MVP Invites You to Connect With Us

Granting MVP Health Care® remote access to your electronic health records (EHRs) helps your practice run more efficiently.

Connect MVP with Your EHRs

This connection will allow MVP nurses to collect required documentation for:

- Annual HEDIS® medical record reviews
- Closing gaps in care
- State-mandated medical record studies
- Utilization and risk adjustment requirements

Grant Remote Access to Your EHRs

Granting remote access will:

- Reduce incoming record requests
- Reduce staff time locating medical records
- Reduce staff time transmitting records to MVP
- Eliminate calls for additional records due to illegible copies, name/date of birth discrepancies, demographics, etc.
- Eliminate the need for medical record vendor services
- Improve personal health information (PHI) security by eliminating potential transmission errors

Ready to make a connection?

The MVP IT department will work with your office's IT staff to establish a successful and secure connection to safeguard the PHI of our Members.

Contact Debra Carr at **dcarr@mvphealthcare.com** today to get started.
