsy, single or multiple                                                                                                                                                                                                                                                                                                                                                                                        |
| 44392 | Colonoscopy through stoma; with removal of tumor(s), polyp(s), or other lesion(s) by hot biopsy forceps                                                                                                                                                                                                                                                                                                                                           |
| 44394 | Colonoscopy through stoma; with removal of tumor(s), polyp(s), or other lesion(s) by snare technique                                                                                                                                                                                                                                                                                                                                              |
| 44401 | Colonoscopy through stoma; with ablation of tumor(s), polyp(s), or other lesion(s) (includes pre- and post-dilation and guide wire passage, when performed)                                                                                                                                                                                                                                                                                       |
| 45305 | Proctosigmoidoscopy, rigid; with biopsy, single or multiple                                                                                                                                                                                                                                                                                                                                                                                       |
| 45309 | Proctosigmoidoscopy, rigid; with removal of single tumor, polyp, or other lesion by snare technique                                                                                                                                                                                                                                                                                                                                               |
| 45315 | Proctosigmoidoscopy, rigid; with removal of multiple tumors, polyps, or other lesions by hot biopsy forceps, bipolar cautery or snare technique                                                                                                                                                                                                                                                                                                   |
| 45331 | Sigmoidoscopy, flexible; with biopsy, single or multiple                                                                                                                                                                                                                                                                                                                                                                                          |
| 45333 | Sigmoidoscopy, flexible; with removal of tumor(s), polyp(s), or other lesion(s) by hot biopsy forceps                                                                                                                                                                                                                                                                                                                                             |
| 45338 | Sigmoidoscopy, flexible; with removal of tumor(s), polyp(s), or other lesion(s) by snare technique                                                                                                                                                                                                                                                                                                                                                |
| 45346 | Sigmoidoscopy, flexible; with ablation of tumor(s), polyp(s), or other lesion(s) (includes pre- and post-dilation and guide wire passage, when performed)                                                                                                                                                                                                                                                                                         |
| 45378 | Colonoscopy, flexible; diagnostic, including collection of specimen(s) by brushing or washing, when performed (separate procedure)                                                                                                                                                                                                                                                                                                                |
| 45380 | Colonoscopy, flexible; with biopsy, single or multiple                                                                                                                                                                                                                                                                                                                                                                                            |
| 45384 | Colonoscopy, flexible; with removal of tumor(s), polyp(s), or other lesion(s) by hot biopsy forceps                                                                                                                                                                                                                                                                                                                                               |
| 45385 | Colonoscopy, flexible; with removal of tumor(s), polyp(s), or other lesion(s) by snare technique                                                                                                                                                                                                                                                                                                                                                  |
| 45388 | Colonoscopy, flexible; with ablation of tumor(s), polyp(s), or other lesion(s) (includes pre- and post-dilation and guide wire passage, when performed)                                                                                                                                                                                                                                                                                           |
| 74263 | Computed tomographic (CT) colonography, screening, including image postprocessing                                                                                                                                                                                                                                                                                                                                                                 |
| 88305 | Level IV - Surgical pathology, gross and microscopic examination                                                                                                                                                                                                                                                                                                                                                                                  |
| 99152 | Moderate sedation services provided by the same physician or other qualified health care professional performing the diagnostic or therapeutic service that the sedation supports, requiring the presence of an independent trained observer to assist in the monitoring of the patient's level of consciousness and physiological status; initial 15 minutes of intraservice time, patient age 5 years or older                                  |
| 99153 | Moderate sedation services provided by the same physician or other qualified health care professional performing the diagnostic or therapeutic service that the sedation supports, requiring the presence of an independent trained observer to assist in the monitoring of the patient's level of consciousness and physiological status; each additional 15 minutes intraservice time (List separately in addition to code for primary service) |

|       |                                                                                                                                                                                                                                                                                                                                                         |

| 99156 | Moderate sedation services provided by a physician or other qualified health care professional other than the physician or other qualified health care professional performing the diagnostic or therapeutic service that the sedation supports; initial 15 minutes of intraservice time, patient age 5 years or older                                  |
| 99157 | Moderate sedation services provided by a physician or other qualified health care professional other than the physician or other qualified health care professional performing the diagnostic or therapeutic service that the sedation supports; each additional 15 minutes intraservice time (List separately in addition to code for primary service) |
| 00811 | Anesthesia for lower intestinal endoscopic procedures, endoscope introduced distal to duodenum; not otherwise specified                                                                                                                                                                                                                                 |
| 00812 | Anesthesia for lower intestinal endoscopic procedures, endoscope introduced distal to duodenum; screening colonoscopy                                                                                                                                                                                                                                   |

## Depression and Suicide Risk in Children, Adolescents, and Adults: Screening

### (October 2022) Rating B

The USPSTF recommends screening for major depressive disorder (MDD) in adolescents ages 12 to 18 years. This USPSTF recommendation applies to those who do not have a diagnosed mental health condition or are not showing recognized signs or symptoms of depression or suicide risk. This recommendation focuses on screening for MDD and does not address screening for other depressive disorders, such as minor depression or dysthymia.

### (June 2023) Rating B

The USPSTF recommends screening for depression in the adult population, including pregnant and postpartum persons, as well as older adults. This recommendation applies to adults 19 years or older who do not have a diagnosed mental health disorder or recognizable signs or symptoms of depression or suicide risk. This recommendation focuses on screening for MDD and does not address screening for other depressive disorders, such as minor depression or dysthymia.

| Code        | Description                                                                                                                                                                                  |
|-------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 96127       | Brief emotional/behavioral assessment (eg, depression inventory, attention-deficit/hyperactivity disorder [ADHD] scale), with scoring and documentation, per standardized instrument         |
| 96160       | Administration of patient-focused health risk assessment instrument (eg, health hazard appraisal) with scoring and documentation, per standardized instrument                                |
| 96161       | Administration of caregiver-focused health risk assessment instrument (eg, depression inventory) for the benefit of the patient, with scoring and documentation, per standardized instrument |
| 99401-99404 | Preventive medicine counseling and/or risk factor reduction intervention(s) provided to an individual (separate procedure)                                                                   |
| G0439       | Annual wellness visit, includes a personalized prevention plan of service (PPS), subsequent visit                                                                                            |
| G0444       | Annual depression screening, 5 to 15 minutes                                                                                                                                                 |

## Screening for Prediabetes and Type 2 Diabetes

### (August 2021) Rating B

The USPSTF recommends screening for prediabetes and type 2 diabetes in adults between the age of 35 to 70 years who are overweight or obese. Clinicians should offer or refer patients with prediabetes to effective preventive interventions. Clinicians should offer or refer patients with abnormal blood glucose to intensive behavioral counseling interventions to promote a healthy diet and physical activity. See Women's Preventive Health section on Screening for Gestational Diabetes Mellitus and Screening for Diabetes Mellitus after Pregnancy.

No cost share for the following CPT codes when billed with ICD-10 diagnosis codes: Z00.00, Z00.01, Z13.1, or Z86.32 in the primary diagnosis position and at least one of the following additional ICD-10 diagnosis codes as follows: Overweight ICD-10: E66.3, Z68.25, Z68.26, Z68.27, Z68.28, Z68.29

Obesity ICD-10: E66.01, E66.09, E66.1, E66.8, E66.9, Z68.41, Z68.42, Z68.43, Z68.44, Z68.45

Body Mass Index 25.0 – 29.9 ICD-10: Z68.25, Z68.26, Z68.27, Z68.28, Z68.29

Body Mass Index 30.0 – 39.9 ICD-10: Z68.30, Z68.31, Z68.32, Z68.33, Z68.34, Z68.35, Z68.36, Z68.37, Z68.38, Z68.39

Body Mass Index 40.0 AND OVER ICD-10: Z68.41, Z68.42, Z68.43, Z68.44, Z68.45

| Code  | Description                                                                                                             |
|-------|-------------------------------------------------------------------------------------------------------------------------|
| 82947 | Glucose; quantitative, blood (except reagent strip)                                                                     |
| 82948 | Glucose; blood, reagent strip                                                                                           |
| 82950 | Glucose; post glucose dose (includes glucose)                                                                           |
| 82951 | Glucose; tolerance test (GTT), 3 specimens (includes glucose)                                                           |
| 82952 | Glucose; tolerance test, each additional beyond 3 specimens (List separately in addition to code for primary procedure) |
| 83036 | Hemoglobin; glycosylated (A1C)                                                                                          |

## **Gestational Diabetes: Screening**

### **(August 2021) Rating B**

The USPSTF recommends screening for gestational diabetes in asymptomatic pregnant persons at 24 weeks of gestation or after. For additional diabetes screening benefits, see the Women's Preventive Health section for Screening for Gestational Diabetes Mellitus and Screening for Diabetes Mellitus after Pregnancy. WPSI recommends screening pregnant women for gestational diabetes mellitus after 24 weeks' gestation (preferably between 24 and 28 weeks) to prevent adverse birth outcomes. Screen pregnant women with risk factors for type 2 diabetes before 24 weeks of gestation, ideally at the first prenatal visit. In addition, screen women with a history of gestational diabetes who are not currently pregnant and who have not been previously diagnosed with type 2 diabetes.

The WPSI recommends screening pregnant women for gestational diabetes mellitus after 24 weeks of gestation (preferably between 24 and 28 weeks of gestation) in order to prevent adverse birth outcomes. The WPSI recommends screening pregnant women with risk factors for type 2 diabetes or GDM before 24 weeks of gestation, ideally at the first prenatal visit.

The following codes are eligible for no cost-sharing when submitted with one of the specified pregnancy-related ICD-10 diagnosis codes listed below, provided the diagnosis code is reported as the principal diagnosis.

| Code  | Description                                                                                                             |
|-------|-------------------------------------------------------------------------------------------------------------------------|
| 82947 | Glucose; quantitative, blood (except reagent strip)                                                                     |
| 82948 | Glucose; blood, reagent strip                                                                                           |
| 82950 | Glucose; post glucose dose (includes glucose)                                                                           |
| 82951 | Glucose; tolerance test (GTT), 3 specimens (includes glucose)                                                           |
| 82952 | Glucose; tolerance test, each additional beyond 3 specimens (List separately in addition to code for primary procedure) |
| 83036 | Hemoglobin; glycosylated (A1C)                                                                                          |

## Screening Diabetes Mellitus after Pregnancy - Women's Preventive Health

The WPSI recommends screening for type 2 diabetes in women with a history of gestational diabetes mellitus (GDM) who are not currently pregnant and who have not previously been diagnosed with type 2 diabetes. Initial testing should ideally occur within the first year postpartum and can be conducted as early as 4–6 weeks postpartum. Women who were not screened in the first year postpartum or those with a negative initial postpartum screening test result should be screened at least every 3 years for a minimum of 10 years after pregnancy. For those with a positive screening test result in the early postpartum period, testing should be repeated at least 6 months postpartum to confirm the diagnosis of diabetes regardless of the type of initial test (eg, fasting plasma glucose, hemoglobin A1C, oral glucose tolerance test). Repeat testing is also indicated for women screened with hemoglobin A1C in the first 6 months postpartum regardless of whether the test results are positive or negative because the hemoglobin A1C test is less accurate during the first 6 months postpartum.

The following codes are eligible for no cost-sharing when submitted with diagnosis code Z86.32 or Z39.2, provided the diagnosis code is reported as the principal diagnosis.

| Code  | Description                                                                                                             |
|-------|-------------------------------------------------------------------------------------------------------------------------|
| 82947 | Glucose; quantitative, blood (except reagent strip)                                                                     |
| 82948 | Glucose; blood, reagent strip                                                                                           |
| 82950 | Glucose; post glucose dose (includes glucose)                                                                           |
| 82951 | Glucose; tolerance test (GTT), 3 specimens (includes glucose)                                                           |
| 82952 | Glucose; tolerance test, each additional beyond 3 specimens (List separately in addition to code for primary procedure) |
| 83036 | Hemoglobin; glycosylated (A1C)                                                                                          |

## Falls Prevention in Community-Dwelling Older Adults: Interventions

### (June 2024) Rating B

The USPSTF recommends exercise interventions to prevent falls in community-dwelling adults 65 years or older who are at increased risk for falls.

## Folic Acid: Supplementation

### (August 2023) Rating B

Folic Acid Supplementation to Prevent Neural Tube Defects: Preventive Medication

The USPSTF recommends that all persons planning to or who could become pregnant take a daily supplement containing 0.4 to 0.8 mg (400 to 800 mcg) of folic acid.

| Code        | Description                                                                                                                    |
|-------------|--------------------------------------------------------------------------------------------------------------------------------|
| 99401-99404 | Preventive medicine counseling and/or risk factor reduction intervention(s) provided to an individual without specific illness |

## Healthy Weight and Weight Gain During Pregnancy: Behavioral Counseling Interventions

### (May 2021) Rating B

"Task Force" Recommendation

The USPSTF recommends that clinicians offer pregnant persons effective behavioral counseling interventions aimed at promoting healthy weight gain and preventing excess gestational weight gain in pregnancy.

| Code | Billing Instruction | Code Description |
|------|---------------------|------------------|
|------|---------------------|------------------|

|       |                                                                                                                                                      |                                                                                              |
|-------|------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------|
| 99401 | Preventive medicine counseling and/or risk factor reduction intervention(s) provided to an individual (separate procedure); approximately 15 minutes | No cost share when billed for healthy weight and weight gain during pregnancy                |
| 99402 | Preventive medicine counseling and/or risk factor reduction intervention(s) provided to an individual (separate procedure); approximately 30 minutes | No cost share when billed for healthy weight and weight gain during pregnancy                |
| 99403 | Preventive medicine counseling and/or risk factor reduction intervention(s) provided to an individual (separate procedure); approximately 45 minutes | No cost share when billed for healthy weight and weight gain during pregnancy                |
| 99404 | Preventive medicine counseling and/or risk factor reduction intervention(s) provided to an individual (separate procedure); approximately 60 minutes | No cost share when billed for healthy weight and weight gain during pregnancy                |
| 97802 | Medical nutrition therapy; initial assessment and intervention, individual, face-to-face with the patient, each 15 minutes                           | No cost share for women when billed with appropriate pregnancy related ICD-10 Diagnosis code |
| 97803 | Medical nutrition therapy; reassessment and intervention, individual, face-to-face with the patient, each 15 minutes                                 | No cost share for women when billed with appropriate pregnancy related ICD-10 Diagnosis code |
| 97804 | Medical nutrition therapy; group (2 or more individual(s)), each 30 minutes                                                                          | No cost share for women when billed with appropriate pregnancy related ICD-10 Diagnosis code |
| S9470 | Nutritional counseling, dietitian visit                                                                                                              | No cost share for women when billed with appropriate pregnancy related ICD-10 Diagnosis code |

## Healthy Diet and Physical Activity for Cardiovascular Disease Prevention in Adults with Cardiovascular Risk Factors: Behavioral Counseling Interventions

### (November 2020) Rating B

The USPSTF recommends offering or referring adults with cardiovascular disease risk factors to behavioral counseling interventions to promote a healthy diet and physical activity.

| Code        | Description                                                                                                                    |

## Hemoglobinopathies Screening: Newborns

### (Sept 2017) Rating B

The USPSTF recommends screening for sickle cell disease in newborns. No co-pay for screening of sickle cell disease in newborns under 2 months old when submitted with appropriate code (below).

| Code  | Billing Instruction | Code Description              |
|-------|---------------------|-------------------------------|
| 85660 |                     | Sickle Cell Disease screening |

## Hepatitis B Screening: Virus Infection in Adolescents and Adults at Increased Risk

### (December 2020) Rating B

The USPSTF recommends screening for hepatitis B virus (HBV) infection in adolescents and adults at increased risk for infection. This recommendation applies to asymptomatic, nonpregnant adolescents and adults at increased risk for HBV infection, including those who were vaccinated before being screened for HBV infection. The USPSTF has made a separate recommendation on screening in pregnant women.

| 86706 | Hepatitis B surface antibody (HBsAb)                                                                                                                                                                                                                                                                            |
| 87340 | Infectious agent antigen detection by immunoassay technique, qualitative or semiquantitative; hepatitis B surface antigen (HBsAg)                                                                                                                                                                               |
| G0499 | Hepatitis B screening in nonpregnant, high-risk individual includes hepatitis B surface antigen (HBSAG), antibodies to HBSAG (anti-HBS) and antibodies to hepatitis B core antigen (anti-HBC), and is followed by a neutralizing confirmatory test, when performed, only for an initially reactive HBSAG result |

## Hepatitis B Virus Infection in Pregnant Women: Screening

### (June 2019) Rating A

The USPSTF recommends screening for hepatitis B virus (HBV) infection in pregnant women at their first prenatal visit.

The following codes are eligible for no cost-sharing when submitted with one of the specified pregnancy-related ICD-10 diagnosis codes listed below, provided the diagnosis code is reported as the principal diagnosis.

| Code  | Description                                                                                                                       |
|-------|-----------------------------------------------------------------------------------------------------------------------------------|
| 86704 | Hepatitis B core antibody (HBcAb); total                                                                                          |
| 86705 | Hepatitis B core antibody (HBcAb); IgM antibody                                                                                   |
| 86706 | Hepatitis B surface antibody (HBsAb)                                                                                              |
| 87340 | Infectious agent antigen detection by immunoassay technique, qualitative or semiquantitative; hepatitis B surface antigen (HBsAg) |

| 86804       | Hepatitis C antibody; confirmatory test (eg, immunoblot)                                   |
| G0472       | Hepatitis C antibody screening for individual at high risk and other covered indication(s) |

## **Human Immunodeficiency Virus (HIV) Infections: Screening for Pregnant Persons, Adolescents, and Adults 15–65)**

### **(June 2019) Rating A**

The USPSTF recommends that clinicians screen for HIV infection in adolescents and adults aged 15 to 65 years. Younger adolescents and older adults who are at increased risk of infection should also be screened. The USPSTF recommends that clinicians screen for HIV infection in all pregnant persons, including those who present in labor or at delivery whose HIV status is unknown.

The WPSI recommends all adolescent and adult women, ages 15 and older, receive a screening test for human immunodeficiency virus (HIV) at least once during their lifetime. Earlier or additional screening should be based on risk and rescreening annually or more often may be appropriate beginning at age 13 for adolescent and adult women with an increased risk of HIV infection. The WPSI recommends risk assessment and prevention education for HIV infection beginning at age 13 and continuing as determined by risk. A screening test for HIV is recommended for all pregnant women upon initiation of prenatal care with rescreening during pregnancy based on risk factors. Rapid HIV testing is recommended for pregnant women who present in labor with an undocumented HIV status.

Medical & Facility – No cost share for screening HIV infection in pregnant women, including those who present in labor who are untested and whose HIV status is unknown.

## **Prevention of Acquisition of Human Immunodeficiency Virus (HIV): Preexposure Prophylaxis**

### **(August 2023) Rating A**

The USPSTF recommends that clinicians prescribe preexposure prophylaxis using effective antiretroviral therapy to persons who are at increased risk of HIV acquisition to decrease the risk of acquiring HIV.

Note: This benefit also includes the following services:

- Kidney function testing (creatinine),
- Serologic testing for Hepatitis B and C virus,
- Testing for other STIs,
- Pregnancy testing (when appropriate), and
- Ongoing follow-up and monitoring including HIV testing every 3 months

\*Refer to the plan's pharmacy benefit for details on prescription medications available under the plan's preventive benefit.

The codes listed below must be billed with one of the following diagnosis codes: Z11.3, Z11.4, Z20.2, Z20.6, Z29.81, Z72.51, Z72.52, Z72.53

## Hypertension in Adults: Screening

### (April 2021) Rating A

The USPSTF recommends screening for hypertension in adults 18 years or older with office blood pressure measurement (OBPM). The USPSTF recommends obtaining blood pressure measurements outside of the clinical setting for diagnostic confirmation before starting treatment.

| Code        | Description                                                                                                                |
|-------------|----------------------------------------------------------------------------------------------------------------------------|
| 99401-99404 | Preventive medicine counseling and/or risk factor reduction intervention(s) provided to an individual (separate procedure) |

## Hypertensive Disorders of Pregnancy: Screening

### (September 2023) Rating B

The USPSTF recommends screening for hypertensive disorders in pregnant persons without a known diagnosis of a hypertensive disorder of pregnancy or chronic hypertension. Blood pressure should be measured at every prenatal visit throughout pregnancy.

Note: Blood pressure measurements should be performed and included in the antenatal visit.

## Hypothyroidism Screening (Newborns)

### (March 2008) Rating A

The USPSTF recommends screening for congenital hypothyroidism in newborns.

No cost share for congenital hypothyroidism screening in newborns when billed with appropriate CPT code.

| Code  | Billing Instruction | Code Description                     |
|-------|---------------------|--------------------------------------|
| 84437 |                     | Hypothyroidism screening in newborns |

## Intimate Partner and Domestic Violence and Caregiver Abuse of Older or Vulnerable Adults: Screening

### **(June 2025) Rating B**

The USPSTF recommends that clinicians screen for intimate partner violence (IPV) in women of reproductive age, including those who are pregnant and postpartum. The recommendation on screening for IPV applies to adolescents and adults who are pregnant or postpartum, and women of reproductive age who do not have recognized signs and symptoms of IPV.

The WPSI recommends screening adolescent and adult women for intimate partner and domestic violence, at least annually, and, when needed, providing intervention services. Intimate partner and domestic violence includes physical violence, sexual violence, stalking and psychological aggression (including coercion), reproductive coercion, neglect, and the threat of violence, abuse, or both. Intervention services include, but are not limited to, counseling, education, harm reduction strategies, and appropriate supportive services.

|-------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 99384-99387 | Initial comprehensive preventive medicine evaluation and management of an individual including an age and gender appropriate history, examination, counseling/anticipatory guidance/risk factor reduction interventions, and the ordering of laboratory/diagnostic procedures, new patient;            |
| 99394-99397 | Periodic comprehensive preventive medicine reevaluation and management of an individual including an age and gender appropriate history, examination, counseling/anticipatory guidance/risk factor reduction interventions, and the ordering of laboratory/diagnostic procedures, established patient; |
| 99401-99404 | Preventive medicine counseling and/or risk factor reduction intervention(s) provided to an individual (separate procedure)                                                                                                                                                                             |

### **Latent Tuberculosis Infection in Adults: Screening**

#### **(May 2023) Rating B**

The USPSTF recommends screening for latent tuberculosis infection (LTBI) in populations at increased risk.

HRSA's Bright Futures Project recommends testing should be performed on recognition of high-risk factors

There will be no cost share for the following codes when billed with one of the following diagnosis codes:

Z111, Z117, Z201, Z227, Z8615

| Code  | Description                                                                                                                                  |

| 86480 | Tuberculosis test, cell mediated immunity antigen response measurement; gamma interferon                                                     |
| 86481 | Tuberculosis test, cell mediated immunity antigen response measurement; enumeration of gamma interferon-producing T-cells in cell suspension |
| 86580 | Skin test; tuberculosis, intradermal                                                                                                         |

### **Lung Cancer: Screening**

#### **(March 2021) Rating B**

The USPSTF recommends annual screening for lung cancer with low-dose computed tomography (LDCT) in adults aged 50 to 80 years who have a 20 pack-year smoking history and currently smoke or have quit within the past 15 years. Screening should be discontinued once a person has not smoked for 15 years or develops a health problem that substantially limits life expectancy or the ability or willingness to have curative lung surgery.

Note: Prior authorization is required for 71271.

### **Ocular Prophylaxis for Gonococcal Ophthalmia Neonatorum: Preventive Medication**

#### **(January 2019) Rating A**

The USPSTF recommends prophylactic ocular topical medication for all newborns to prevent gonococcal ophthalmia neonatorum.

Prophylactic ocular topical medication for all newborns to prevent gonococcal ophthalmia neonatorum is considered part of standard neonatal care and is included in the global fee for infant nursery care during inpatient admission.

### **Osteoporosis to Prevent Fractures: Screening Postmenopausal women younger than 65 years with 1 or more risk factors for osteoporosis**

#### **(January 2025) Rating B**

The USPSTF recommends screening for osteoporosis to prevent osteoporotic fractures in postmenopausal women younger than 65 years who are at increased risk for an osteoporotic fracture as estimated by clinical risk assessment. This recommendation applies to adults 40 years or older without known osteoporosis or history of fragility fractures. It does not apply to persons with secondary osteoporosis due to an underlying medical condition (eg, cancer, metabolic bone diseases, or hyperthyroidism) or chronic use of a medication (eg, glucocorticoids) associated with bone loss.

| Code  | Description                                                                                                                               |
|-------|-------------------------------------------------------------------------------------------------------------------------------------------|

## Prevention of Dental Caries in Children Younger Than 5 Years: Screening and Interventions

### (December 2021) Rating B

The USPSTF recommends that primary care clinicians apply fluoride varnish to the primary teeth of all infants and children starting at the age of primary tooth eruption.

The USPSTF also recommends that primary care clinicians prescribe oral fluoride supplementation starting at age 6 months for children whose water supply is deficient in fluoride.

| Code            | Description                                                                                                                |
|-----------------|----------------------------------------------------------------------------------------------------------------------------|
| 99188           | Application of topical fluoride varnish by a physician or other qualified health care professional                         |
| 99401-<br>99404 | Preventive medicine counseling and/or risk factor reduction intervention(s) provided to an individual (separate procedure) |

Note: Codes D1206 and D1208 are not reimbursable under the medical benefit.

## Rh(D) Incompatibility: Screening Pregnant women, during the first pregnancy-related care visit and Screening Unsensitized Rh(D)-negative pregnant women

### (February 2004) Rating A

The USPSTF strongly recommends Rh(D) blood typing and antibody testing for all pregnant women during their first visit for pregnancy-related care.

The USPSTF recommends repeated Rh(D) antibody testing for all unsensitized Rh(D)-negative women at 24 to 28 weeks' gestation, unless the biological father is known to be Rh(D)-negative.

| Code  | Description                     |
|-------|---------------------------------|
| 86901 | Blood typing, serologic; Rh (D) |

## Sexually Transmitted Infections Counseling

### (August 2020) Rating B

The USPSTF recommends behavioral counseling for all sexually active adolescents and for adults who are at increased risk for sexually transmitted infections (STIs).

WPSI recommends behavioral counseling by a health care clinician or other appropriately trained individual for sexually

active adolescent and adult women at an increased risk for sexually transmitted infections (STIs). WPSI recommends that clinicians review a woman's sexual history and risk factors to help identify those at an increased risk of STIs. Risk factors include, but are not limited to, age younger than 25, a recent history of an STI, a new sex partner, multiple partners, a partner with concurrent partners, a partner with an STI, and a lack of or inconsistent condom use. For adolescents and women not identified as high risk, counseling to reduce the risk of STIs should be considered, as determined by clinical judgment.

| Code        | Description                                                                                                                                                               |

| 99411-99412 | Preventive medicine counseling and/or risk factor reduction intervention(s) provided to an individual in a group setting (separate procedure)                             |
| G0445*      | Semiannual high intensity behavioral counseling to prevent STIs, individual, face-to-face, includes education skills training & guidance on how to change sexual behavior |

\*Limited to 2x a year

## Skin Cancer Prevention: Behavioral Counseling

### (March 2018) Rating B

The USPSTF recommends counseling young adults, adolescents, children, and parents of young children about minimizing exposure to ultraviolet (UV) radiation for persons aged 6 months to 24 years with fair skin types to reduce their risk of skin cancer.

| Code        | Description                                                                                                                                                                                                                                                                                             |

## Statin Preventive Medication

### (Aug 2022) Rating B

Adults age 40–75 years with no history of CVD, 1 or more CVD risk factors, and a calculated 10-year CVD event risk of 10% or greater

No cost share for adults without a history of cardiovascular disease (CVD) (i.e., symptomatic coronary artery disease or ischemic stroke) use a low- to moderate-dose statin for the prevention of CVD events and mortality when all the following criteria are met: 1) they are ages 40 to 75 years; 2) they have 1 or more CVD risk factors (i.e., dyslipidemia, diabetes, hypertension, or smoking); and 3) they have a calculated 10- year risk of a cardiovascular event of 10% or greater. Identification of dyslipidemia and calculation of 10-year CVD event risk requires universal lipids screening in adults ages 40 to 75 years.

| Code  | Billing Instruction                                                                           | Code Description                                                                                                                                                                                  |

## Syphilis Infection in Nonpregnant Adolescents, Adults, and Pregnant Women: Screening (September 2022) Rating A

The USPSTF recommends screening for syphilis infection in persons who are at increased risk for infection.

(May 2025) Rating A

The USPSTF recommends early, universal screening for syphilis infection during pregnancy; if an individual is not screened early in pregnancy, the USPSTF recommends screening at the first available opportunity. This recommendation applies to all adolescents and adults who are pregnant, whether or not risk factors for syphilis are present.

HRSA's Bright Futures Project: recommends high-risk teens, screen for syphilis at least once a year.

| Code  | Description                                                              |
|-------|--------------------------------------------------------------------------|
| 86592 | Syphilis test, non-treponemal antibody; qualitative (eg, VDRL, RPR, ART) |
| 86593 | Syphilis test, non-treponemal antibody; quantitative                     |

## Interventions for Tobacco Smoking Cessation in Adults, Including Pregnant Persons (January 2021) Rating A

The USPSTF recommends that clinicians ask all adults about tobacco use, advise them to stop using tobacco, and provide behavioral interventions and U.S. Food and Drug Administration (FDA)– approved pharmacotherapy for cessation to nonpregnant adults who use tobacco.

The USPSTF recommends that clinicians ask all pregnant persons about tobacco use, advise them to stop using tobacco, and provide behavioral interventions for cessation to pregnant persons who use tobacco.

Reimbursement restricted to the following specialties:

- Primary Care Physicians: Family Practice, Internal Medicine, General Practitioners
- Specialists: OB/GYN, Pediatricians Services (included in Preventive E&M codes)

Note: MVP considers Smoking, Tobacco, Vaping/ E-cigarettes included under this recommendation.

| Code  | Description                                                                                               |
|-------|-----------------------------------------------------------------------------------------------------------|
| 99406 | Smoking and tobacco use cessation counseling visit; intermediate, greater than 3 minutes up to 10 minutes |
| 99407 | Smoking and tobacco use cessation counseling visit; intensive, greater than 10 minutes                    |

## Tobacco Use Interventions: Children and Adolescents (Aug 2020) Rating B

The USPSTF recommends that clinicians provide interventions, including education or brief counseling, to prevent initiation of tobacco use in school-age children and adolescents.

Note: MVP considers Smoking, Tobacco, Vaping/E-cigarettes included under this recommendation

| Code  | Description                                                                                               |
|-------|-----------------------------------------------------------------------------------------------------------|
| 99406 | Smoking and tobacco use cessation counseling visit; intermediate, greater than 3 minutes up to 10 minutes |

### Unhealthy Alcohol Use in Adolescents and Adults: Screening and Behavioral Counseling Interventions (November 2018) Rating B

USPSTF recommends screening for unhealthy alcohol use in primary care settings in adults 18 years or older, including pregnant women, and providing persons engaged in risky or hazardous drinking with brief behavioral counseling interventions to reduce unhealthy alcohol use.

HRSA's Bright Futures Project recommends substance use should be evaluated as part of an age-appropriate comprehensive history. Reviewing the adolescent's environment can identify risk and protective factors for the development of alcohol or drug abuse.

| Code  | Description                                                                                                                                                |
|-------|------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 99408 | Alcohol and/or substance (other than tobacco) abuse structured screening (eg, AUDIT, DAST), and brief intervention (SBI) services; 15 to 30 minutes        |
| 99409 | Alcohol and/or substance (other than tobacco) abuse structured screening (eg, AUDIT, DAST), and brief intervention (SBI) services; greater than 30 minutes |
| G0442 | Annual alcohol misuse screening, 5 to 15 minutes                                                                                                           |
| G0443 | Brief face-to-face behavioral counseling for alcohol misuse, 15 minutes                                                                                    |

### Unhealthy Drug Use: Screening (July 2020) Rating B

The USPSTF Recommends screening by asking questions about unhealthy drug use in adults aged 18 years or older. Screening should be implemented when services for accurate diagnosis, effective treatment, and appropriate care can be offered or referred. (Screening refers to asking questions about unhealthy drug use, not testing biological specimens.)

HRSA's Bright Futures Project recommends that substance use should be evaluated as part of an age-appropriate comprehensive history. Reviewing the adolescent's environment can identify risk and protective factors for the development of alcohol or drug abuse.

| Code  | Description                                                                                                                                                |
|-------|------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 99408 | Alcohol and/or substance (other than tobacco) abuse structured screening (eg, AUDIT, DAST), and brief intervention (SBI) services; 15 to 30 minutes        |
| 99409 | Alcohol and/or substance (other than tobacco) abuse structured screening (eg, AUDIT, DAST), and brief intervention (SBI) services; greater than 30 minutes |

### Screening for Urinary Incontinence

The WPSI recommends screening women for urinary incontinence annually. Screening should assess whether women experience urinary incontinence and whether it impacts their activities and quality of life. If indicated, facilitating further evaluation and treatment is recommended.

No cost share for screening women for urinary incontinence annually.

## Vision in Children Ages 6 Months to 5 Years: Screening

### (September 2017) Rating B

The USPSTF recommends vision screening at least once in all children aged 3 to 5 years to detect amblyopia or its risk factors.

| Code  | Description                                              |
|-------|----------------------------------------------------------|
| 99173 | Screening test of visual acuity, quantitative, bilateral |

## Weight Loss to Prevent Obesity-Related Morbidity and Mortality in Adults: Behavioral Interventions and Obesity Prevention in Midlife Women

### (September 2018) Rating B

The USPSTF recommends that clinicians offer or refer adults with a body mass index (BMI) of 30 or higher (calculated as weight in kilograms divided by height in meters squared) to intensive, multicomponent behavioral interventions.

WPSI recommend a to counsel midlife women aged 40 to 60 years with normal or overweight body mass index (BMI) (18.5–29.9 kg/m<sup>2</sup>) to maintain weight or limit weight gain to prevent obesity. Counseling may include individualized discussion of healthy eating and physical activity.

## Women's Preventive Health-Contraception methods and counseling

The WPSI recommends that adolescent and adult women have access to the full range of contraceptives and contraceptive care to prevent unintended pregnancies and improve health outcomes. Contraceptive care includes screening, education, counseling, and provision of contraceptives (including in the immediate postpartum period). Contraceptive care also includes follow-up care (eg, management, evaluation, and changes, including the removal, continuation, and discontinuation of contraceptives). The WPSI recommends that the full range of U.S. Food and Drug Administration (FDA)-approved, -granted, or -cleared contraceptives, effective family planning practices, and sterilization procedures be available as part of contraceptive care.

The full range of contraceptives currently includes those listed in the FDA's Birth Control Guide:

- 1) sterilization surgery for women,
- 2) implantable rods,
- 3) copper intrauterine devices,
- 4) intrauterine devices with progestin (all durations and doses),
- 5) injectable contraceptives,

- 6) oral contraceptives (combined pill),
- 7) oral contraceptives (progestin only),
- 8) oral contraceptives (extended or continuous use),
- 9) the contraceptive patch,
- 10) vaginal contraceptive rings,
- 11) diaphragms,
- 12) contraceptive sponges,
- 13) cervical caps,
- 14) condoms,
- 15) spermicides,
- 16) emergency contraception (levonorgestrel),
- 17) emergency contraception (ulipristal acetate); and any additional contraceptives approved, granted, or cleared by the FDA.

| 99214 | Office or other outpatient visit for the evaluation and management of an established patient, which requires a medically appropriate history and/or examination and moderate level of medical decision making. |
| 99215 | Office or other outpatient visit for the evaluation and management of an established patient, which requires a medically appropriate history and/or examination and high level of medical decision making.     |

### Women's Preventive Health: Well-woman Preventive Visits

The Women's Preventive Services Initiative recommends that women receive at least one preventive care visit per year beginning in adolescence and continuing across the lifespan to ensure the provision of all recommended preventive services. The primary purpose of well-woman visits is the delivery and coordination of recommended preventive services as determined by age and risk factors. These services may be completed at a single visit or as part of a series of visits that take place over time to obtain all necessary services depending on a woman's age, health status, reproductive health needs, pregnancy status, and risk factors. Well-women visits also include pre-pregnancy, prenatal, postpartum and interpregnancy visits.

| G0438       | Annual wellness visit; includes a personalized prevention plan of service (pps), initial visit                                                                                                                                                                                                          |
| G0439       | Annual wellness visit; includes a personalized prevention plan of service (PPS), subsequent visit                                                                                                                                                                                                       |
| S0610       | Annual Gynecological Examination, new patient                                                                                                                                                                                                                                                           |
| S0612       | Annual Gynecological Examination, established patient                                                                                                                                                                                                                                                   |
| S0613       | Annual Gynecological Examination, clinical breast examination without pelvic evaluation                                                                                                                                                                                                                 |

## Immunizations for Adults and Children

The immunization codes listed below are based on recommendation guidelines from the Advisory Committee on Immunization Practices (ACIP). When administered in accordance with these guidelines, cost share does not apply.

| Code  | Description                                                                                                                                                                                             |
|-------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 90378 | Respiratory syncytial virus, monoclonal antibody, recombinant, for intramuscular use, 50 mg, each                                                                                                       |
| 90380 | Respiratory syncytial virus, monoclonal antibody, seasonal dose; 0.5 mL dosage, for intramuscular use                                                                                                   |
| 90381 | Respiratory syncytial virus, monoclonal antibody, seasonal dose; 1 mL dosage, for intramuscular use                                                                                                     |
| 90382 | Respiratory syncytial virus, monoclonal antibody, seasonal dose, 0.7 mL, for intramuscular use                                                                                                          |
| 90611 | Smallpox and monkeypox vaccine, attenuated vaccinia virus, live, non-replicating, preservative free, 0.5 mL dosage, suspension, for subcutaneous use                                                    |
| 90612 | Influenza virus vaccine, trivalent, and severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) (coronavirus disease [COVID-19]) vaccine, mRNA-LNP, 31.7 mcg/0.32 mL dosage, for intramuscular use |
| 90613 | Influenza virus vaccine, quadrivalent, and severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) (coronavirus disease [COVID-19]) vaccine, mRNA-LNP, 40 mcg/0.4 mL dosage, for intramuscular use |
| 90619 | Meningococcal conjugate vaccine, serogroups A, C, W, Y, quadrivalent, tetanus toxoid carrier (MenACWY-TT), for intramuscular use                                                                        |
| 90620 | Meningococcal recombinant protein and outer membrane vesicle vaccine, serogroup B (MenB-4C), for intramuscular use                                                                                      |

|       |                                                                                                                                                                                                         |
|-------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 90621 | Meningococcal recombinant lipoprotein vaccine, serogroup B (MenB-FHbp), 2 or 3 dose schedule, for intramuscular use                                                                                     |
| 90623 | Meningococcal pentavalent vaccine, conjugated Men A, C, W, Y-tetanus toxoid carrier, and Men B-FHbp, for intramuscular use                                                                              |
| 90624 | Meningococcal pentavalent vaccine, Men B-4C recombinant proteins and outer membrane vesicle and conjugated Men A, C, W, Y-diphtheria toxoid carrier, for intramuscular use                              |
| 90631 | Influenza virus vaccine (IIV), H5, pandemic formulation, split virus, adjuvanted, for intramuscular use                                                                                                 |
| 90632 | Hepatitis A vaccine (HepA), adult dosage, for intramuscular use                                                                                                                                         |
| 90633 | Hepatitis A vaccine (HepA), pediatric/adolescent dosage-2 dose schedule, for intramuscular use                                                                                                          |
| 90634 | Hepatitis A vaccine (HepA), pediatric/adolescent dosage-3 dose schedule, for intramuscular use                                                                                                          |
| 90635 | Influenza virus vaccine, H5N1, derived from cell cultures, adjuvanted, for intramuscular use                                                                                                            |
| 90636 | Hepatitis A and hepatitis B vaccine (HepA-HepB), adult dosage, for intramuscular use                                                                                                                    |
| 90637 | Influenza virus vaccine, quadrivalent (qIRV), mRNA; 30 mcg/0.5 mL dosage, for intramuscular use                                                                                                         |
| 90638 | Influenza virus vaccine, quadrivalent (qIRV), mRNA; 60 mcg/0.5 mL dosage, for intramuscular use                                                                                                         |
| 90644 | Meningococcal conjugate vaccine, serogroups C & Y and Haemophilus influenzae type b vaccine (Hib-MenCY), 4 dose schedule, when administered to children 6 weeks-18 months of age, for intramuscular use |
| 90647 | Haemophilus influenzae type b vaccine (Hib), PRP-OMP conjugate, 3 dose schedule, for intramuscular use                                                                                                  |
| 90648 | Haemophilus influenzae type b vaccine (Hib), PRP-T conjugate, 4 dose schedule, for intramuscular use                                                                                                    |
| 90649 | Human Papillomavirus vaccine, types 6, 11, 16, 18, quadrivalent (4vHPV), 3 dose schedule, for intramuscular use                                                                                         |
| 90650 | Human Papillomavirus vaccine, types 16, 18, bivalent (2vHPV), 3 dose schedule, for intramuscular use                                                                                                    |
| 90651 | Human Papillomavirus vaccine types 6, 11, 16, 18, 31, 33, 45, 52, 58, nonavalent (9vHPV), 2 or 3 dose schedule, for intramuscular use                                                                   |
| 90653 | Influenza vaccine, inactivated (IIV), subunit, adjuvanted, for intramuscular use                                                                                                                        |
| 90655 | Influenza virus vaccine, trivalent (IIV3), split virus, preservative free, 0.25 mL dosage, for intramuscular use                                                                                        |
| 90656 | Influenza virus vaccine, trivalent (IIV3), split virus, preservative free, 0.5 mL dosage, for intramuscular use                                                                                         |
| 90657 | Influenza virus vaccine, trivalent (IIV3), split virus, 0.25 mL dosage, for intramuscular use                                                                                                           |
| 90658 | Influenza virus vaccine, trivalent (IIV3), split virus, 0.5 mL dosage, for intramuscular use                                                                                                            |
| 90660 | Influenza virus vaccine, trivalent, live (LAIV3), for intranasal use                                                                                                                                    |
| 90661 | Influenza virus vaccine, trivalent (cclIIV3), derived from cell cultures, subunit, antibiotic free, 0.5 mL dosage, for intramuscular use                                                                |
| 90662 | Influenza virus vaccine (IIV), split virus, preservative free, enhanced immunogenicity via increased antigen content, for intramuscular use                                                             |
| 90664 | Influenza virus vaccine, live (LAIV), pandemic formulation, for intranasal use                                                                                                                          |
| 90666 | Influenza virus vaccine (IIV), pandemic formulation, split virus, preservative free, for intramuscular use                                                                                              |
| 90667 | Influenza virus vaccine (IIV), pandemic formulation, split virus, adjuvanted, for intramuscular use                                                                                                     |
| 90668 | Influenza virus vaccine (IIV), pandemic formulation, split virus, for intramuscular use                                                                                                                 |
| 90670 | Pneumococcal conjugate vaccine, 13 valent (PCV13), for intramuscular use                                                                                                                                |
| 90671 | Pneumococcal conjugate vaccine, 15 valent (PCV15), for intramuscular use                                                                                                                                |
| 90672 | Influenza virus vaccine, quadrivalent, live (LAIV4), for intranasal use                                                                                                                                 |
| 90673 | Influenza virus vaccine, trivalent (RIV3), derived from recombinant DNA, hemagglutinin (HA) protein only, preservative and antibiotic free, for intramuscular use                                       |
| 90674 | Influenza virus vaccine, quadrivalent (cclIIV4), derived from cell cultures, subunit, preservative and antibiotic free, 0.5 mL dosage, for intramuscular use                                            |
| 90677 | Pneumococcal conjugate vaccine, 20 valent (PCV20), for intramuscular use                                                                                                                                |
| 90678 | Respiratory syncytial virus vaccine, preF, subunit, bivalent, for intramuscular use                                                                                                                     |
| 90679 | Respiratory syncytial virus vaccine, preF, recombinant, subunit, adjuvanted, for intramuscular use                                                                                                      |
| 90680 | Rotavirus vaccine, pentavalent (RV5), 3 dose schedule, live, for oral use                                                                                                                               |
| 90681 | Rotavirus vaccine, human, attenuated (RV1), 2 dose schedule, live, for oral use                                                                                                                         |
| 90682 | Influenza virus vaccine, quadrivalent (RIV4), derived from recombinant DNA, hemagglutinin (HA) protein only, preservative and antibiotic free, for intramuscular use                                    |

|       |                                                                                                                                                                                                                       |
|-------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 90683 | Respiratory syncytial virus vaccine, mRNA lipid nanoparticles, for intramuscular use                                                                                                                                  |
| 90684 | Pneumococcal conjugate vaccine, 21 valent (PCV21), for intramuscular use                                                                                                                                              |
| 90685 | Influenza virus vaccine, quadrivalent (IIV4), split virus, preservative free, 0.25 mL, for intramuscular use                                                                                                          |
| 90686 | Influenza virus vaccine, quadrivalent (IIV4), split virus, preservative free, 0.5 mL dosage, for intramuscular use                                                                                                    |
| 90687 | Influenza virus vaccine, quadrivalent (IIV4), split virus, 0.25 mL dosage, for intramuscular use                                                                                                                      |
| 90688 | Influenza virus vaccine, quadrivalent (IIV4), split virus, 0.5 mL dosage, for intramuscular use                                                                                                                       |
| 90689 | Influenza virus vaccine quadrivalent (IIV4), inactivated, adjuvanted, preservative free, 0.25 mL dosage, for intramuscular use                                                                                        |
| 90694 | Influenza virus vaccine, quadrivalent (aIIV4), inactivated, adjuvanted, preservative free, 0.5 mL dosage, for intramuscular use                                                                                       |
| 90695 | Influenza virus vaccine, H5N8, derived from cell cultures, adjuvanted, for intramuscular use                                                                                                                          |
| 90696 | Diphtheria, tetanus toxoids, acellular pertussis vaccine and inactivated poliovirus vaccine (DTaP-IPV), when administered to children 4 through 6 years of age, for intramuscular use                                 |
| 90697 | Diphtheria, tetanus toxoids, acellular pertussis vaccine, inactivated poliovirus vaccine, Haemophilus influenzae type b PRP-OMP conjugate vaccine, and hepatitis B vaccine (DTaP-IPV-Hib-HepB), for intramuscular use |
| 90698 | Diphtheria, tetanus toxoids, acellular pertussis vaccine, Haemophilus influenzae type b, and inactivated poliovirus vaccine, (DTaP-IPV/Hib), for intramuscular use                                                    |
| 90700 | Diphtheria, tetanus toxoids, and acellular pertussis vaccine (DTaP), when administered to individuals younger than 7 years, for intramuscular use                                                                     |
| 90702 | Diphtheria and tetanus toxoids adsorbed (DT) when administered to individuals younger than 7 years, for intramuscular use                                                                                             |
| 90707 | Measles, mumps and rubella virus vaccine (MMR), live, for subcutaneous use                                                                                                                                            |
| 90710 | Measles, mumps, rubella, and varicella vaccine (MMRV), live, for subcutaneous use                                                                                                                                     |
| 90713 | Poliovirus vaccine, inactivated (IPV), for subcutaneous or intramuscular use                                                                                                                                          |
| 90714 | Tetanus and diphtheria toxoids adsorbed (Td), preservative free, when administered to individuals 7 years or older, for intramuscular use                                                                             |
| 90715 | Tetanus, diphtheria toxoids and acellular pertussis vaccine (Tdap), when administered to individuals 7 years or older, for intramuscular use                                                                          |
| 90716 | Varicella virus vaccine (VAR), live, for subcutaneous use                                                                                                                                                             |
| 90723 | Diphtheria, tetanus toxoids, acellular pertussis vaccine, hepatitis B, and inactivated poliovirus vaccine (DTaP-HepB-IPV), for intramuscular use                                                                      |
| 90732 | Pneumococcal polysaccharide vaccine, 23-valent (PPSV23), adult or immunosuppressed patient dosage, when administered to individuals 2 years or older, for subcutaneous or intramuscular use                           |
| 90733 | Meningococcal polysaccharide vaccine, serogroups A, C, Y, W-135, quadrivalent (MPSV4), for subcutaneous use                                                                                                           |
| 90734 | Meningococcal conjugate vaccine, serogroups A, C, W, Y, quadrivalent, diphtheria toxoid carrier (MenACWY-D) or CRM197 carrier (MenACWY-CRM), for intramuscular use                                                    |
| 90736 | Zoster (shingles) vaccine (HZV), live, for subcutaneous injection                                                                                                                                                     |
| 90739 | Hepatitis B vaccine (HepB), CpG-adjuvanted, adult dosage, 2 dose or 4 dose schedule, for intramuscular use                                                                                                            |
| 90740 | Hepatitis B vaccine (HepB), dialysis or immunosuppressed patient dosage, 3 dose schedule, for intramuscular use                                                                                                       |
| 90743 | Hepatitis B vaccine (HepB), adolescent, 2 dose schedule, for intramuscular use                                                                                                                                        |
| 90744 | Hepatitis B vaccine (HepB), pediatric/adolescent dosage, 3 dose schedule, for intramuscular use                                                                                                                       |
| 90746 | Hepatitis B vaccine (HepB), adult dosage, 3 dose schedule, for intramuscular use                                                                                                                                      |
| 90747 | Hepatitis B vaccine (HepB), dialysis or immunosuppressed patient dosage, 4 dose schedule, for intramuscular use                                                                                                       |
| 90748 | Hepatitis B and Haemophilus influenzae type b vaccine (Hib-HepB), for intramuscular use                                                                                                                               |
| 90750 | Zoster (shingles) vaccine (HZV), recombinant, subunit, adjuvanted, for intramuscular use                                                                                                                              |
| 90756 | Influenza virus vaccine, quadrivalent (cIIV4), derived from cell cultures, subunit, antibiotic free, 0.5mL dosage, for intramuscular use                                                                              |
| 90759 | Hepatitis B vaccine (HepB), 3-antigen (S, Pre-S1, Pre-S2), 10 mcg dosage, 3 dose schedule, for intramuscular use                                                                                                      |
| 91304 | Severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) (coronavirus disease [COVID-19]) vaccine, recombinant spike protein nanoparticle, saponin-based adjuvant, 5 mcg/0.5 mL dosage, for intramuscular use     |
| 91318 | Severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) (coronavirus disease [COVID-19]) vaccine, mRNA-LNP, spike protein, 3 mcg/0.3 mL dosage, tris-sucrose formulation, for intramuscular use                  |

|       |                                                                                                                                                                                                       |
|-------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 91319 | Severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) (coronavirus disease [COVID-19]) vaccine, mRNA-LNP, spike protein, 10 mcg/0.3 mL dosage, tris-sucrose formulation, for intramuscular use |
| 91320 | Severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) (coronavirus disease [COVID-19]) vaccine, mRNA-LNP, spike protein, 30 mcg/0.3 mL dosage, tris-sucrose formulation, for intramuscular use |
| 91321 | Severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) (coronavirus disease [COVID-19]) vaccine, mRNA-LNP, 25 mcg/0.25 mL dosage, for intramuscular use                                         |
| 91322 | Severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) (coronavirus disease [COVID-19]) vaccine, mRNA-LNP, 50 mcg/0.5 mL dosage, for intramuscular use                                          |
| 91323 | Severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) (coronavirus disease [COVID-19]) vaccine, mRNA-LNP, 10 mcg/0.2 mL dosage, for intramuscular use                                          |
| J3530 | Nasal vaccine inhalation                                                                                                                                                                              |
| Q2034 | Influenza virus vaccine, split virus, for intramuscular use (Agriflu)                                                                                                                                 |
| Q2035 | Influenza virus vaccine, split virus, when administered to individuals 3 years of age and older, for intramuscular use (AFLURIA)                                                                      |
| Q2036 | Influenza virus vaccine, split virus, when administered to individuals 3 years of age and older, for intramuscular use (FLULAVAL)                                                                     |
| Q2037 | Influenza virus vaccine, split virus, when administered to individuals 3 years of age and older, for intramuscular use (FLUVIRIN)                                                                     |
| Q2038 | Influenza virus vaccine, split virus, when administered to individuals 3 years of age and older, for intramuscular use (Fluzone)                                                                      |
| Q2039 | Influenza virus vaccine, not otherwise specified                                                                                                                                                      |

## Immunization Administration

No cost share will be billed for the following codes when reported with an appropriate immunization code (above).

| Code  | Description                                                                                                                                                                                                                                                                                                                                         |
|-------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 90460 | Immunization administration through 18 years of age via any route of administration, with counseling by physician or other qualified health care professional; first or only component of each vaccine or toxoid administered                                                                                                                       |
| 90461 | Immunization administration through 18 years of age via any route of administration, with counseling by physician or other qualified health care professional; first or only component of each vaccine or toxoid administered each additional vaccine or toxoid component administered. (List separately in addition to code for primary procedure) |
| 90471 | Immunization administration through 18 years of age via any route of administration, with counseling by physician or other qualified health care professional; first or only component of each vaccine or toxoid administered each additional vaccine or toxoid component administered. (List separately in addition to code for primary procedure) |
| 90472 | Immunization administration (includes percutaneous, intradermal, subcutaneous, or intramuscular injections); each additional vaccine (single or combination vaccine/ toxoid). (List separately in addition to code for primary procedure)                                                                                                           |
| 90473 | Immunization administration by intranasal or oral route; 1 vaccine (single or combination vaccine/toxoid)                                                                                                                                                                                                                                           |
| 90474 | Immunization administration by intranasal or oral route; each additional vaccine (single or combination vaccine/toxoid) (List separately in addition to code for primary procedure)                                                                                                                                                                 |
| 96380 | Administration of respiratory syncytial virus, monoclonal antibody, seasonal dose by intramuscular injection, with counseling by physician or other qualified health care professional                                                                                                                                                              |
| 96381 | Administration of respiratory syncytial virus, monoclonal antibody, seasonal dose by intramuscular injection                                                                                                                                                                                                                                        |
| G0008 | Administration of influenza virus vaccine                                                                                                                                                                                                                                                                                                           |
| G0009 | Administration of pneumococcal vaccine                                                                                                                                                                                                                                                                                                              |
| G0010 | Administration of hepatitis B vaccine                                                                                                                                                                                                                                                                                                               |

## COVID-19 Vaccine and Administrative Billing Guidelines

MVP covers approved COVID-19 vaccines at no cost-share to Members in all plans, when administered by a Participating Provider. MVP will reimburse providers for the administration of the COVID-19 vaccine when the guidance below is followed when submitting for reimbursement for administration of the COVID-19 vaccine.

| Code                                 | Description                                                                                                                                                                                                                                    | Age Range                 | Administration Code |
|--------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------|---------------------|
| Pfizer Vaccine Codes and Age Ranges  |                                                                                                                                                                                                                                                |                           |                     |
| 91318                                | Severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) (coronavirus disease [COVID-19]) vaccine, mRNA-LNP, spike protein, preservative free, 3 mcg/0.2 mL dosage, diluent reconstituted, tris-sucrose formulation, for intramuscular use | 6 months through 4 years  | 90480               |
| 91319                                | Severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) (coronavirus disease [COVID-19]) vaccine, mRNA-LNP, preservative free 10mcg/0.2 mL dosage, tris-sucrose formulation, for intramuscular use                                        | 5 years through 11 years  | 90480               |
| 91320                                | Severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) (coronavirus disease [COVID-19]) vaccine, mRNA-LNP, preservative free 30 mcg/0.3 mL dosage, tris-sucrose formulation, for intramuscular use                                       | 12 years and older        | 90480               |
| Moderna Vaccine Codes and Age Ranges |                                                                                                                                                                                                                                                |                           |                     |
| 91321                                | Severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) (coronavirus disease [COVID-19]) vaccine, mRNA-LNP, preservative free, 25 mcg/0.25 mL dosage for intramuscular use                                                                | 6 months through 11 years | 90480               |
| 91322                                | Severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) (coronavirus disease [COVID-19]) vaccine, mRNA-LNP, preservative free, 50 mcg/0.5 mL dosage for intramuscular use                                                                 | 12 years and older        | 90480               |
| Novavax Vaccine Code and Age Range   |                                                                                                                                                                                                                                                |                           |                     |
| 91304                                | Severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) (coronavirus disease [COVID-19]) vaccine, recombinant spike protein nanoparticle, saponin-based adjuvant, 5mcg/0.5 mL dosage, for intramuscular use                               | 12 years and older        | 90480               |

Administration code 90480 is to be used with all COVID-19 vaccine product codes. As with previous, more granular COVID-19 vaccine administration codes, counseling is included in code 90480 and should not be reported separately.

## Hemoglobin/Hematocrit Testing

| Code  | Description       | Business Rule                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|-------|-------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 86762 | Antibody; rubella | No cost share for rubella antibody testing as follows: when performed on children under the age of 13 months as a preventive visit when billed with the appropriate CPT code (left). Children are covered for one (1) test and immunization between 11 and 17 years of age as a preventive visit when billed with the appropriate CPT code (left). Adults are covered for one (1) test and immunization between 18 and 49 years of age as a preventive visit when billed with the appropriate CPT code (left). |

## Women's Preventive Health – HPV Testing

| Code  | Description                                                                                                                                                                              | Business Rule                                                                              |
|-------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------|
| 87623 | Infectious agent detection by nucleic acid (DNA or RNA); Human Papillomavirus (HPV), low-risk types (e.g., 6, 11, 42, 43, 44)                                                            | No cost share for HPV testing in females over age 30 when billed with appropriate CPT code |
| 87624 | Infectious agent detection by nucleic acid (DNA or RNA); Human Papillomavirus (HPV), high-risk types (e.g., 16, 18, 31, 33, 35, 39, 45, 51, 52, 56, 58, 59, 68)                          | No cost share for HPV testing in females over age 30 when billed with appropriate CPT code |
| 87625 | Infectious agent detection by nucleic acid (DNA or RNA); Human Papillomavirus (HPV), types 16 and 18 only, includes type 45, if performed                                                | No cost share for HPV testing in females over age 30 when billed with appropriate CPT code |
| 88174 | Cytopathology, cervical or vaginal (any reporting system), collected in preservative fluid, automated thin layer preparation; screening by automated system, under physician supervision | No cost share for HPV testing in females over age 30 when billed with appropriate CPT code |

## Women's Preventive Health – Sterilization Surgery

| Code  | Description                                                                                                                                                                                               | Business Rule                                                                                                                                                                                                        |
|-------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 58565 | Hysteroscopy, surgical                                                                                                                                                                                    | No cost share for contraceptive use and counseling for women when billed with appropriate CPT codes                                                                                                                  |
| 58600 | Ligation or transection of fallopian tube(s), abdominal or vaginal approach, unilateral or bilateral                                                                                                      | No cost share for female sterilization surgery for females when billed with the appropriate CPT codes                                                                                                                |
| 58605 | Ligation or transection of fallopian tube(s), abdominal or vaginal approach, postpartum, unilateral or bilateral, during same hospitalization                                                             | No cost share for female sterilization surgery for females when billed with the appropriate CPT codes                                                                                                                |
| 58611 | Ligation or transection of fallopian tube(s) when done at the time of cesarean delivery or intra-abdominal surgery (not a separate procedure) (List separately in addition to code for primary procedure) | No cost share for female sterilization surgery for females when billed with the appropriate CPT codes                                                                                                                |
| 58615 | Occlusion of fallopian tube(s) by device (e.g., band, clip, Falope ring) vaginal or suprapubic approach                                                                                                   | No cost share for female sterilization surgery for females when billed with the appropriate CPT codes                                                                                                                |
| 58661 | Removal of adnexal structures (partial or total oophorectomy and/or salpingectomy)                                                                                                                        | No cost share for female sterilization surgery when billed with the appropriate CPT codes (left) and appropriate Contraceptive related ICD-10 diagnosis code set billed in the principal diagnosis position          |
| 58670 | Laparoscopy, surgical; with fulguration of oviducts (with or without transection)                                                                                                                         | No cost share for female sterilization surgery for females when billed with the appropriate CPT codes                                                                                                                |
| 58671 | Laparoscopy, surgical; with occlusion of oviducts by device (eg, band, clip, or Falope ring)                                                                                                              | No cost share for contraceptive use and counseling for women when billed with appropriate CPT codes                                                                                                                  |

## Men's Preventive Health—Contraception Consultation and Voluntary Sterilization

### (Vermont Only)

In accordance with 8 V.S.A. § 4099c. Reproductive health equity in health insurance coverage, a health insurance plan shall provide coverage for voluntary sterilization procedures for men and women without any deductible, coinsurance, co-payment, or other cost-sharing requirement, except to the extent that such coverage would disqualify a high-deductible health plan from eligibility for a health savings account pursuant to 26 U.S.C. §

223. This includes consultation services associated with providing the procedures covered under this section.

For Non-HDHP Plans, no cost share will be billed for male counseling when billed with the following codes and

appropriate Contraceptive related ICD-10 diagnosis code set billed in the principal diagnosis position.

For Qualified HDHP Plans, no cost share will be applied after deductible for male counseling when billed with the following codes and appropriate Contraceptive related ICD-10 diagnosis code set billed in the principal diagnosis position.

| Code  | Description                                                                                                                                                                                                    |
|-------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 99202 | Office or other outpatient visit for the evaluation and management of a new patient, which requires a medically appropriate history and/or examination and straightforward medical decision making.            |
| 99203 | Office or other outpatient visit for the evaluation and management of a new patient, which requires a medically appropriate history and/or examination and low level of medical decision making.               |
| 99204 | Office or other outpatient visit for the evaluation and management of a new patient, which requires a medically appropriate history and/or examination and moderate level of medical decision making.          |
| 99205 | Office or other outpatient visit for the evaluation and management of a new patient, which requires a medically appropriate history and/or examination and high level of medical decision making.              |
| 99211 | Office or other outpatient visit for the evaluation and management of an established patient that may not require the presence of a physician or other qualified health care professional.                     |
| 99212 | Office or other outpatient visit for the evaluation and management of an established patient, which requires a medically appropriate history and/or examination and straightforward medical decision making.   |
| 99213 | Office or other outpatient visit for the evaluation and management of an established patient, which requires a medically appropriate history and/or examination and low level of medical decision making.      |
| 99214 | Office or other outpatient visit for the evaluation and management of an established patient, which requires a medically appropriate history and/or examination and moderate level of medical decision making. |
| 99215 | Office or other outpatient visit for the evaluation and management of an established patient, which requires a medically appropriate history and/or examination and high level of medical decision making.     |

## Men's Preventive Health—Elective Sterilization Vasectomy Surgery

### (Vermont Only)

#### 8 V.S.A. § 4099c. Reproductive Health Equity in Health Insurance Coverage

A health insurance plan shall provide coverage for voluntary sterilization procedures for men and women without any deductible, coinsurance, co-payment, or other cost-sharing requirement, except to the extent that such coverage would disqualify a high-deductible health plan from eligibility for a health savings account pursuant to 26 U.S.C. sec 223.

For non-HDHP Plans, no cost share will be billed for male sterilization surgery when billed with the following codes. For Qualified HDHP Plans, no cost share will be applied after deductible for male sterilization surgery when billed with the following codes.

| Code  | Description                                                                                                          |
|-------|----------------------------------------------------------------------------------------------------------------------|
| 00921 | Anesthesia for procedures on male genitalia (including open urethral procedures); vasectomy, unilateral or bilateral |
| 55250 | Vasectomy, unilateral or bilateral (separate procedure) including postoperative semen examinations(s)                |
| 88302 | Level IV - Surgical pathology, gross and microscopic examination                                                     |

## Men's Preventive Health— Post-Surgical Lab work

For Non-HDHP Plans, no cost share will be billed for lab work when billed with the following codes and appropriate Contraceptive related ICD-10 diagnosis code set billed in the principal diagnosis position.

For Qualified HDHP Plans, no cost share will be applied after deductible for lab work when billed with the following codes and appropriate Contraceptive related ICD-10 diagnosis code set billed in the principal diagnosis position.

| Code  | Description                                                         |
|-------|---------------------------------------------------------------------|
| 89320 | Semen analysis; volume, count, motility, and differential           |
| 89321 | Semen analysis; sperm presence and motility of sperm, if performed. |

## Modifier PT

| Code                                                                                                          | Description                                                                                                                                                                                                                       | Business Rule                                                                                                                                                                                                                                                                                                                                                                |
|---------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Modifier PT should be used when a CRC screening test has been converted to diagnostic test or other procedure | MVP will pay the diagnostic procedure code that is reported instead of the screening colonoscopy or screening flexible sigmoidoscopy HCPCS code, or screening barium enema, when the screening test becomes a diagnostic service. | The claims processing system would respond to the modifier by waiving the deductible for all surgical services on the same date as the diagnostic test. Co-insurance for Medicare beneficiaries would continue to apply to the diagnostic test and to other services furnished in connection with, as a result of, and in the same clinical encounter as the screening test. |

## Modifier 33

\*Each preventive care service will identify the specific billing rules as to when to apply Modifier 33 or when Modifier is not needed to be billed.

| Code                | Description                                                                                                                                                                                                                                                                                                                                                                                                                                     | Business Rule                                                                               |
|---------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------|
| Preventive Services | When the primary purpose of the service is the delivery of an evidence-based service in accordance with a US Preventive Services Task Force A or B rating in effect and other preventive services identified in preventive services mandates (legislative or regulatory), the service may be identified by adding 33 to the procedure. For separately reported services specifically identified as preventive, the modifier should not be used. | The Member's co-pay/co-insurance/cost share for this service will be waived as appropriate. |

## Code Sets

Pregnancy-related ICD-10 diagnosis code set billed in the principal diagnosis position:

A34, O00-O9A, Z03.71, Z03.72, Z03.73, Z03.74, Z03.75, Z03.79, Z33.1, Z33.3, Z34.00, Z34.01, Z34.02, A34.03, Z34.80, Z34.81, Z34.82, Z34.83, Z34.90, Z34.91, Z34.92, Z34.93, Z36.0, Z36.1, Z36.2, Z36.3, Z36.4, Z36.5, Z36.81, Z36.82, Z36.83, Z36.84, Z36.85, Z36.86, Z36.87, Z36.88, Z36.89, Z36.8A, Z36.9, Z37.0, Z37.1, Z37.2, Z37.3, Z37.4, Z37.50, Z37.51, Z37.52, Z37.53, Z37.54, Z37.59, Z37.60, Z37.61, Z37.62, Z37.63, Z37.64, Z37.69, Z37.7, Z37.9, Z39.0, Z39.1, Z39.2, Z3A.00, Z3A.01, Z3A.08, Z3A.09, Z3A.10, Z3A.11, Z3A.12, Z3A.13, Z3A.14, Z3A.15, Z3A.16, Z3A.17, Z3A.18, Z3A.19, Z3A.20, Z3A.21, Z3A.22, Z3A.23, Z3A.24, Z3A.25, Z3A.26, Z3A.27, Z3A.28, Z3A.29, Z3A.30, Z3A.31, Z3A.32, Z3A.33, Z3A.34, Z3A.35, Z3A.36, Z3A.37, Z3A.38, Z3A.39, Z3A.40, Z3A.41, Z3A.42, Z3A.49

## References

Under Section 2713 of the Affordable Care Act, private health plans must provide coverage for a range of recommended evidence-based preventive services and may not impose cost-sharing (such as copayments, deductibles, or co-insurance) on patients receiving these services. The four expert medical and scientific bodies that provide these preventive service recommendations under the Affordable Care Act (ACA) are:

1. U.S. Preventive Services Task Force (USPSTF), Rating "A" or "B" [www.uspreventiveservicestaskforce.org](http://www.uspreventiveservicestaskforce.org)
2. Advisory Committee on Immunization Practices (ACIP) [www.cdc.gov/acip-recs/hcp/vaccine-specific/](http://www.cdc.gov/acip-recs/hcp/vaccine-specific/)
3. Health Resources and Services Administration's (HRSA) Bright Futures Project [mchb.hrsa.gov/programs-impact/bright-futures](http://mchb.hrsa.gov/programs-impact/bright-futures)
4. HRSA-sponsored Women's Preventive Services Initiative (WPSI) [www.hrsa.gov/womens-guidelines;](http://www.hrsa.gov/womens-guidelines;) [www.womenspreventivehealth.org/recommendations/](http://www.womenspreventivehealth.org/recommendations/)

Note: The USPSTF Recommendation "A" or "B" letter grade indicates that the panel finds there is high certainty that the services have a substantial or moderate net health benefit.

This Preventive Health Care guidance may also apply to state regulations that vary from USPSTF guidelines. Examples of these are:

- A 55-year-old man has a colonoscopy for colorectal cancer screening. The code for this service is billed with CPT code 45378. MVP will not take a co-pay, if, either a modifier 33 is appended to the procedure code or one of the diagnosis codes in the table, such as Z12.10 (Encounter for screening for malignant neoplasm of the intestinal tract, unspecified), is put in the first diagnosis position on the claim. Associated services, such as anesthesia, will

not be subject to co-pay, co-insurance, or deductible if a diagnosis code such as Z12.10 is the first diagnosis on the claim.

- A 40-year-old woman has a bilateral mammogram for breast cancer screening. The code for this service is billed with CPT code 77067. There are no other billing requirements. MVP will not take a co-pay for screening mammograms, with or without clinical breast examination, every 1 to 2 years for women, age 40 years and older.

## Revision Summary

| Review Date – 11/1/2025                   |                                                                                                                                                     |

Last Reviewed Date: April 1, 2025

## RADIOLOGY

Policy  
Prior Authorization Requests  
Billing/Coding Guidelines  
History

---

### Policy

MVP will continue to require prior authorizations for radiology services with eviCore until December 31, 2025, for certain ASO Plan Members. When prior authorization is required, it will apply to all Technical, Professional, Global and/or Facility claims submitted for the service. If services requiring prior authorization are provided without MVP approval, claims for such services will be denied administratively.

MVP requires an overread by a Radiologist or a Specialist Physician practicing within the scope of their specialty when diagnostic images are performed and read by Primary Care Physicians, Physician Assistants and Nurse Practitioners. Specialist Physician are required to have the image overread by a Radiologist if the imaging is outside the scope of their practice.

### Prior Authorization Requests

To determine prior authorization requirements for radiology, please refer to information provided on eviCore's website at [evicore.com](https://www.evicore.com).

### Billing/Coding Guidelines

#### Diagnostic Radiology Reading

MVP reimburses for only one (1) reading of a diagnostic radiology test. Duplicate readings are not eligible for reimbursement and will be denied administratively.

#### Diagnostic Radiology Prior Authorization

MVP will not reimburse Professional, Technical, Global, and/or Facility radiology claims submitted for services that require a prior authorization in the following situations:

- Services provided when an authorization is required but there is not a valid authorization for the services obtained
- Radiology claims that require prior authorization that are submitted with a Modifier 26 for the professional reading will not be reimbursed without a valid authorization

Prior authorization for a Member can be confirmed through eviCore's website by the following steps:

1. Go to **[www.evicore.com](https://www.evicore.com)**
2. Click on Check Status of Existing Prior Authorization
3. Choose Search by Member Information and then choose MVP for Health plan

# Radiopharmaceuticals

## RADIOPHARMACEUTICALS

Policy  
Definitions  
Notification/Prior Authorization Requests  
Billing/Coding Guidelines  
Revision Summary  
History

## Policy

Radiopharmaceuticals commonly used in nuclear medicine and molecular imaging will be reimbursed in accordance with CMS billing guidelines. Billing and coding guidelines vary based on product lines, and certain radiopharmaceutical codes for product lines will require an invoice as supporting documentation.

## Notification/Prior Authorization Requests

MVP Payment Policies are not a guarantee of payment. Providers must also review MVP's Utilization Management Guides to determine if prior authorization is required and can refer to the searchable PDF versions of Medical, Pharmacy and other Provider and Payment policies for guidelines. The current policies can be found [here](#).

## Billing/Coding Guidelines

**For Commercial, Exchange, and Medicaid Claims. Codes will be paid up to \$100 without an invoice**

| A9555                                                                                                                    | Rubidium Rb-82, diagnostic, per study dose, up to 60 millicuries                            |
| A9556                                                                                                                    | Gallium ga-67 citrate, diagnostic, per millicurie                                           |
| <b>The following Radiopharmaceutical codes will not be reimbursed as they are considered inclusive of the procedure:</b> |                                                                                             |
| A9552                                                                                                                    | Fluorodeoxyglucose f-18 fdg, diagnostic, per study dose, up to 45 millicuries               |

Any other Radiopharmaceutical code not on the above tiers with a billed charge of over \$50 will require an invoice.

## For Medicare Claims

An invoice is required regardless of the billed charge amount. Without an invoice, services will be reimbursed at the Medicare Fee Schedule or at a reasonable and customary rate as set by MVP.

# Robotic and Computer Assisted Surgery

Effective Date: October 1, 2025

## ROBOTIC AND COMPUTER ASSISTED SURGERY

- Policy
- Definitions
- Notification/Prior Authorization
- Billing/Coding Guidelines
- Reimbursement Guidelines
- Notification/Prior Authorization Requests
- References
- History

## Policy

Robotic and Computer Assisted Surgery refers to the use of surgical robots, and computer-assisted devices to facilitate manipulation, positioning, and control of instrumentation during a variety of surgical procedures. These devices are used at the discretion of a surgeon.

## Definitions

Computer-assisted navigation devices may be image-based or non-image-based. Image-based devices use preoperative computed tomography scans, and operative fluoroscopy to direct implant positioning. Newer non-image-based devices use information obtained in the operating room, typically with infrared probes.

Computer assisted stereotactic technology for cranial procedures, also known as neuronavigation, combines preoperative imaging with navigational computer software to localize surgical targets. The goal of neuronavigation is to facilitate presurgical planning and to provide intraoperative guidance to the surgeon.

## Notification/Prior Authorization Requests

MVP Payment Policies are not a guarantee of payment. Providers must also review MVP's Utilization Management Guides to determine if prior authorization is required and can refer to the searchable PDF versions of Medical, Pharmacy and other Provider and Payment policies for guidelines. The current policies can be found [here](#).

| 31627     | Bronchoscopy, rigid or flexible, including fluoroscopic guidance, when performed; with computer-assisted, image guided navigation |
| 61781     | Stereotactic computer-assisted (navigational) procedure; cranial, intradural                                                      |
| 61782     | Stereotactic computer-assisted (navigational) procedure; cranial, extradural                                                      |
| 61783     | Stereotactic computer-assisted (navigational) procedure; spinal                                                                   |

## Reimbursement Guidelines

MVP provides coverage for surgical procedures that are medically necessary and meet the criteria in MVP Medical Policies. The use of specific surgical techniques, instrumentation, and surgical approaches is left to the discretion of the surgeon. MVP does not provide additional professional or technical reimbursement, and it will not be made to hospitals, surgery centers or facilities for use of robotic, or computer assisted instrumentation utilizing CPT codes 0054T, 0055T, 20985, 31627, 61781, 61782, 61783 and S2900 because payment is included in the reimbursement for the primary procedure. CPT-4 or HCPC Level II Codes indicating robotic surgical system(s) or computer-assisted navigation will be denied as inclusive or global as they are not eligible for separate payment. This policy applies to both professional and facility providers.

Use of Modifier 22 (increased procedural services) appended to the primary surgical procedure is not appropriate if used exclusively for the purpose of reporting the use of robotic assistance. Modifier 22 may only be used when substantial additional work is performed, (ie, increased intensity, time, technical difficulty of procedure, severity of patient's condition, and physical and mental effort required) that is unrelated to robotic assistance.

## MVP Health Care Payment Policy

# Services Not Separately Reimbursed

### SERVICES NOT SEPARATELY REIMBURSED

Policy  
Notification/Prior Authorization Requests  
Reimbursement Guidelines  
Revision Summary  
History

## Policy

MVP does not reimburse separately for the services that fall under the categories listed below; these services are inclusive of other payments made by MVP. The services addressed in this policy apply to MVP's commercial products and Medicaid Managed Care (MMC) plans. The services in this policy would be paid in accordance with original Medicare claims processing guidelines for MVP's Medicare Advantage products.

## Notification/Prior Authorization Requests

MVP Payment Policies are not a guarantee of payment. Providers must also review MVP's Utilization Management Guides to determine if prior authorization is required and can refer to the searchable PDF versions of Medical, Pharmacy and other Provider and Payment policies for guidelines. The current policies can be found [here](#).

## Reimbursement Guidelines

Services and CPT codes that are considered inclusive of other payments and are not separately reimbursed include but are not limited to:

| Category                                                                                                                                                                                                                                                                                                                                                    | CPT Codes                                                                                                                                                                                                                                                                                            |

History

## Policy

Speech Therapy (ST) is reimbursed when performed by an appropriate health care provider for the treatment of a severe impairment of speech/language and an evaluation has been completed by a certified speech-language pathologist that includes age-appropriate standardized tests that measure the extent of the impairment, performance deviation, and language and pragmatic skills assessment levels.

Speech therapy is also reimbursed when prescribed for a course of voice therapy by an appropriate health care provider for a significant voice disorder that is the result of anatomic abnormality, neurological condition, injury (e.g., vocal nodules or polyps, vocal cord paresis or paralysis, paradoxical vocal cord motion) or provided after vocal cord surgery.

## Definitions

Speech therapy is the treatment of defects and disorders of speech and language disorders. Prior to the initiation of speech therapy, a comprehensive evaluation of the patient and his or her speech and language potential is generally required before a full treatment plan is formulated.

Speech therapy services should be individualized to the specific communication needs of the patients. They should be provided one-to-one by a speech-language pathologist educated in the assessment of speech and language development and the treatment of language and speech disorders. A speech-language pathologist can offer specific strategies, exercises, and activities to regain function communication abilities.

## Notification/Prior Authorization Requests

MVP Payment policies are not a guarantee of payment. Providers must also check Member eligibility and refer to the Member Benefits Display to determine benefits. Providers must also review MVP's Utilization Management Guides to determine if prior authorization is required and the Benefit Interpretation Manual for MVP's clinical guidelines. These resources can be accessed by signing into your account at [mvphealthcare.com](http://mvphealthcare.com).

## Billing/Coding Guidelines

The following CPT codes are covered for Speech Therapy providers:

| CPT Code | CPT Code                                                                                             |
|----------|------------------------------------------------------------------------------------------------------|
| 92507    | Treatment of speech, language, voice, communication, and/or auditory processing disorder; individual |

|       |                                                                                                                                                                                                                                                                            |
|-------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 92521 | Evaluation of speech fluency (e.g., stuttering, cluttering)                                                                                                                                                                                                                |
| 92522 | Evaluation of speech sound production (e.g., articulation, phonological process, apraxia, dysarthria); with evaluation of language comprehension and expression (e.g., receptive and expressive language)                                                                  |
| 92523 | Evaluation of speech sound production (e.g., articulation, phonological process, apraxia, dysarthria); with evaluation of language comprehension and expression (e.g., receptive and expressive language)                                                                  |
| 92524 | Behavioral and qualitative analysis of voice and resonance                                                                                                                                                                                                                 |
| 92526 | Treatment of swallowing dysfunction and/or oral function for feeding                                                                                                                                                                                                       |
| 92609 | Therapeutic services for the use of speech-generating device, including programming and modification                                                                                                                                                                       |
| 92610 | Evaluation of oral and pharyngeal swallowing function                                                                                                                                                                                                                      |
| 92611 | Motion fluoroscopic evaluation of swallowing function by cine or video recording                                                                                                                                                                                           |
| 92612 | Flexible endoscopic evaluation of swallowing by cine or video recording;                                                                                                                                                                                                   |
| 92626 | Evaluation of auditory function for surgically implanted device(s) candidacy or postoperative status of a surgically implanted device(s); first hour                                                                                                                       |
| 92627 | Evaluation of auditory function for surgically implanted device(s) candidacy or postoperative status of a surgically implanted device(s); each additional 15 minutes                                                                                                       |
| 92630 | Auditory rehabilitation; prelingual hearing loss                                                                                                                                                                                                                           |
| 92633 | Auditory rehabilitation; post lingual hearing loss                                                                                                                                                                                                                         |
| 96105 | Assessment of aphasia (includes assessment of expressive and receptive speech and language function, language comprehension, speech production ability, reading, spelling, writing, eg, by Boston Diagnostic Aphasia Examination) with interpretation and report, per hour |
| G0153 | Services performed by a qualified speech-language pathologist in the home health or hospice setting, each 15 minutes                                                                                                                                                       |
| S9128 | Speech therapy, in the home, per diem                                                                                                                                                                                                                                      |
| S9152 | Speech therapy, re-evaluation                                                                                                                                                                                                                                              |
| 92622 | Diagnostic analysis, programming, and verification of an auditory osseointegrated sound processor, any type; first 60 minutes                                                                                                                                              |
| 92623 | Diagnostic analysis, programming, and verification of an auditory osseointegrated sound processor, any type; each additional 15 minutes (List separately in addition to code for primary procedure)                                                                        |

For reimbursement of DME supplies, please see the Utilization Management in the MVP Provider and Payment Policies for dispensing guidelines and code coverage.

## Non-Reimbursable Speech Therapy Services

- Any computer-based learning program for speech or voice training purposes
- School speech programs
- Speech or voice therapy that duplicates services already being provided as part of an authorized therapy program through another therapy discipline (e.g., occupational therapy)
- Group speech or voice therapy (because it is not one-on-one, individualized to the specific person's needs, code 92508)
- Speech therapy in a group setting (92508) is only covered for Medicare Advantage Plans.
- Maintenance programs of routine, repetitive drills/exercises that do not require the skills of a speech- language therapist and that can be reinforced by the individual or caregiver

- Vocational rehabilitation programs and any programs with the primary goal of returning an individual to work
- Therapy or treatment provided to prevent or slow deterioration in function or prevent reoccurrences
- Therapy or treatment intended to improve or maintain general physical condition
- Therapy or treatment provided to improve or enhance job, school or recreational performance
- Laryngoscopy, flexible or rigid telescopic, with stroboscopy (CPT 31579) is a diagnostic procedure to be performed by a physician. It may not be performed by a speech-language pathologist
- Sensory Integration Therapy (CPT 97533) is excluded from coverage. See the Speech Therapy (Outpatient) and Cognitive Rehabilitation Medical Policy for details.

## Medicare Therapy Cap

There is a combined annual per beneficiary therapy cap amount for physical therapy and speech language pathology services combined and a separate amount allotted for occupational therapy services. The amount of the cap is determined by CMS and may change periodically.

The therapy cap with an exceptions process applies to services furnished in the following outpatient therapy settings: physical therapists in private practice, physician offices, skilled nursing facilities (Part B), rehabilitation agencies (or ORFs), comprehensive outpatient rehabilitation facilities (CORFs), and outpatient hospital departments.

The provider should use the KX modifier to the therapy procedure code that is subject to the cap limits only when a beneficiary qualifies for a therapy cap exception. The KX modifier should not be used prior to the Member meeting their therapy cap. By attaching the KX modifier, the provider is attesting that the services billed:

- Qualified for the cap exception
- Are reasonable and necessary services that require the skills of a therapist and
- Are justified by appropriate documentation in the medical record.

Claims for patients who meet or exceed the annual Medicare stated therapy service threshold in therapy expenditures will be subject to a manual medical review.

## Reimbursement Guidelines

Please see your provider fee schedule or your IPA agreement for specific reimbursement guidelines.

## MVP Health Care Payment Policy

# Surgical Supplies

**Effective Date: October 1, 2025**

## SURGICAL SUPPLIES

Policy  
Definitions  
Notification/Prior Authorization Requests  
Billing/Coding Guidelines  
References  
History

## Policy

MVP follows CMS guidelines and does not reimburse for surgical supplies (except Splinting and Casting) separate from the Evaluation and Management and/or Procedure codes when billed at the professional level. These supplies are bundled into the practice expense RVU and will not be reimbursed when billed with the E&M/procedure code or as a stand-alone service.

## Definitions

**The Practice Expense (PE) Relative Value Unit (RVU)** reflects the costs of maintaining a practice. PE RVU includes but is not limited to:

- Medical and/or Surgical Supplies (i.e., surgical trays, syringes, saline irrigation or flush supplies, dressings, and gloves)
- Staffing Costs
- Renting office space and expenses incurred to run the office (i.e., furniture, utilities, office supplies)
- Purchasing and maintaining equipment

## Notification/Prior Authorization Requests

MVP Payment Policies are not a guarantee of payment. Providers must also review MVP's Utilization Management Guides to determine if prior authorization is required and can refer to the searchable PDF versions of Medical, Pharmacy and other Provider and Payment policies for guidelines. The current policies can be found [here](#).

## Policy

MVP reimburses Virtual Check-ins, Interprofessional Telephone/Internet/Electronic Health Record Consultations (eConsults), and Telehealth Services when used appropriately to increase efficiencies in delivering patient care. Telehealth Services, which are live audio-only or audio-visual services provided through electronic information and communication devices to patients at a site (originating site) that is not the same as the Provider (distant site), may also be accessible through MyVisitNow® or Gia Urgent Care. This policy serves as a guide to assist providers in accurate telehealth claims submissions for Medicare, Medicaid, Health and Recovery Plan ("HARP"), Essential Health Plans, Child Health Plus and Commercial plans, and is not meant to be an exhaustive list for every payment scenario. Guidance from federal and state authorities may be updated from time to time, and the reference links within this policy are provided to assist providers in accessing currently available guidance. Definitions related to Telehealth can be found in the applicable statute, regulation and/or guidance.

## Notification/Prior Authorization Requests

MVP Payment Policies are not a guarantee of payment. Providers must also review MVP's Utilization Management Guides to determine if prior authorization is required and can refer to the searchable PDF versions of Medical, Pharmacy and other Provider and Payment policies for guidelines. The current policies can be found [here](#).

## Billable Codes and Descriptions

### Professionals

The following Place of Service Codes should be used when billing for Telehealth Services on Professional Claims:

| Place of Service Code | Description                                                                                                                                                                                                                                                                                                                                                                        |
|-----------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 02                    | Telehealth is delivered in a setting other than the home of the patient.                                                                                                                                                                                                                                                                                                           |
| 10                    | The location where health services and health related services are provided or received through telecommunication technology. Patient is located in their home (which is a location other than a hospital or other facility where the patient receives care in a private residence) when receiving health services or health related services through telecommunication technology |

### Modifiers

The following Modifiers should be used when billing for Telehealth Services to the extent applicable:

| Modifier | Description                                                                                                                                                                                                                                                                                                                       |
|----------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 95       | Denotes a telehealth system that provides two-way, real time audiovisual conferencing between a patient and the provider, in which the provider at a distant site provides healthcare services including an examination for a patient at a different location. The patient must be an active participant in the telehealth visit. |
| 93       | Synchronous Telehealth services rendered via telephone or other real-time interactive audio-only telecommunications systems (i.e., audio-only). NOTE: Modifier 93 is to be used for all audio-only services, including                                                                                                            |

|    |                                                                                                                                                                                                                                                                                                                                                                                                        |
|----|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|    | mental health services furnished via audio-only. For Rural Health Clinics (RHCs), Federally Qualified Health Centers (FQHCs) and Opioid Treatment Programs (OTPs), modifier 93 must be used, but modifier FQ should be used as well when services are furnished in such settings. (This modifier is excluded from use on codes 98000-98016)                                                            |
| FQ | Telehealth service was furnished using real-time audio-only communication technology. For RHCs, FQHCs and OTPs, this modifier must be used in conjunction with modifier 93.                                                                                                                                                                                                                            |
| FR | A supervising practitioner was present through a real-time two-way, audio/video communication technology.                                                                                                                                                                                                                                                                                              |
| GQ | Telehealth services are delivered via asynchronous telecommunication system (store and forward technology).                                                                                                                                                                                                                                                                                            |
| GT | Telehealth services are delivered via interactive audio and video telecommunication systems.                                                                                                                                                                                                                                                                                                           |
| 25 | Significant, separately identifiable Evaluation and Management (E&M) service by the same physician or other qualified health care professional on the same day as a procedure or other services. For example, the Member has a psychiatric consultation via telemedicine on the same day as a primary care E&M visit at the originating site. The E&M service should be appended with the 25 modifier. |
| HD | Used with maternal remote patient monitoring; denotes pregnant/postpartum services.                                                                                                                                                                                                                                                                                                                    |
| U1 | Used in conjunction with other modifiers for enhanced reimbursement for certain services. Only to be used with codes 99451 and 99452                                                                                                                                                                                                                                                                   |

## Medicare, Essential Health Plans, and Commercial Plans

MVP will reimburse for covered Telehealth Services and in compliance with the CMS [List of Telehealth Services for each calendar year](#), including audio-only services. However, audio-video services are highly encouraged over audio-only services for quality of care. MVP also encourages the Provider to notate the reason for the services to be audio-only and any Member preference for providing audio-only services.

## Medicaid, HARP, and Child Health Plus

MVP will reimburse Telehealth Services for Medicaid, HARP and Child Health Plus Members in accordance with guidance provided by NY Department of Health, Office of Mental Health (OMH), Office for People With Developmental Disabilities (OPWDD), and Office of Addiction Services and Supports (OASAS). Telehealth Services include audio-visual services, store and forward technology, remote patient monitoring, after-hours services, virtual check-ins, virtual patient education, and for certain Providers, virtual eTriage. Telehealth Services provided through audio-only should only be used in rare occasions to meet the personalized needs of each Member and in compliance with the most current guidelines developed by the NY Department of Health, which can be found on their [website](#).

For Medicaid products, licensed physicians or Nurse Practitioners may bill for Telehealth Services provided in an Article 28 Facility setting; however, the Ambulatory Patient Group (APG) payment for all other Telehealth providers providing Telehealth services in an Article 28 Facility setting are included in MVP's APG payment to the Article 28 Facility.

## Allowable Telehealth Platforms

Authorized Providers who deliver Telehealth Services must use non-public facing communication technologies and/or platforms that comply with the HIPAA rules.

## Remote Patient Monitoring

Remote Patient Monitoring (RPM) may be utilized as Telehealth Services when medically necessary to monitor Members with certain health conditions and must be discontinued when their condition is determined to have stabilized. RPM must be ordered by a New York licensed physician, nurse practitioner or midwife who has examined the Member and with whom the Member has an established, documented, and ongoing relationship. Member health information or data may be received at the Distant Site by a New York licensed registered nurse. While ordering RPM, the Provider must see the Member in-person, as needed, for follow-up care.

Certified Home Health Agencies (“CHHA”) are ineligible to provide RPM Telehealth Services to a Member if they are receiving home health care services through the CHHA.

### OMH Specific Requirements

Providers licensed by the Office of Mental Health (OMH) or listed as a designated Provider, must follow current [OMH guidelines for Telehealth Services](#), including but not limited to obtaining approval to use telehealth. Additional criteria and information specific to OMH Providers are listed in the OMH guidelines referenced above.

Effective July 1, 2025, OMH requires providers to use modifier 93 for eligible telehealth audio-only mental health services.

Billing for services by an OMH licensed or designated provider follows the NY Department of Health Guidelines and the billing instructions listed above for Medicaid, HARP and Child Health Plus.

### EConsults

eConsults are only permitted between a treating/requesting provider and a consultative provider, limited to physicians, psychiatrists, physician assistants, nurse practitioners, and midwives, for answering patient-specific treatment questions based on clinical information provided during the consultation or the Member’s electronic health record, without the need for an in-person visit. These consultations cannot be used to arrange referrals for in-person visits. Providers must obtain verbal consent from the Member before providing virtual services, which must be documented in the Member’s chart, and inform Members that these services will be subject to applicable Deductibles, Co-insurance, or Copays according to the Member’s benefits. Additionally, the virtual check-in or eConsult must be medically necessary and the medical record must include information from the treating/requesting provider about i) the written or verbal consent made by the Member for the eConsult; ii) the request made by the treating/requesting provider; and iii) the recommendation and rationale from the consultative provider. Effective June 1, 2025, a modifier combination of U1, U1 must be appended to the claim line to receive the enhanced rate.

### Additional Billable Codes and Descriptions

In addition to the CMS allowable Place of Service Codes and Modifiers above, the NY Department of Health separately provides the following Billable Codes and Descriptions applicable to Medicaid, HARP, and Child Health Plus programs.

| Services                                       | Codes | Description                                                                                                                                             | Notes                                                                                                                                                     |
|------------------------------------------------|-------|---------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------|
| Tele-dentistry                                 | D9995 | Synchronous tele-dentistry services using audio-visual technology; can include urgent visits, follow-up visits, and new patient screening               | Modifier cannot be used.                                                                                                                                  |
| Tele-dentistry                                 | D9996 | Asynchronous transmission of recorded health information (store and forward technology)                                                                 | Modifier cannot be used.                                                                                                                                  |
| Telehealth Facility (including Tele-dentistry) | Q3014 | Originating Site Facility Fee                                                                                                                           | For facilities only; Only facilities should use this code and the Member must be physically present in the originating facility to receive reimbursement. |
| Remote Patient Monitoring                      | 99091 | Collection and interpretation of physiologic data (e.g., ECG, blood pressure, glucose monitoring)                                                       | Can only be billed one time per Member per month.                                                                                                         |
| E Consults – Consultative Provider             | 99451 | Interprofessional telephone/internet/electronic health record assessment and management service provided by a consultative physician or other qualified | Documentation and Records standards by treating/requesting provider must be in accordance with current NYS DOH guidelines.                                |

|                                           |       |                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

History

## Policy

Transitional Care Management (TCM) services are for a patient whose medical and/or psychosocial problems require moderate- or high-complexity medical decision making during transitions in care from an inpatient hospital setting (including acute hospital, rehabilitation hospital, long-term acute care hospital, inpatient psychiatric hospital), partial hospital, observation status in a hospital, or skilled nursing facility (SNF)/nursing facility to the patient's community setting (e.g., home, domiciliary, nursing facility or assisted living facility). TCM services begin on the date of patient discharge and continues for the next 29 days.

TCM services are reimbursable only for the MVP Medicare Advantage products. All other products do not include TCM services as a Covered Benefit.

## Definitions

TCM services includes one face-to-face visit within the specified time frames, in combination with non-face-to-face services that may be performed by the physician or other qualified health care professional and/or licensed clinical staff under his or her direction. Members may receive the following TCM services via telehealth as per Medicare guidelines.

**Below are the two CPT TCM codes and their related requirements:**

|       |                                                                                                                                                                                                                                                                                                                                                                                                                            |
|-------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 99495 | Transitional Care Management Services (Moderate Complexity): <ul style="list-style-type: none"> <li>• Communication (direct contact, telephone, electronic) with the patient and/or caregiver within two (2) business days post-discharge.</li> <li>• Medical decision making of at least moderate complexity during the service period.</li> <li>• Face-to-face visit, within 14 calendar days post-discharge.</li> </ul> |
| 99496 | Transitional Care Management Services (High Complexity): <ul style="list-style-type: none"> <li>• Communication (direct contact, telephone, electronic) with the patient and/or caregiver within two (2) business days post-discharge.</li> <li>• Medical decision making of high complexity during the service period.</li> <li>• Face-to-face visit, within 7 calendar days post-discharge.</li> </ul>                   |

## Notification/Prior Authorization Requests

MVP Payment Policies are not a guarantee of payment. Providers must also review MVP's Utilization Management Guides to determine if prior authorization is required and can refer to the searchable PDF versions of Medical, Pharmacy and other Provider and Payment policies for guidelines. The current policies can be found [here](#).

## Billing/Coding Guidelines

TCM services are only reimbursable only for a MVP Medicare Advantage products.

The CPT TCM codes can be billed only once per patient within 30 days after the original patient discharge for which a TCM code has been billed. These services may be billed by only one individual during the 30-day period after discharge.

The physician billing for TCM services should have an ongoing relationship with the patient and the intended use of these codes is for community-based primary care physicians. It is unlikely that most hospitalists will have the post-discharge relationship with a patient necessary to fulfill the required services.

Non-physicians who may bill TCM codes are Nurse Practitioner's (NP), Physician Assistant's (PA), Clinical Nurse Specialist's (CNS), and Certified Nurse Midwives (CNM), unless they are otherwise limited by their scope of practice as defined by the state in which they are licensed and/or certified.

There is a distinction between the discharge day management and TCM services. MVP seeks to avoid any implication that the E & M services furnished on the day of discharge as part of discharge management services could be considered to meet the requirement for TCM services that must be conducted within seven (7) or 14 calendar days of discharge.

The physician billing discharge day management could also be the physician who is regularly responsible for the patient's primary care (this may be especially the case in rural communities). However, MVP will not allow both discharge and TCM services to be billed on the same day.

The CPT TCM codes may not be billed when patients are discharged to an SNF. For patients in SNFs there are separate E&M codes for initial, subsequent, and discharge care, and the visit for the annual facility assessment, Initial nursing home visits are coded with 99304-99306. Subsequent nursing home visits are coded 99307-99310.

TCM services provided during a post-surgery period for a service with a global period will not be reimbursed because such services shall be included in the payment for the underlying procedure.

Practitioners can bill for TCM services only once in the 30 days after discharge, even if the patient may be readmitted and subsequently discharged two (2) or more times within the 30-day period.

When billing for TCM services, the following cannot also be billed during the TCM period:

- Care Plan Oversight services (CPT codes 99374-99380)
- Chronic Care Management Services (CCM and TCM service periods cannot overlap)

## Reimbursement Guidelines

Please see your provider fee schedule or your IPA agreement for specific reimbursement guidelines.

## MVP Health Care Payment Policy

# Unlisted CPT Code

**Effective Date: October 1, 2025**

### UNLISTED CPT CODE

Policy  
Definitions  
Billing/Coding Guidelines  
Notification/Prior Authorization Requests  
History

## Policy

MVP requires all claims submitted with non-contracted unlisted CPT code(s) to be submitted with medical records that support the use of the unlisted code. For claims submitted with an unlisted code without medical records, the claim or claim line(s) will be denied and it will be the provider's responsibility to submit medical records to substantiate the unlisted code.

## Definitions

An unlisted CPT code is used for a service or procedure that is rarely provided, unusual, variable, or is a new service or procedure that does not have a more specified CPT code.

## Billing/Coding Guidelines

### Unlisted CPT codes

| Code                              | Description                                | Rule                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

## MVP Health Care Payment Policy

# Urgent Care

Effective Date: October 1, 2025

## URGENT CARE

Policy  
Notification/Prior Authorization Requests  
Billing/Coding Guidelines  
History

## Policy

Urgent care reimbursements require coding, which specifically describes the services provided. Consistent with CPT coding and billing guidelines and CMS, physicians and other healthcare professionals should report the evaluation and management and/or procedure code(s) that specifically describe the urgent care service(s) performed.

## Notification/Prior Authorization Requests

MVP Payment Policies are not a guarantee of payment. Providers must also review MVP's Utilization Management Guides to determine if prior authorization is required and can refer to the searchable PDF versions of Medical, Pharmacy and other Provider and Payment policies for guidelines. The current policies can be found [here](#).

History

---

## Policy

Routine immunizations are reimbursed according to Medical Policy guidelines. This policy applies to Commercial and ASO products only.

Vaccinations are covered in the following circumstances:

- Immunizations for children as required by the American Academy of Pediatrics and the Advisory Committee on Immunization Practices (ACIP)
- Immunizations for children and adults according to the Medical Policy guidelines, and if not excluded by member contract/certificate

## Notification/Prior Authorization Requests

MVP Payment Policies are not a guarantee of payment. Providers must also review MVP's Utilization Management Guides to determine if prior authorization is required and can refer to the searchable PDF versions of Medical, Pharmacy and other Provider and Payment policies for guidelines. The current policies can be found [here](#).

## Billing/Coding Guidelines

Codes 90460, 90461, 90471-90474, G0008-G0010 must be reported in addition to the vaccine and toxoid code(s) to represent the administration portion of the service.

For vaccines supplied by the State of Vermont, the vaccine or toxoid code(s) must be billed with modifier "SL" to indicate the vaccine is State supplied, and the billed amount must be \$0.00 or \$0.01.

Providers are required to use G0008 and G0009 when billing for the administration of the Flu and Pneumococcal Vaccine.

CPT 90593 Chikungunya virus vaccine, recombinant, for intramuscular use is not covered  
The following G codes should be billed for all claims:

| Code  | Description                         | ICD-10 Diagnosis |
|-------|-------------------------------------|------------------|
| G0008 | Flu Vaccine Administration          | Z23              |
| G0009 | Pneumococcal Vaccine Administration | Z23              |

These services will be denied if not submitted with the appropriate administration code, specific vaccination or toxoid code(s) and the State supplied modifier, when applicable.

Please see your provider fee schedule or IPA agreement for other billing or reimbursement guidelines.

### COVID-19 Vaccine and Administration Billing Guidelines

MVP covers FDA approved COVID-19 vaccines at no cost-share to Members in all plans. For commercial and ASO Members, MVP will reimburse Participating Providers for the vaccine and administration of the COVID-19 vaccine when the guidance below is followed.

| Administration Code | Short Description                                                                                                     | Vaccine Code | Effective Date |

# Viscosupplementation of the Knee: Non-Coverage for Medicaid Managed Care (MMC) Plans

Last Reviewed Date: May 1, 2025

## VISCOSUPPLEMENTATION OF THE KNEE: NON-COVERAGE FOR MEDICAID MANAGED

### CARE (MMC) PLANS

Policy  
Definitions  
Notification/Prior Authorization  
Reimbursement Guidelines  
Billing/Coding Guidelines  
References  
History

## Policy

For Members enrolled in a Medicaid Managed Care (MMC) plan, MVP follows New York State (NYS) Medicaid's limit for reimbursement for viscosupplementation of the knee. Specifically, MVP will no longer cover viscosupplementation of the knee for an enrollee with a diagnosis of osteoarthritis of the knee. All other diagnosis associated with viscosupplementation will continue to be reimbursed.

## Definitions

Viscosupplementation of the knee is a procedure in which a gel-like fluid called hyaluronic acid is injected into the knee joint. Hyaluronic acid is a natural occurring substance found in the synovial (joint) fluid. Individuals with osteoarthritis ("wear-and-tear" arthritis) of the knee have a lower-than-normal concentration of hyaluronic acid in their joints.

## Notification/Prior Authorization Requests

MVP Payment Policies are not a guarantee of payment. Providers must also review MVP's Utilization Management Guides to determine if prior authorization is required and can refer to the searchable PDF versions of Medical, Pharmacy and other Provider and Payment policies for guidelines. The current policies can be found [here](#).

## Reimbursement Guidelines

Based on the current available evidence, for NYS Medicaid Managed Care (MMC) Plans, MVP will no longer cover viscosupplementation of the knee to a Member diagnosed with osteoarthritis of the knee. This coverage decision was based on research presented which included the potential harms attached to viscosupplementation (including joint infection, hematoma, inflammation), and the fact that viscosupplementation is only marginally effective in practice.

## Billing/Coding Guidelines

The following ICD-10 diagnosis codes are associated with the non-coverage decision:

- ICD-10: M17 – Osteoarthritis of knee

- ICD-10: M17.0 – Bilateral primary osteoarthritis of knee
- ICD-10: M17.0 – Unilateral primary osteoarthritis of knee
- ICD-10: M17.4 – Other bilateral secondary osteoarthritis of knee
- ICD-10: M17.5 – Other unilateral secondary osteoarthritis of knee
- ICD-10: M17.9 – Osteoarthritis of knee, unspecified
- ICD-10: M17.10 – Unilateral primary osteoarthritis, unspecified knee
- ICD-10: M17.11 – Unilateral primary osteoarthritis, right knee
- ICD-10: M17.12 – Unilateral primary osteoarthritis, left knee

There will be no reimbursement provided by MVP when the following thirteen (13) medication codes are reported with the ICD-10 diagnosis codes listed above:

- J7318 – Hyaluronan or derivative, Durolane, for intra-articular injection, 1 mg
- J7320 - Hyaluronan or derivative, GenVisc 850, for intra-articular injection, 1 mg
- J7321 - Hyaluronan or derivative, Hyalgan, Supartz or Visco-3, for intra-articular injection, per dose
- J7322 - Hyaluronan or derivative, Hymovis, for intra-articular injection, 1 mg
- J7323 - Hyaluronan or derivative, Euflexxa, for intra-articular injection, per dose
- J7324 - Hyaluronan or derivative, Orthovisc, for intra-articular injection, per dose
- J7325 - Hyaluronan or derivative, Synvisc or Synvisc-One, for intra-articular injection, 1 mg
- J7326 - Hyaluronan or derivative, Gel-One, for intra-articular injection, per dose
- J7327 – Hyaluronan or derivative, Monovisc, for intra-articular injection, per dose
- J7328 – Hyaluronan or derivative, GELSYN-3, for intra-articular injection, 0.1 mg
- J7329 – Hyaluronan or derivative, Trivisc, for intra-articular injection, 1 mg
- J7331 – Hyaluronan or derivative, SYNOJOYNT, for intra-articular injection, 1 mg
- J7332 - Hyaluronan or derivative, Triluron, for intra-articular injection, 1 mg

## Policy

MVP does not provide reimbursement for Hospital Acquired Conditions or Surgical “Never Events” unless specified otherwise by state or federal mandates.

MVP’s policy is consistent with those defined by CMS and New York State Department of Health (DOH) which maintain different lists of Preventable Conditions such as “Never Events”, Hospital Acquired Conditions (HACs), Health Care Acquired Conditions (HCACs), and Other Provider Preventable Conditions (OPPCs). The actual Never Events/HACs/HCACs/OPPCs governed under this policy will change over time, as dictated by federal and/or state mandate, and the needs of our customers and Members.

This policy applies to all lines of business and place of services for all Providers, including, but not limited to inpatient, hospital outpatient, ambulatory surgical centers, physicians and other qualified health care professionals.

## Definitions

- **Surgical “Never Events”** are a major surgical or other invasive procedures that are performed erroneously. Examples include:
  1. Wrong Surgical or Other Invasive Procedure Performed on a Patient
  2. Surgical or Other Invasive Procedure Performed on the Wrong Body Part
  3. Surgical or Other Invasive Procedure Performed on the Wrong Patient

MVP reserves the right to align with any state-specific initiatives as they are approved by CMS as “Never Events” and implemented by the individual states.

- **Hospital Acquired Conditions (HAC)** are defined by CMS secondary to:
  1. A high cost or high volume or both.
  2. Could reasonably have been prevented through the application of evidence-based guidelines.
  3. Higher payments when present as a secondary diagnosis.
- **Health Care-Acquired Conditions (HCAC)**, formerly Hospital Acquired Conditions (HACs), are defined by NYSDOH as provider-preventable conditions that occur in the inpatient hospital setting. These HCACs are a list of Medicare HACs recognized by NYSDOH.
- **Other Provider Preventable Conditions (OPPC)**, is the term NYSDOH recognizes the Surgical “Never Events” listed above when they occur in the ambulatory setting, including both in the outpatient hospital setting and in a physician’s office.

- **Present-on-Admission** (POA) Indicator- Present on Admission (POA) is defined as a condition that is present at the time the order for inpatient admission occurs. These indicators are used to determine payment implications.

## Notification/Prior Authorization Requests

MVP Payment Policies are not a guarantee of payment. Providers must also review MVP's Utilization Management Guides to determine if prior authorization is required and can refer to the searchable PDF versions of Medical, Pharmacy and other Provider and Payment policies for guidelines. The current policies can be found [here](#).

## Billing/Coding Guidelines

MVP requires the identification of hospital acquired conditions by submitting a present on admission (POA) indicator (Table 1) for all inpatient facility diagnoses. Claims should adhere to UB-04 standards as specified by CMS. If the POA indicator determines a HAC or HCAC, reimbursement for the treatment of care may be subject to a reduction or denial as defined below.

POA indicators must accompany all inpatient primary and secondary diagnoses. Failure to include the POA indicator with these codes may lead to claim denial or rejection. Notably, the POA indicator is not mandatory for the admitting diagnosis.

The following hospitals are **exempt** from reporting the POA Indicator and the HAC payment provision:

1. Critical Access Hospitals (CAHs)
2. Long-term Care Hospitals (LTCHs)
3. Cancer Hospitals
4. Children's Inpatient Facilities
5. Religious Non-Medical Health Care Institutions
6. Inpatient Psychiatric Hospitals
7. Inpatient Rehabilitation Facilities
8. Veterans Administration/Department of Defense Hospitals

## Never Events on Hospital Inpatient Claims

Hospitals are required to submit a no-pay claim (Type of Bill 110) to report all charges associated with the erroneous surgery. However, if there are also non-related services/procedures provided during the same stay as the erroneous surgery, hospitals are then required to submit two claims, one claim with services or procedures unrelated to the erroneous surgery and the other claim with the erroneous services/procedures as a no-pay claim. The non-covered Type of Bill 110 must have one of the following ICD-10-CM diagnosis codes reported on the hospital's claim to identify the type of erroneous surgery performed.

- Y65.51 - Performance of wrong procedure (operation) on correct patient
- Y65.52 - Performance of procedure (operation) on patient not scheduled for surgery
- Y65.53 - Performance of correct procedure (operation) on wrong side of body parts

## Never Events on Hospital Outpatient, Ambulatory Surgery Center (ASC), and Professional/1500 Claims

Outpatient, ASCs, and physicians or other health care professionals must report the applicable HCPCS modifier(s) with the associated charges on all lines related to the surgical error.

- PA: Surgery Wrong Body Part
- PB: Surgery Wrong Patient
- PC: Wrong Surgery on Patient

\*Claims that incorrectly use the PC modifier, "Wrong Surgery on a Patient", may be subject to a denial and must be resubmitted with the appropriate coding for the services rendered as in table 2.

\*The non-reimbursable services related to Never Events and/or HAC condition shall not be billed to the member from a professional provider or facility, and the member must be protected from financial liability for these services.

## Reimbursement Guidelines

For each LOB, the reimbursement methodology applied is outlined below:

### 1. MVP Commercial/ASO Products

MVP will deny a claim submitted with a Surgical "Never Event" and MVP will reduce payment on a claim billed with a HAC diagnosis and a Present-on-Admission (POA) indicator of "N". For hospitals billing with APR DRG's for commercial business, MVP shall refer to the then current New York State DOH HCAC or OPPC list as published by the NYS DOH. For hospitals billing with MS DRGs for commercial business, MVP shall reference the current CMS HAC and Surgical "Never Events" list published by CMS. For Outlier or Per Diem Claims, claim lines associated with HACs or Never Events will also be denied.

### 2. Medicare Advantage Products

MVP will deny a claim submitted with a Surgical "Never Event" and MVP will reduce payment on a claim billed with a HAC and a Present-on-Admission indicator of "N." MVP follows standard CMS reimbursement practices for Surgical "Never Events" and HACs, which may include payment adjustments or non-payment. The lists of Surgical "Never Events" and HACs may be adjusted by CMS periodically, and MVP will follow CMS practices. The applicable CMS list will be determined by the date of services were rendered.

### 3. New York State Government Programs Products (Medicaid Managed Care, Child Health Plus, and HARP) and NYS Essential Plans

MVP will deny a claim submitted with a Surgical "Never Event" and MVP will reduce payment on a claim billed with a HAC and a Present-on-Admission indicator of "N." For OPPCs and HCACs, MVP shall reference the then current Medicaid OPPC and HCAC lists published by DOH. MVP follows standard New York State Medicaid reimbursement practices for OPPCs and HCACs for its New York Government Programs products. The applicable DOH list will be determined by the date of services that were rendered.

## Facility Billing Related to Never Events

- Facility/Provider will bill MVP for these Inpatient and Outpatient services, according to the standard billing process. MVP will deny a claim if a Never Event is identified upon medical record review.

- Should the facility disagree with MVP's denial of the claim, the facility may appeal to MVP within 30 days of the date of the denial letter
- Subsequent Inpatient or Outpatient readmissions to the same facility as a result of, or related to the Never Event will also be denied by MVP

## **Provider Billing Related to Never Events**

### **1. Commercial/ASO Products**

- For hospitals billing with MS DRGs for commercial business, MVP will follow CMS protocols and for hospitals billing APR DRG's for commercial business, MVP will follow NYS DOH protocols for payment of Providers

### **2. Medicare Products**

- MVP will follow CMS protocols related to payments of Providers for Never Events

### **3. New York Government Programs Products Medicaid Managed Care, Child Health Plus, HARP, and Essential Plan**

- MVP will follow NYS Medicaid Managed Care or DOH protocols related to payment of Providers

**\*Providers whose bills are denied may appeal such denials in accordance with their MVP contracts.**

## **Table 1: CMS POA Indicator Options and Definitions**

| Code | Reason for Code                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
|------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Y    | <p>Diagnosis was present at time of inpatient admission.</p> <p>CMS will pay the CC/MCC DRG for those selected HACs that are coded as "Y" for the POA Indicator.</p>                                                                                                                                                                                                                                                                                                                                 |
| N    | <p>Diagnosis was not present at time of inpatient admission.</p> <p>CMS will <b>not</b> pay the CC/MCC DRG for those selected HACs that are coded as "N" for the POA Indicator.</p>                                                                                                                                                                                                                                                                                                                  |
| U    | <p>Documentation insufficient to determine if the condition was present at the time of inpatient admission.</p> <p>CMS will <b>not</b> pay the CC/MCC DRG for those selected HACs that are coded as "U" for the POA Indicator.</p>                                                                                                                                                                                                                                                                   |
| W    | <p>Clinically undetermined. Provider unable to clinically determine whether the condition was present at the time of inpatient admission.</p> <p>CMS will pay the CC/MCC DRG for those selected HACs that are coded as "W" for the POA Indicator.</p>                                                                                                                                                                                                                                                |
| 1    | <p>Unreported/Not used. Exempt from POA reporting. This code is equivalent to a blank on the UB-04, however; it was determined that blanks are undesirable when submitting this data via the 4010A.</p> <p>CMS will not pay the CC/MCC DRG for those selected HACs that are coded as "1" for the POA Indicator. The "1" POA Indicator should not be applied to any codes on the HAC list. For a complete list of codes on the POA exempt list, see the Official Coding Guidelines for ICD-10-CM.</p> |
